The UW Libraries Research Commons is meeting a new set of student and faculty needs that are emerging with the growth of data-driven research, digital scholarship and interdisciplinary studies. The space provides a collaborative environment in which students and faculty can come together to share and discuss research, as well as get support for all steps of the research process: searching, writing, publishing, and funding. The Research Commons is a place to collaborate and connect with fellow students and faculty on research projects. It is a place for workshop and presentation opportunities, and a place to discover what peers and colleagues are researching.
