New Books -- February 2008

Springer E-books Now Available

The University of Chicago Library is pleased to provide electronic access to most Springer-Verlag books published 2005-2007 and new 2008 titles as they become available online.

We are planning to include records for these books in the Library's on-line catalog. However, we are experiencing some problems with loading the records. In the meantime, you can access these titles directly on the [Springer search page](#). On that page, you can search by keyword; then limit your search results by choosing books in the right hand column under Content Type. If we have full text access to the book, you will see a green box just to the left of the entry.

Please send any comments or questions to [Brenda Rice](#).

HG4515.3 .R66 2004

Roman, Steven.

Introduction to the mathematics of finance: from risk management to options pricing.

New York: Springer, c2004.

Undergraduate texts in mathematics.
