March 6, 2008

Dear Publisher:

The research reported in this manuscript has been funded through the National Institutes of Health and therefore its publication must comply with Public Law 110-161 of the Consolidated Appropriations Act of 2008, which can be found in Division G, Title II, Section 218 of PL 110-161.

Specifically, the law states:

*“The Director of the National Institutes of Health shall require that all investigators funded by the NIH submit or have submitted for them to the National Library of Medicine’s PubMed Central an electronic version of their final, peer-reviewed manuscripts upon acceptance for publication, to be made publicly available no later than 12 months after the official date of publication: Provided, That the NIH shall implement the public access policy in a manner consistent with copyright law.”*

The NIH Public Access Policy, which implements this law, can be viewed at (<http://grants.nih.gov/grants/guide/notice-files/NOT-OD-08-033.html>).

In order to ensure compliance with the NIH policy, the University of California, in cooperation with the author, must provide a copy of the author’s final manuscript, including all modifications from the publishing and peer review process, to the NLM’s PubMed Central (PMC) database at the time the manuscript is accepted for publication, and also authorize NIH to make such copy of the manuscript available in digital form for public access in PMC no later than 12 months after publication.

By accepting this manuscript, you agree to accept these terms and agree they are paramount and supersede any provisions in any publication agreement for this article, already signed or to be signed at a later date, that may conflict.

Sincerely,

A handwritten signature in black ink, appearing to read "W. Tucker".

William T. Tucker  
Executive Director  
Research Administration and  
Technology Transfer

■ Manuel Martinez-Maldonado, MD, MACP  
Executive Vice President for Research

University of Louisville

Fax: 502-852-8375  
Email: [m0mart10@louisville.edu](mailto:m0mart10@louisville.edu)

Dear Journal Publisher,

The University of Louisville deeply appreciates your interest in the scholarship of our faculty and your commitment to making their scholarship widely available. The enclosed article resulted at least in part from research and investigation funded by the National Institutes of Health. Dissemination of the article consequently is governed by the NIH Public Access Policy (<http://publicaccess.nih.gov/policy.htm>).

The NIH policy and its statutory foundation require authors of NIH-funded publications:

- to deposit their final, peer-reviewed manuscripts in the National Library of Medicine's PubMed Central upon acceptance for publication,
- to authorize PubMed Central to make their manuscripts publicly accessible no later than 12 months after publication, and subsequently
- to identify and account for PubMed Central deposits in NIH reporting.

Complying with the NIH policy requires authors to grant NIH sufficient rights to satisfy the NIH Public Access Policy. In order to help UofL authors comply with the NIH policy, you as the publisher and as a condition of publication will need to include or agree to include at minimum the NIH-proposed language or its equivalent in the governing publication agreement:

*"Journal acknowledges that Author retains the right to provide a copy of the final manuscript to the NIH upon acceptance for Journal publication, for public archiving in PubMed Central as soon as possible but no later than 12 months after publication by Journal."*

This minimum threshold is necessary for NIH compliance. Your agreement certainly can also allow UofL faculty to explicitly retain other important rights such as to make copies for teaching, prepare derivative works, share copies with colleagues for scholarly communication, provide context for presentations, encourage student exploration, and enrich other scholarly activities in support of their ongoing research and teaching.

Your existing agreement may allow PMC deposits already or at least provide sufficient rights for authors to make PMC deposits and comply with the NIH policy. In the alternative, like other publishers, your publication services may include depositing the manuscript in PMC for authors and then notifying them promptly of that deposit and the corresponding NIH identification number. In either case, we recognize that communication between author and publisher is paramount in successful publishing and urge you to inform UofL authors of your practices to help assure compliance with the NIH Public Access Policy.

We again appreciate your efforts to support compliance with the NIH Public Access Policy. Your help in sharing your approach with UofL authors and in identifying who within your organization can help them to achieve compliance with that policy is important to us. We thank you for your consideration and cooperation.

Sincerely,

A handwritten signature in black ink, appearing to read 'Manuel Martinez-Maldonado'.

Manuel Martinez-Maldonado, M.D.  
Executive Vice President for Research

February 2009

**Email to Publishers for Submission Status of NIH-Funded Works**

Washington University is aware of some journal publishers that are not timely submitting manuscripts to PubMed Central on behalf of NIH-funded authors in compliance with the NIH Public Access Policy. NIH requires documentation of compliance with the NIH Public Access Policy for manuscripts authored or co-authored by grantees, and for manuscripts that arise from a grantee's NIH award if a grantee is not an author. See the [NIH Public Access Policy website \(http://publicaccess.nih.gov/index.htm\)](http://publicaccess.nih.gov/index.htm) and the NIH notice, [Reminder Concerning Grantee Compliance with Public Access Policy and Related NIH Monitoring Activities \(http://grants.nih.gov/grants/guide/notice-files/NOT-OD-08-119.html\)](http://grants.nih.gov/grants/guide/notice-files/NOT-OD-08-119.html) for more information about the NIH Policy and procedures for compliance.

If you are concerned that your manuscript has not been timely submitted, you may use the prepared email message set forth below to contact the publisher to request confirmation of submission and to notify the publisher that if submission does not occur within a certain date, you will self-submit. Becker Medical Library is happy to assist you with the submission of your manuscript to PubMed Central. See the [Becker Library NIH Policy website \(http://becker.wustl.edu/services/scholarly/nihpolicy.html\)](http://becker.wustl.edu/services/scholarly/nihpolicy.html) for more information on services for NIH-funded authors.

**Instructions for Use:**

1. Modify the statement by inserting the appropriate information as noted in brackets.
2. Send the statement via email to the publisher and copy the Editor-in-Chief (EIC). (If you need assistance with locating an email contact for a publisher or EIC, contact Cathy Sarli ([sarlic@wustl.edu](mailto:sarlic@wustl.edu)).
3. Copy Patricia Hart ([patricia\\_hart@wustl.edu](mailto:patricia_hart@wustl.edu)) and Cathy Sarli ([sarlic@wustl.edu](mailto:sarlic@wustl.edu)) on the email. This will allow us to track which publishers are posing problems for our NIH-funded authors/co-authors.
4. Notify Cathy Sarli ([sarlic@wustl.edu](mailto:sarlic@wustl.edu)) of any problems that arise.
5. Keep a copy of the email for your records.

**Immediate Action Required:**

On **[insert date]** my manuscript, **[insert name of manuscript]**, was accepted for publication by your journal, **[insert name of journal]**. The research underlying the substance of the manuscript was funded by the NIH and therefore the manuscript must be submitted to PubMed Central to comply with the NIH Public Access Policy requirement. According to the copyright agreement, you, the publisher, agreed to submit the peer-reviewed manuscript version to PubMed Central on my behalf.

To date, the manuscript has not been submitted and the NIH has requested documentation of compliance with the NIH Policy for this work. Documentation of compliance cannot be provided until the work is submitted. Failure to provide evidence to the NIH that the manuscript was submitted could result in sanctions issued by the NIH against me.

I am requesting that the manuscript be submitted to PubMed Central before **[insert date: at least five working days]**. I understand that this is a relatively new requirement by the NIH and that you, the publisher, may not have a process in place to track all the journal manuscripts requiring submission. Therefore, if I do not receive confirmation that the manuscript was submitted by the date indicated, I will relieve you of your obligation to submit the manuscript and I will submit the manuscript on my own. If you would like confirmation after it has been submitted, please let me know and I will provide it to you.

Thank you for your immediate attention to this matter.

**[insert your name]**
