REPRESENTATIVE DOCUMENTS
Service Philosophy
The Learning Commons is an evolving collection of UBC-selected learning resources that guide students through a process of discovery. Through an emphasis on student-driven initiatives and shared-decision making, we enrich the academic support and enhancement experience of all UBC students.

The Learning Commons is your first stop for resources and tools that will help you learn more effectively. Here are a couple of suggestions to get you started:

- **Quick Links for Students**: offers suggestions for the 7 most important resources for students on this site.
- **Study Toolkits**: offer a guided tour on topics from presentation skills to exam prep, and info on new and standard technologies that can make your studying a lot easier.

About the New Service Model Programs

The New Service Model (NSM) process began in Fall 2007, when a group was convened to advise the University Librarian on priorities and directions for “new service models” that would build on the Library’s traditional strengths (including the depth of our collections and the quality of our services) to ensure that Illinois remain as much a leader in the provision of library services in the twenty-first century as it was throughout the twentieth. Based on a synthesis of ideas from the Library faculty and staff, strategic priorities and input from the campus community, the New Service Model (NSM) Program involves nearly two dozen projects to be pursued over the next few years, as articulated in Library Services for the 21st Century at the University of Illinois at Urbana-Champaign (April 21, 2008).

2009 New Service Models Report

The 2009 New Service Models Report (June 4, 2009) reviews the projects launched during the first year of the NSM process and provides an update on current planning and initiatives. A one-page Executive Summary is also available.

JoAnn Jacoby, Coordinator | 217-244-1869 | email | Office Hours Tuesdays, 4-5 pm | 302 Main Library
Over the past several years, the service and collection models that defined excellence in academic libraries throughout the 20th century have been challenged by new models of scholarly communication, new mechanisms for licensing and accessing digital content, the introduction of transformative technologies like the World Wide Web, new methods for teaching and learning, new approaches to interdisciplinary scholarship and scientific inquiry, the arrival of a new generation of faculty and students who, as "digital natives," bring new approaches to information use (and higher expectations for access to digital services and content), and broad changes in the higher education environment.

As the University Library works to meet the challenge set by the Provost to design exemplary library services and collections for the new century, we believe that the best way to make progress toward our strategic goals, and to provide support for the strategic goals of the University of Illinois, is to embrace new service models that recognize the increasingly interdisciplinary nature of academic inquiry, the critical importance of digital information resources, and the opportunities for collaborative approaches to the provision of library services and collections using information technology.

**Statement on Library Services Available**

The University Library has issued a statement on Library services and the factors contributing to the New Service Models process.

**New Service Models Final Report Available**

The New Service Models final report, "Library Services for the 21st Century at the University of Illinois at Urbana-Champaign: Final Report and Recommendations of the Budget Group Plus," including a message from the Provost (2008), is now available for viewing.

**Open Meetings on New Service Models**

Join University Librarian and Dean of Libraries Paula Kaufman for a discussion of the new service model proposal and review process on the following dates.

**Open Meeting Dates, Times, and Locations**

- January 24, 2008, 3:30pm-5:00pm, Grainger Commons, Grainger Library
- February 8, 2008, 9:00am-10:30am, Room 66, Main Library
- February 12, 2008, 3:30pm-5:00pm, Heritage Room, ACES Library

These Town Hall meetings are open to all Illinois faculty, students, and staff.
New Service Models Guiding Principles

- Deep engagement in research, teaching & learning communities
  - Respond nimbly to evolving needs and use patterns
- Interdependence
  - There are no islands, we are in this together
- Resilience
  - Flexibility & depth of staffing to cover core and emerging areas, staff absences/breaks
- Continuing commitment to building strong, responsive collections
Digital Reference Consolidation Pilot Support

Please share your comments, questions, and content regarding the consolidation via the blog or the quick links and training areas of the site.

Proposed Staffing Model
All reference desk staff responsible for digital reference (Wilson, SciEng, Magrath, HSL) will answer chat questions and process/refer/answer e-mail questions during assigned desk shifts (see General Expectations and Guidelines for more specific information on managing multiple interactions). Chat questions will roll to the national queue if no staff member is able to assist due to interactions with other patrons. When only one desk is staffed (some evening and weekend hours) and providing Digital Reference support, e-mail questions will have lower priority over in-person interactions and may be left in the queue to be handled on the next business day.

Contact the Digital Reference Consolidation Team with any questions:

Law Reference questions handle via email
We've had a request from Suzanne Thorpe, Assoc. Director of Faculty, Research and Instructional Services at the Law Library, to...
General Expectations for Managing Reference Interactions

- Digital reference services provide assistance by email or chat to University of Minnesota students, faculty, and staff; researchers from other institutions; University of Minnesota alumni; and external patrons trying to locate information specific to our collections.
- In general, we do not do people's research for them, rather, we help users get started with their research and teach them to find and utilize library resources and collections. Exceptions may be made on a limited basis as staffing allows and in exceptional circumstances. Some exceptional circumstances might include helping a patron determine whether it is worth their time to travel to the University to do their research (especially when traveling great distances), to help a patron utilize special collections, and to help a patron with unique and local materials within our collections. Other exceptional circumstances may be determined and noted at each service point.
- In general chat sessions are meant to answer short, straight forward questions. For tricky or overly long chat questions (more than 15 minutes), determine if it might be best to follow up more quickly via phone or referring patrons to a reference desk. E-mail follow-ups for more in-depth questions may be appropriate as well.
- Help the person you are with first - online or in-person. If you are busy with an online chat session, make eye contact with those approaching the desk and explain that you are helping someone else right now and will be with them ASAP. Get the first person started, explain that you need to get another person started and help the 2nd person, etc. If other desks are open, a chat question could be handed off (if it is a baseline question that anyone might be able to answer) or if the chat session has already gone on beyond the recommended time frame (~15 minutes), you can make a referral to a visit in-person to a reference desk or follow-up later via e-mail.
- If not working with another patron, answer chat and e-mail questions as they arrive. If busy with a patron, allow another desk or the national queue to address chat interactions.
- Answer/process/refer email questions while at the desk and not working on in-person or chat reference questions. This takes priority over other work you may bring to the desk. Make sure that all e-mail questions receive a response, even if it is just a note indicating that we are working on their question, within 24 hours.
- Follow documented e-mail reference procedures to claim e-mail questions in order to avoid duplication of effort.
- Enter all interactions (chat and e-mail too) into DeskTracker. Each interaction with a patron in QuestionPoint is a separate interaction and requires a separate DeskTracker entry.
re-Imagine the library around student learning experiences?

WHY NOT...
What we heard from our patrons...
Students desire...

- A "third space":
  - Their in-between space (a la Starbucks “third space”)

- Not their dorm room

- Not their classroom

- A place to study, discover, socialize, have fun
Students desire...

- Multiple spaces that serve different types of learning experiences:
  - Flexible areas for group study and individual study
  - Group study rooms (equipped with technology)
  - Quiet study and silent study
  - Spaces for not so quiet study and general social interaction (and food & drink!)
Students desire...

- A technology-rich environment:
- Yes! technology to support all their learning activities in the library
- Yes! more technology to support learning: More and better computers, presentation practice rooms, check out of laptops, iPods, cameras, and other gadgets
- No! to gaming
Collaborative spaces for interaction with students:

- Instruction lab for collaborative workshops to enhance student learning; for example Center for Teaching Excellence, Instructional Technology Services, University Writing Center, Instructional Services.

Faculty desire...

- More services that save time:
  - They love deliverEdocs and Get It For Me!

What else can we do to top that?
Things we Are re-Imagining…

- Service Transactions vs. Service Experiences
- What is it like for our patrons to...
  - Enter the library?
  - Check out a book?
  - Print an article?
  - Ask for help?
  - Study with their friends?
Things we are re-Imagining...

Can we...

- Make things easier?
  - Consolidate service points

- Save people time?
  - Provide options for self-serve where possible (give our patrons the choice!)
  - Offer more online access for services, as well as, resources

- Be more intuitive?
  - Furnishings that help define space
  - What else...?
The Research Commons is intended to meet a new set of student and faculty needs that are emerging with the growth of data-driven research, digital scholarship and interdisciplinary studies. The space provides a collaborative environment in which students and faculty can come together to share and discuss research, as well as get support for all steps of the research process: searching, writing, publishing, funding. The Research Commons is a place to collaborate and connect with fellow students and faculty on research projects. It is a place for workshop and presentation opportunities, and a place to discover what your peers and colleagues are researching.

The ground floor of the Allen South Library was transformed over the summer of 2010, utilizing Capital Projects funding from the Office of the Provost. Data and wireless upgrades were generously provided by UWIT. The Research Commons Advisory Board provides recommendations on services to be offered within the space, including consulting, workshops, salons and presentation space.

The University of Washington Libraries is enthusiastic about the possibilities that this project opens for UW students and faculty doing research, and believe that the Research Commons will go far in furthering our mission to enrich the quality of life and advance intellectual discovery by connecting people with knowledge.

Learn more about the development of the Research Commons on our blog: http://uwresearchcommons.wordpress.com.
Services Offered
Research Center: Let Us Guide Your Research

When should I make an appointment?

Reserve a convenient time to work with a Research Librarian at the Research Center at the BU Common@Mugar if you are researching topics in the arts, humanities, or social sciences.

What can I do if I need to research another topic?

If you have a research question that is focused on science and engineering, management, educational resources, theology, medicine or law you can visit the librarians at those libraries. They are experts in their subject areas and enjoy working with you.

What should I bring to my appointment at the Research Center?

Bring any information you have gathered about your research topic. This might include your course syllabus, the assignment, any notes from your Professor’s discussion of the assignment, your thoughts on the topic, any information you have already gathered that your have found helpful, etc.

Who staffs the Research Center?

The center is staffed by Research Librarians. All of our Research Librarians have a Masters Degree in Library and Information Science and many have a second advanced degree in another subject. Research Librarians are trained, experienced and passionate about research. They look forward to working with you.
Writing Centre

Tutorial Clinic

Want to improve your writing skills? Trained tutors can help you become a confident and capable writer so you can edit and proofread your own work. The drop-in tutor clinics are available in the Learning Commons on a first come, first served basis or you can book in for a one hour appointment at the Writing Centre. For more information visit the UBC Writing Centre’s website.

Fall 2011 Hours

Drop-in Tutoring | Monday - Thursday 4-8pm (Chapman Learning Commons)
Appointment Tutoring | Monday - Friday 10am-4pm (Ponderosa Annex C)

Document & Image Scanning

The Digital Media Lab has tools for scanning most any type of material into a digital format. Scanners are attached to standard workstations in the Lab, which are not reservable. If you need assistance finding or using a scanner, Digital Media Lab staff can help. The Lab offers the following:

- 3 Fujitsu ScanSnap document scanners (scan up to 50 pages at a time quickly)
- 6 Epson flatbed scanners (8.5” x 11”)
- 4 Nikon negative film & slide scanners
- 1 Epson large format scanner (12” x 17”)
- 1 Canon microfilm/microfiche scanner/viewer
- 1 Scanpro 2000 microfilm/microfiche scanner/viewer

All computers in the Lab have the Adobe CS4 Web Premium suite, including Photoshop and Acrobat Pro, for editing your scans and creating PDFs.

Note: Overhead scanners are also available in the D.H. Hill Library, in the Learning Commons and in the Print/Copy/Scan room adjacent to the main lobby.

Scanning options at other campus libraries:

- Scanning at the Veterinary Medical Library
- The Natural Resources Library has an overhead scanner.
- The Design library has an overhead scanner

The Technology Support and Loan desk located in the Learning Commons 1st floor is where you can find help with the following:

- Logging into S.U. resources
- Printing assistance, including basic print setup options, for both the black and white and color printing
- Scanning assistance including basic scanning setup and scanning options
- Basic inquiries regarding Microsoft Office such as formatting, saving, etc.
- Basic Adobe inquiries including creating a new document, saving of documents, resizing, and assistance with simple features like color adjustment and font sizing
- Basic assistance with best file types to use for any given situation.
- Assistance with minor issues on your laptop
  - Connecting to internet, etc. (accessing ITS webpage)
- Assistance with minor issues on library loaner laptops
  - Connecting to internet, etc.
  - Printing assistance
  - Basic software assistance (Office, etc.)
The Technology Support and Loan Desk, located on the first floor Learning Commons, provides students with a wide selection of technology that may be loaned out for personal use.

The Curry Library Innovation Commons (the CLIC)

Presentations

The Curry Library Innovation Commons (CLIC) serves as a collegial gathering place for students, faculty, staff, and visitors. The heart of the CLIC is innovation and that is evidenced by the creation of a new model for a 21st century library which features access to digital collections and a commitment by the librarians to help researchers acquire the information literacy skills needed for scientific research and scholarship in the digital environment. In addition, the CLIC promotes the study and use of technology in teaching and learning. In 2010, the Children’s Engineering Center was established in the CLIC to introduce cutting edge technology to student teachers, faculty and friends!

Location: Ruffner Hall, 3rd floor, room 302 Map
Telephone: 434-924-7040
Regular Hours of Operation Fall Semester
Monday - Thursday: 8 a.m. - 10 p.m.
Friday: 8 a.m. - 5 p.m.
Closed Weekends

The CLIC Librarians

*the CLIC Librarians’ Newsletter
Professional Development Workshops for students and faculty

EVENTS IN THE CLIC

ITS SOFTWARE WORKSHOP
TOPIC: Creating Solid Graphs for Quantitative Data
TIME: 2pm - 3pm
DATE: Wednesday, November 9, 2011
WHERE: The CLIC, Ruffner Hall, room 302
DESCRIPTION: This workshop will introduce the creation of solid graphs for quantitative data.
INSTRUCTOR: Nancy Kechner
No registration is required.

Want to Book Space in the CLIC?
Contact Bobbie Gallo bg4q@virginia.edu | 434-243-4326
Your computer needs JavaScript in order for you to view the email address above.

What Will You Find in the CLIC?
- Group study areas
- Quiet study room (South west corner)
- Computers for students with SPSS and more
- Research presentations and social events
The Curry Library Innovation Commons (the CLIC)
http://curry.virginia.edu/about/clic

- Children’s Engineering Center

- Computing consultant: Wed. 1-4pm (help with SPSS, NVivo, and more)
- Library: 8am - 5pm Mon-Fri. assistance with literature reviews, database searching, RefWorks, and more
- The Center for the Children’s Engineering Initiative
- 300 research handbooks
- Pickup location for interlibrary loan items and recalled books
- Public printers, photocopiers, scanner and digital sender (convert a photocopy to digital format, or scan a chapter from a book and convert it to digital format and email it to yourself or others)
- a technology “petting zoo” (U.Va. affiliates can check out an iPad, SmartPen, Tweakers, Pico Projector, Flip camera, or Kindle eBook reader)
Services

Part of the vision of the UW Libraries is providing support for student and faculty researchers in all steps of the research process: searching, collecting, evaluating, writing and sharing. The following lists services that are currently available across the University of Washington for meeting those needs. This list is a work in progress. Please let us know if there is a service or resource missing from this list.

Planning and Progress
Georgetown University Library Strategic Initiatives 2010-2015

Toward the Library's vision of being "recognized as an 'icon of transformation' for Georgetown University, empowering its communities to surpass their own aspirations and to have a global impact," the Library's Leadership Council, in 2009, developed a five-year strategic plan that focuses on eight major initiatives: Copyright; Scholarly Communications; Research, Teaching, and Learning; Collections; Space; Campus, Community, and Global Engagement; Digital Infrastructure; and Staffing.

1. Copyright

In five years, the Library will:
- be among the leaders on campus and nationally for copyright, DRM, and rights management to ensure we take full advantage of our rights
- We have created a new department, Copyright and Digital Rights Management, that will take the lead on copyright and rights management, developing an outreach and education program, and establishing a University-wide Center for copyright and DRM.

2. Scholarly Communications

In 5 years, the Library will:
- ensure the university community is aware of innovative opportunities, trends, and new models of scholarly output and communication
  - The Scholarly Communications Committee will continue to host two symposia a year to highlight emerging issues in scholarly communication of interest to the campus community. The symposia will be video-recorded and streamed to make them available to a wide audience.
  - We will also develop DigitalGeorgetown and related services to support the advancement of education and scholarship at Georgetown and provide collaborative opportunities with partners across campus and around the world.

3. Research, Teaching & Learning

In 5 years, the Library will:
- deliver research instruction with the most effective and efficient mix, approaches, and tools to meet the needs of our different audiences at all levels; discover the research needs and initiatives of faculty in order to enable a sharing of research opportunities (expertise management); and provide effective and efficient services to continue to meet the changing information needs of our community
  - We strive to meet the needs of our different constituencies at all levels. We will continue to expose collections to scholars as a foundational step to being part of the genesis of scholarship within the University as well as to insert the Library appropriately as key to faculty, graduate and undergraduate research. We will also provide the Georgetown community with the research and multimedia development skills needed to integrate technology into their scholarly activities and to enable their participation in a globally interconnected world.

4. Collections

In 5 years, the Library will:
- have access to all the resources necessary for research, teaching, and learning in the most effective and efficient manner; establish long-term access to scholarly resources using the most effective and efficient preservation approaches, tools, and collaborations; and establish effective and efficient approaches to maintain and enhance long-term access to the historical and cultural record of the
University

- Our goals for Collections include establishing, maintaining and enhancing long-term access to our scholarly resources. We will undertake a systematic assessment of our collections as well as increase our long term preservation efforts.

5. Space

In 5 years, the Library will:

- implement the space improvements within the existing structure as defined within the Lauinger Master Plan in an effort to alleviate pressing infrastructure needs (this will only partially meet the current, changing, and increasing demands of our users); and begin the process of expansion of the Library to fully meet the needs of our users
- Because we are in a 40-year-old building with maxed out electrical supply, an aging HVAC system and no room for collection growth, physical space is currently our biggest challenge. We have finalized a master plan for Lauinger Library with the goal of making improvements to the existing building’s infrastructure to better meet the needs of our users and staff in the short term as well as plan for a longer term solution of expanding the building to create more and better study, meeting, and collaborative work space for our faculty and students. The Blommer Science Library will also be renovated with the reinvention of Reiss.

6. Campus, Community, and Global Engagement

In 5 years, the Library will:

- enhance the stature, reach and scope of engagement of Lauinger Library to elevate the support for the library; and establish appropriate partnerships in support of the University’s global initiatives
- Creating better relationships and partnerships with our Library Associates, Library Board, and Office of Advancement is a key objective. We’ll also develop a regular presence at campus events and raise awareness and engagement with the Library’s services, collections, and space. We will closely coordinate our exhibitions and events to highlight our unique and special collections.

7. Digital Infrastructure

In 5 years, the Library will:

- establish the most effective and efficient infrastructure to enable creative and scholarly innovations within the University and new forms of services within the library to meet the increasing, changing, and future needs of our community
- In addition to improving the building’s infrastructure, we will also be enhancing our technology infrastructure in an effort to provide robust digital services and next generation systems to support new modes of teaching and learning. Collaboration with internal and external partners will be important in this area.

8. Staffing

In 5 years, the Library will:

- develop an organization with the expertise, knowledge and agility to be effective in a constantly changing information and educational environment
- We want to develop a diverse staff that is professionally active and engaged and interested in developing new skills to improve our services to faculty and students.
Combined Service Area Progress

The Combined Service Area (CSA) will include the services currently offered at the Circulation, Information Services, and the Special Formats & Maps service desks. The CSA will have a Library Services Desk that will be open 24/5 and a Research Consultation Desk that will be staffed by subject librarians approximately seven hours a day Monday-Friday.

The original goal of opening the CSA by fall semester 2010 has been postponed due to several factors: the absence of support from a campus architect from facilities for an extended time in spring 2010 due to priorities on other campus projects; Facilities recommending the postponement because of the noise / disruption of services caused by construction during fall and or spring semester; and the opportunity to apply for a grant to supplement our existing funding for the project. While the grant request was submitted in late July, we will most likely not know if we will receive funding until December. For these reasons, we have decided to hold off on construction until after spring semester 2011. During this time we will continue refining programmatic aspects of the project including training, staffing, referrals, visitor access policies, etc. We will also have more time for feedback from our users.

Background

The CSA Task Force began meeting in September 2009 and was initially comprised of Bruce Henson and Stella Richardson as Co-chairs and Bob Fox, Roland Garner, and Karen Glover as members. The group identified the need for a neutral facilitator and in October chose the newly hired User Experience Librarian Ameet Doshi to join the group. Bing Wang joined the group in April 2010 after assuming the responsibilities of Assistant Head of Research, Instruction & Outreach Services. Katharine Norris is our liaison with facilities and expert on the Library’s physical systems. A literature review of library combined service desks showed that many libraries implement a combined desk to consolidate service locations but services are usually not integrated at the shared desk. The Task Force agreed that to provide a successful one-stop-shop service point Circulation and Reference services needed to be integrated.

Ameet facilitated several information gathering sessions in October without the Task Force present, and the Task Force then met with staff in several follow-up meetings. From the information gathered the Task Force created a document with minimum levels of service expected at the CSA and two initial work groups were implemented, Operations/Service Model and Layout. The workgroup reports were submitted in early January 2010 and informed our initial discussions with the campus architect. Additional committees were formed in March 2010: Referral Process, Branding & Signage, Training, and Visitor Policy, the latter whose work is still ongoing. Please see appendix for workgroup goals, membership, and reports.

Progress

Reorganization of the Information Services Dept. in April 2010 – although not a direct result of planning for the CSA, the reorganization of the ISD into two departments - the Faculty Engagement Department and Research, Instruction & Outreach Services (RIOS), affected the CSA.
Stakeholder Involvement in Planning Process – In order to achieve buy-in from faculty and staff in the two departments we provided opportunities to participate in discussions and workgroups and give feedback and make recommendations.

Working Together - We realized that most people in both departments had not previously worked together and did not understand the work of the other department. Participating collaboratively in the discussions and workgroups provided opportunities to know each other and to understand more about the other department’s work and culture before working together at the CSA.

Integrated Circulation and Reference Services on 3rd shift – "Beginning fall semester 2009 Circulation and Reference integrated services at the Circulation Desk during 3rd shift hours, from midnight to 7:30AM. This coincided with two of four 3rd shift staff members moving to days, leaving two 3rd shift staff members. After cross-training, Heidi Lowe and Andy Blakely have successfully offered combined Reference/Circulation/Technology during 3rd shift, an experiment that has informed the planning of the CSA.

Training - Based on the training work group's discoveries and recommendations, three training coordinators have been assigned: Karen Glover for circulation training, Cari Lovins for technology training and Bing Wang for reference training. Training structures have been developed and programs have been tested and optimized through the training of Charlie Bennett and Jerrold Mobley for reference functions and Eric Brower and Jerrold Mobley for circulation functions during summer 2010.

Reducing Librarian Hours at the Reference Desk by 33% – So that Reference Librarians can focus more on faculty outreach, their hours were reduced at the Reference Desk in fall 2009 from 6 hours/week to 5 and in fall 2010 from five hours/week to four. Likewise, evening librarian coverage was reduced in fall 2009 from ending at 8PM to 7PM, and in fall 2010 to ending at 6 PM. Weekend librarian coverage was reduced in fall 2009 to six hours per day from eight.

Staffing Recommendations – the Operations / Service Model Workgroup identified the need for four career staff on 2nd shift and three on 3rd shift for the Combined Desk. RIOS has since hired an Information Associate I position for the understaffed 3rd shift.

Staffing Changes – There have been several changes in staff assignments. Charlie Bennett, a Library Associate II joined RIOS after working in Circulation for many years, Library Assistant III Eric Brower has joined Circulation after working in RIOS for many years, and Copy Services Supervisor Richard Holland has moved from Circulation to RIOS, as their talents and work responsibilities are a better fit in their new departments. Two Library Assistant III positions in the former Special Formats & Maps Unit of ISD were eliminated due to a service desk consolidation in the ISD that eliminated the Special Formats & Maps Unit. Two new positions were created in RIOS to meet changing user expectations: an Information Associate I for the 3rd shift at the Combined Service Desk and a Multimedia Instruction Librarian.
Met with Emory Library – in May 2010 the CSA Task Force met with the Emory team charged with implementing a combined service desk to share our goals, project work and ideas.

Staff upgrades – Andy Blakely’s position has been upgraded to an Information Associate I recently to reflect his new responsibilities on the third shift.

Continuing Work

<table>
<thead>
<tr>
<th>Timeline</th>
<th>Task</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall 2010</td>
<td>User Feedback - As noted, the revised construction date will allow for additional user feedback about the “look and feel” of the service desk, as well as an opportunity to gather user opinions about the nature of service they desire from staff. This feedback may be very useful to inform lighting and furnishing decisions that are both visually appealing and functional. An additional technique that would further involve our users and could potentially calibrate the training effort is the use of “design theaters.” These are scenario exercises whereby students are recruited to playact various roles by asking staff a variety of circulation and reference-related questions.</td>
</tr>
<tr>
<td>Fall 2010 - Spring 2011</td>
<td>Team Building – Ameet will offer some teambuilding workshops for Circulation and RIOS staff.</td>
</tr>
<tr>
<td>Fall 2010</td>
<td>Training - Staff will begin shadowing at both the Information Services and Circulation desks.</td>
</tr>
<tr>
<td>Fall 2010 - Spring 2011</td>
<td>Policies - The Taskforce will complete visitor policies, further refine referral policies, and define the policies of the combined services desk.</td>
</tr>
<tr>
<td>Fall 2010</td>
<td>RIOS staff offices – finalize plans for locating on 2 east.</td>
</tr>
<tr>
<td>October 2010</td>
<td>Meet with Emory to discuss our shared plans.</td>
</tr>
<tr>
<td>December 2010</td>
<td>Hear from Gilbert Foundation about pending grant.</td>
</tr>
<tr>
<td>Spring 2011</td>
<td>Finalize Construction Plans – once the grant decision is reached the CSA Taskforce will finalize construction plans including desk design, furniture, flooring, lighting, signage and securing staff offices on 1 and 2 East. The delay and the possibility of additional funds from the grant allow time to consider redesigning the Library entrance, Security Desk, and security gates.</td>
</tr>
<tr>
<td>Spring 2011</td>
<td>ACRL Presentation - by GT and Emory Libraries, “Mashup or Crashup: Collaborating with intra and extra library partners to create a merged library service desk.”</td>

Executive Summary

The New Service Models (NSM) program was launched during the fall of 2007 to address strategic challenges and operational concerns facing the University Library at the University of Illinois at Urbana-Champaign. This report reviews the changes made to Library services during the Program’s first two years and provides an update on current program plans and initiatives.

The NSM program was designed to address the question of how to sustain the Illinois tradition of excellence in Library services while navigating transformations in academic libraries and scholarly communication. Confronted by rapidly escalating economic challenges to our traditional model of departmental library service, as well as by sea changes in the way that scholarly information is created, disseminated, used, and stewarded for the future, the Library undertook a broad and inclusive approach to identifying opportunities for strategic investment in resources, collections, facilities, and information technology, as well as opportunities to engage its users in far-ranging discussions of the future of library services. This report includes a summary of the most significant of these challenges, but more detailed discussions are provided in earlier NSM program reports, available at <http://www.library.illinois.edu/nsm/>.

The NSM program has been carried out using a project-based approach that allows for emergent design of NSM initiatives, as well as for inclusion of Library users from across campus in the planning process. Teams designated to lead the planning and implementation of discrete NSM activities are composed of Library faculty and staff members, as well as faculty from campus programs with identified interests and concerns related to the specific project. NSM teams are charged with communicating and consulting with the broader groups represented by team members. Over the past two years, this approach has allowed not only for direct user involvement in the planning of NSM program activities, but also in an unprecedented number of meetings with faculty groups, library committees, campus academic leadership, and the campus community, at large. Although this report describes the broad approach taken to the design of NSM teams and their ongoing communication and consultation processes, detailed accounts of several of these meetings are available through the NSM program site, available at <http://www.library.illinois.edu/nsm/>.

Several significant changes have resulted thus far from the NSM program, including the transition of the Labor & Industrial Relations Library and the Library & Information Science Library to “embedded librarian” service models, and the integration of the Afro-Americana Library Unit, the City Planning & Landscape Architecture Library, and the Physics & Astronomy Library into complementary service units. Other outcomes include enhancing access to scholarly resources, print and digital, changes to the Library organization of services, and investments in collection management that have resulted in enhanced access to thousands of previously unprocessed materials. Finally, the NSM program has supported the design and development of innovative service programs outlined in the University Library’s Strategic Plan, including the establishment of the Scholarly Commons and a Library-wide approach to health information services. The report includes a description of each of these programs, as well as several others completed to date or planned for FY10.

The report concludes with three appendices: 1) a timeline of major NSM program activities planned for FY10; 2) an overview of tangible costs and benefits associated with discrete NSM program activities; and 3) a summary of changes to the June 4 draft based on review and discussion after its release.
NSM Decision-Making Process (July 2009)

Charge for Planning Team drafted

EC posts charge for comment & then reviews

Planning Team convened to engage campus and Library stakeholders in discussion of substantive issues

Planning Team submits recommendations to the University Librarian (UL).

EC posts recommendations for comment & then reviews

Implementation Team convened

Implementation Team submits plan to the University Librarian.

EC posts recommendations for comment & then reviews

UL and AULs review plan & allocate resources

NSM Coordinator facilitates implementation

Drafted by the Team Leader, NSM Coordinator and/or Administrative Liaison, the charge establishes scope, timeline and deliverables (reports, recommendations, etc.)

The Library Executive Committee (EC) posts charge on EC website at least one week prior to discussion with note to LIBNEWS-L requesting comment. EC reviews charge and may advise the University Librarian approve and/or request revisions.

Teams post meeting notes and reports promptly to the NSM website. Team Leaders chair meetings, direct work of the Team and report on ideas under consideration at NSM stuff sessions and Library Faculty meetings. Administrative liaisons help navigate process, provide feedback regarding feasibility and are equal partners in decision making. All AULs & Team Leaders attend pre-launch meeting.

UL forwards recommendations to EC.

EC posts recommendations on EC website at least one week prior to discussion with note to LIBNEWS-L requesting comment.

EC may advise the University Librarian to approve all or some of the recommendations. Requests for revisions go back to Planning Team.

Drawing some members from the Planning Team, the UL charges a Team to implement recommendations. Scope & timeline are set in consultation with the Associate University Librarians (AULs) and the NSM Coordinator.

UL reviews plan & forwards to EC & AULs

The Library Executive Committee (EC) posts plan on EC website at least one week prior to discussion with note to LIBNEWS-L requesting comment.

UL & AULs review to ensure plan is feasible (e.g., can facilities work be accomplished within allotted time and budget?) in consultation with others in the Library, e.g., groups or individuals responsible for resource oversight: Budget Group (staff), EC (faculty/AP positions), Business Office, NSM Coordinator (NSM funding requests).

Working with the AULs, Library Facilities, Team Leaders, unit heads and other staff, the NSM Coordinator coordinates implementation of the plan.

POTENTIAL ELEMENTS FOR INCLUSION IN PILOT PHASE: ................................... 15
PHASE II .................................................................................................................... 16
VISION FOR THE UNIVERSITY OF KANSAS (KU)

The Learning Studio initiative at KU builds upon the success Anschutz Library already enjoys as the central hub of undergraduate research and learning on the University of Kansas Lawrence campus. The Learning Studio brings together content, technology and student services; librarians, IT professionals and Student Success staff to support students in their learning, writing, research, study skills and use of technology. In addition, the LS enables students to meet with faculty, staff and fellow students in comfortable, flexible spatial configurations for both individual and group study. Students will have the core services to enhance their learning experience in one central place. Nationally, libraries with similar facilities report sustained increases in user requests for assistance in research, writing and technology support.

The Learning Studio encourages engagement with a wide range of information resources and collections, strengthens the ability for collaborative inquiry, creates new opportunities for social and informal learning, and supports students as they adjust to and succeed at the University of Kansas.

The LS is primarily student-centered environment-- supported by pedagogical, technological, and social trends and research -- to fill a void on campus for study space and provide collaboration between students, faculty, librarians and professional staff in support of learning within and beyond the classroom.

Librarians and staff will work with faculty in designing workshops and other programs to enrich specific courses and/or disciplines. Partnerships may range from one-time class presentations to in-depth curriculum planning. Learning Studio specialists will be available to develop and present workshops, handouts and other materials tailored for courses or on any academic topic of benefit to students.

GUIDING PRINCIPLES:

- **Learning oriented**: Support academic engagement through informal learning spaces that are comfortable, open, flexible, and inviting.
- **Learner centered**: Focuses on student needs, preferences and work patterns that removes barriers to learning and facilitates student success.
  - Create zoned neighborhoods for different needs
    - Individual/quiet study spaces
    - Individual and group workstation spaces
    - Group study and presentation spaces
- **Flexible**: Responsive to the changing needs of learners for resources and support in an open, inviting, comfortable setting.
- **Collaborative**: Based on collaboration between or integration of different learning support areas in the university.
4/30/2010

• **Community building:** Provides a social gathering place for students, GTAs, faculty and staff and common point for information, technology and student services.

---

**PRELIMINARY SERVICE PLAN**

**Teaching and Learning: Creating a Cycle of Support**

Centrally located service desks and roving staff will support all stages of the learning process encouraging a vibrant environment where learners easily receive assistance as it is needed. Roving staff will include peer research mentors who can assist users/demonstrate how to get started with research and refer for in-depth assistance as needed.

The Service Desk will be the center of support where information, technology, learning support and research needs will be met by Student Success staff/students, library staff/students, and Information Technology personnel. Examples of interactions with students include:

- Quick information including research assistance, referrals, campus information and technology support.
  - Referral to other library units and campus partners for services not available within the Learning Studio.
  - In-depth consultation.
  - Checking out needed technology (laptops, digital cameras) or research materials.
- Impromptu work with small groups.
- Technical assistance to troubleshoot connectivity, printers, scanners, etc.

Possible programs and services include:

- Formal instruction classes for specific courses conducted by librarians with faculty or GTAs, peer research coaches, KU Writing Center instructors and consultants.
- Formal instruction classes organized by librarians to feature the stages of the research process and the tools for gathering resources on a topic.
- Impromptu classroom sessions for at-risk classes requiring focused help with a particular assignment.
- Impromptu teaching of clusters of students who arrive at the desk and have a common need or goal.
- Drop-in consultation with the KU Writing Center.
- Research peer coaches to provide peer support for learning library resources.
- Group study rooms to foster student collaborative learning.
- Individual instruction and help for students who require unique or specialized consultation and equipment to meet their research needs.
- Classes offered by Information Technology on key issues for students such as getting connected, virus protection, wireless security, and software support.
- Classes and interview consultation offered by the University Career Center.
- Drop-in advising and support (seasonal).
4/30/2010

- Small group tutoring with Academic Achievement and Access Center Tutoring Services.
- KU Info.

Furthermore, the Learning Studio provides a new model for encouraging collaboration between faculty, librarians and student success services. Examples of how this connection can enrich the student learning experience include:

- Course-integrated library instruction and writing skills linked to specific tasks is proven to be the best way to develop information literacy.
- Consultation on assignment design and availability of resources is necessary for large, at-risk introductory courses where hundreds of students compete for resources and services in a fixed time period.
- Workshops taught with teaching assistants provide effective ongoing support for students during their work throughout the year.
- Partnering with faculty to tailor programs for specific courses or disciplines,
- Developing workshops, handouts and other materials and support for in-depth curriculum planning.
- Student research teams offer another support mechanism for group work requiring in-depth investigation.
- Academic success workshops offered by the Academic Achievement and Access Center on study skills, time management, reading and listening, and studying for mid-terms and finals.
DESIGN BRIEF

The space to be re-purposed for the Learning Studio consists of approximately 13,500 square feet on the 3rd floor and 15,600 square feet on 4th floor of Anschutz Library.

The new Learning Studio will have bright, flexible, spaces with “functional neighborhoods” or “zones” organizing activities. To create this effect, the design should use varying floor patterns/materials, furniture layouts, graphics, lighting design, cabinetry, and vegetation to create “neighborhoods” within the larger spaces and subtly influence traffic flow. This will break up the space functionally while keeping it accessible to all.

Information Technology Infrastructure

Even without the “learning Studio” project, substantial infrastructure updating is required for Anschutz Library. These enhancements to wiring and network capacity include upgrades and fiber risers, additional terminal work to support PCI compliance, replacement of old equipment to take advantage of new fiber and rewiring of old jacks. The connectivity between the needs of the Learning Studio project, general need for improvements to the existing facility, and the funding sources, have not been completely determined yet. The estimated cost for related upgrades to wireless availability is included in the Phase I Learning Studio proposal.

Space planning

The interior space must be developed according to the recognized principles and process of facility planning. Fixed construction will be limited as much as possible to provide for configurable staff space and public space. Options for blocking, stacking, and traffic flow are
required for discussion with user groups prior to detailed space planning. Program space allocations should work with the architectural characteristics and structural elements of the building to minimize circulation factors and un-assignable areas. Traffic routes in public areas must have good sight lines for personal safety, be easily understood, and lead users conveniently to the intended destination.

To support functional flexibility of interior space, the use of open office concept is encouraged unless justified by function, maximizing access and orientation to natural light. The heating, ventilation and cooling systems must not be adversely affected by interior separations. Consideration must be given to the height of partitions, the location of private offices and meeting rooms.

When possible, existing and recently purchased systems furniture will be re-used (dismantle, move and reassemble) for this project. The purchase of new furniture, storage units and some systems furniture will be necessary.

Detailed interior coordination in relation to design, finishes and colors of new and existing furniture with the renovated architecture and building finishes is required to achieve a harmonious work environment. Finishes must be sympathetic to the existing architecture and general ambiance of the building. Finishes and colors should be visually pleasing, comfortable, and appropriate for the function and image of a quality innovative facility, require low maintenance, durable and age well over time.

**Barrier-Free Accessibility**
Barrier-free accessibility including but not limited to motorized wheelchairs equipped with ventilating units shall be required for all space related to the project. Accessibility will be in accordance with the Kansas Building Code and KU’s Accessibility Guidelines. Exceptions must have compelling justification.

**Acoustics**
Appropriate acoustic consultation and design is required for all public areas.

**Building Maintenance**
The design and product specification should minimize the ongoing maintenance and operating costs to the University.

**Pervasive Access to power outlets and technology:**
Anschutz Library has raised flooring to allow for diverse option in providing power outlet availability. Additionally, furniture with USB and A/C outlet capabilities is an essential part of the Studio concept.
Central Service Desk (3rd Floor) A major goal of this project is the physical main service zone whose components provide a distinct service point, computers, information resources, and staff always in close proximity to the user. This service desk should be immediately visible to users entering the library and centrally located so that students can see the desk and access the support from any direction. The following services will be located in some form at this desk:

- Research and Instructional Services (Libraries)
- Technology help and support (IT)
- General referral, direction and informational requests (KU Info)

Preferred desk configuration would be oval or circular to maximize user access. A lower, accessible section will also be built into the desk reconfiguration in order to ensure that we can adequately serve all users. The desk should provide at minimum, seating for four simultaneous user interactions at four separate access points, each with dual screen workstations for working together. During peak hours – the desk will be staffed with 3-4 people: library research staff/students, technology students/staff and student success students/staff. During off peak hours, staffing will typically consist of 1-2 individuals. It is likely that during later evening hours, this desk will be closed, with user support coming from the circulation desk.

It is anticipated that during peak hours, this desk will handle anywhere from 15-40 questions per hour in person or by phone. There is a great deal of variance in need. In addition, IM support will most likely occur at this desk as well (although this can be handled from other office locations as well).

Quick consultation spaces should be closely adjacent to the central service desk for staff use. During evening or weekend use these may be opened up for public use as well.

- Consultation/Semi-Private Table Configurations (4): Faculty, staff and trained students will require access to consultation space in which they can meet with individuals and small groups to provide more specialized assistance with research projects and teaching assignments. These consultation enclosures accommodate 2-4 people with table, chairs, PC, dry erase boards.
- Private Consultation room (1):

Research and Instructional Services
Research (Reference) Services is part of the Research and Instructional Services Department. It supports research by assisting with the use of Library resources, licensed electronic databases, and research materials from other sources. Highly trained subject specialists, general reference librarians, and other staff assist with in-person, phone, email, and virtual inquiries.

These services are primarily offered at the central service desk during hours between 9am – 9pm. During peak hours – two research experts (one faculty librarian and one staff member) will be seated at the desk. In-depth consultations off-desk are available by appointment with
all subject specialist librarians. These consultations typically take place in office space across all library locations.

**Librarian and Library Staff office and Work Areas (4th Floor?):**

- Individual office space for 8 librarians and Unclassified Professionals (4th floor?)
- Student work space (2-4) (4th floor?)

**Circulation Desk (3rd Floor):** The circulation desk should be situated near the front entrance to the building, near the security gates for ease of visibility. A lower, accessible section should be included into the desk reconfiguration in order to ensure that we can adequately serve all users. This desk is responsible for circulating a variety of materials including those on reserve, sent over from other campus libraries, ILL materials, laptops, calculators, digital cameras, and those available on Levels 1 and 2 of the building.

Substantial space is required behind the desk – including holding shelves for ILL and reserves, multiple book sorting trucks for returns and 4-5 access services staff/students on during peak times (serving the public and processing materials)

Over the course of several years, it is anticipated that 2-3 self-checkout stations will also be added and located adjacent to the circulation desk, to provide quick assistance as needed.

In addition to the space directly behind the desk, separate “behind the scenes” staff processing space connected to the loading dock area is required. This includes individual cubicle space for 5 FTE and student/staff work room for storage, document creation/scanning, and collaboration and a staff room/kitchen area.

**Lockers (3rd Floor):** Close to circulation/checkout a bank of self-service lockers with electronic locks should be located within close proximity to the circulation desk.

**Writing Center (4th Floor)**

The writing center is a support lab that helps students with writing skills, developing papers, organizing projects, etc. Writers need feedback, sounding boards, and other people to coach and guide them while they compose. The KU Writing Center uses trained peer consultants to help brainstorm, draft or edit writing. Most help is in small groups or one-on-one tutorials.

- Staff: 5 or 6 individual offices (USS and 0.5 UPS could share a space)
- Multiple use open space for project layout, readings and conferencing
- 5-6 consultant/student workspaces with either workstations or docking stations for laptops located along the exterior of the space for one-on-one instruction and consultations
Academic Achievement and Access Center Tutoring Services (4th Floor)
The Academic Achievement and Access Center offers tutoring. Small group tutoring is available on campus for specific courses. The tutors are KU students who have met grade requirements and received recommendations from faculty members. All groups meet two days per week (one-and-one-half hours per session). Students may request a tutor group prior to and during the first 10 weeks of a semester. These groups will provide a learning environment that may be less intimidating for many students than getting assistance in a large lecture setting. Tutor groups function like structured study groups, with the tutor as a peer expert— a student who can empathize with others’ classroom experience. This is a highly interactive learning experience. Tutees will be encouraged to problem-solve and to become self-directed learners.

Many of these tutoring groups meet in various locations and buildings across campus during a variety of times (from early morning to late night). In the Learning Studio, the central office for the program and a small percentage of the tutoring group activities (during peak hours) will occur. Additionally, the potential exists for the development of a new “drop-in” tutoring program during prime times of the semester when students are preparing for mid-terms or final exams.

- Office areas: 2 individual offices for 1 UPS and 1 USS
- Work room with cubicles & workstations for 3-4 PT student program assistants
- Public Areas (adjacent to office space):
  - 12 flexible group table configurations with privacy features - able to accommodate tutor groups (2-5 people per group) with white board divider surfaces and docking stations (Reserved M-Th until 8 pm and open for public use after business hours)
  - 4 small semi-private, low wall rooms each able to accommodate a tutor group (2-5 people) with white boards, docking stations, and overhead projectors or larger, wall mounted LCD (Reserved M-Th until 8 pm - open for public use after business hours above)

Conference Room (4th Floor) (20 people) (open to the public after hours) Shared space between Student Success and the Libraries. High definition video conferencing is available for scheduling, providing visual collaboration across the globe.

Open Group Computing (3rd Floor): provide furniture configurations where students can collaborate on group projects, or practice presentation material. Teams can work together both in open group workstations and additional seating to accommodate a team.
Open Group Study (3rd and 4th Floor): offer flexible work areas to redesign the room on the fly to meet the current user’s needs. In groupings of two or four with easy access to power in various configuration. This can include tablet chairs w/wheels for both individual use and creation of dynamic group environments. The level of flexibility is critical as the potential for providing some elements of privacy.

- Diner style Booths
- Moveable Tables/chairs
  - Both hard and soft surface options

Group Rooms (4th Floor): These group spaces, with partial class enclosures seat 4-6 in a variety of configurations with LCD projection. Innovative software like teamspot is an application that will allow students to bring their laptops and collaborate real-time on a shared space on the LCD panels or dual screens. They can work together on a word document, share websites they have found in their research, and save drawings from a whiteboard they jointly work on.

Individual Workstations (3rd and 4th Floor): The open computer areas on 3rd and 4th floors will house approximately 100 workstations set up in a variety of configurations. The intent is to provide numerous arrangements that support the needs of the students. Computer Arrangements could include:

- Individual stations for pods of two, four, and possibly six station settings.
- Primarily PC workstations with productivity software
- 8 Macintosh workstations with productivity software
- 4 scanning workstations (adobe design premium/Office 2007)
  - Assistive technology and accessible furniture
- 8 express/quick access standup stations (no productivity software)
  - Limited software availability with use of Office readers rather than full software suite
  - Powered tables for Internet access

Individual/quiet Study (4th Floor): A variety of study seating elements, arranged in individual, some in groupings of two or four with easy access to power in various configuration. This can include tablet chairs w/wheels for both individual use and creation of dynamic group environments. The level of flexibility is critical as the potential for providing some elements of privacy. Glass partitioned area

Laptop/Device Charging Area (3rd Floor): Charging area for laptop and handheld technologies (A/C and USB) batteries – “bar style”
4/30/2010

Lounge Study Areas (3rd and 4th Floor)

Café with seating (3rd floor)
Bars, tables and lounge (powered)

Collaborative Learning Center
Seats 50 – arranged in group configurations (possible “cloverleaf” designs) with multiple projects/display options, whiteboard surfaces and moveable instructor/presenter station. Technology might be laptops (stored when not in use) or fixed PC (available to public) – not one per seat (1 per 3 seats??) Created via the use of moveable walls with the ability to open up for general public use. Available for student use when not booked and after hours/weekends.

FACILITIES PREPARATION

- Move appropriate portion of collections and periodicals from 3rd floor and 4th floor Anschutz to 1st Floor Anschutz
  - Dismantle steel shelves and store off-site
- Move approximately 50% of the reference collection from 3rd floor Anschutz into the regular collection
- Relocate the microforms cabinets to 1st floor Anschutz
- Relocate large wooden study tables from 3rd to 4th
- Repair leaks and roof – including damage to the walls
- Window replacement

PILOT PHASE (FALL 2009 – SPRING 2010)

The focus of the first stage is the to provide the space for delivery of the new service models and create a sampling of the various “zones” or space options to be incorporated throughout the learning studio. It serves as a sampler of the principle space/service ideas that are guiding overall development. From this work and subsequent assessment – the scope and structure of the rest of the Studio environment will be determined more completely.

- Working with the Assessment Group and using the initial work from Step 1 with the consultant, begin a process of “design workshops” with students and faculty that will allow of input into the final layout and structure of the project
  - This involvement with our stakeholders will be an ongoing part of the design and implementation process
  - Based on the initial work of the consultant and stakeholder input (on-going) – the Executive Planning Team and program sponsors with proceed with first staging option.

POTENTIAL ELEMENTS FOR INCLUSION IN PILOT PHASE:

- Relocate technology training and library instructional services staff to 3rd floor staff area (after scholar services move to Watson)
- Expand existing food service/café elements
- Removal of current dividing wall between public spaces on 3rd floor
- Begin pull and activation of power and necessary network through raised flooring on 3rd and 4th floor to allow increased access to power and network for study tables, lounge furniture and workstation
- Flooring on 3rd floor Anschutz – carpet replacement (consider more "green" flooring options)
- Initial increase to wireless access (may require substantial re-wiring of building to occur in phase II)
4/30/2010

- Relocate a portion of current individual workstations from 3rd to 4th floor in order to allow space for group rooms on 3rd (repurpose existing furniture from Watson?)
- Dismantle current reference/circulation desk
  - Build new dynamic service desk(s) configuration to provide for a diverse range of services including:
    - Quick reference and directional
    - Circulation of technology and library materials
    - Technology support services
    - Seasonal drop-in advising
    - Tutoring referral (possible drop-in tutoring)
    - Writing and research consultations (quick and in-depth)
  - Semi-private consultation spaces near desk for in-depth assistance (dividers, etc. not fixed construction)
  - ½ height shelving for reference collection
- Two small group study rooms that seat 4-6 (dividers not fixed construction) -4th floor Anschutz
- Two large group study rooms – 4th Floor
- Two group use workstation configurations – 4th floor Anschutz
- Four tutoring spaces – 4th Floor Anschutz
- First phase of relocating Writing Center Staff - might initially consist of using existing spaces and facilities – to be renovated in Phase II.
  - KU Writing Center (use existing 4th floor office space)
    - 5 or 6 individual offices (USS and 0.5 UPS could share a space)
    - 5-6 consultant/student workspaces with either workstations or docking stations for the laptops (current location of Instruction/tech training services)

PHASE II

- Proceed with staging plan outlined by consultant as approved by the Executive Team/Project Sponsors
- Use Stage 1 implementation as a model for capital campaign and donor opportunities
Recommendations of the Information Commons Task Force

February 11, 2008
Summary

The Information Commons Task Force gathered data, talked to individual students, student groups and other stakeholders, convened focus groups and asked for written comments. Based on student input, and our own survey of current Information Commons implementations throughout research libraries, we recommend the following improvements to the Evans and Annex first floors.

- **Re-configure the 1st Floor of Evans Library** by creating a quiet study area in the current reference room. Designate the front reading room as a noise and technology-friendly collaborative space, with a new Help Desk replacing the current reference and LPS desks. Add soft furnishings, paint and lighting designed for comfort and appeal.

- **Establish formal and informal group study spaces in Evans** by converting offices into study rooms, adding booths and alcoves where appropriate and by introducing whiteboards and technology to group spaces. A room dedicated to the practice of presentations is essential.

- **Create a Media Studio** in the space of the former patent library. Hire one FTE to serve as media studio coordinator. Add at least 6 iMacs and 3 PCs, outfitted with appropriate software, and an enclosed podcasting booth.

- **Design a permanent Instructional Classroom for 40-50 students** in the space behind the Annex circulation desk currently occupied by Systems.

- **Expand Poor Yorick’s** in partnership with Dining Services.
Recommendation 1
Reconfigure Evans 1st Floor

A major theme that emerged from student input was the request for more and better-defined quiet space on the first floor of Evans. Although quiet space exists on all floors of the library, many students want quiet space amid the hustle and bustle of the first floor. Students also expressed an interest in better-defined collaborative (non-quiet) space on the first floor.

Currently, the first floor of Evans is divided in two large public areas. The front entrance area is typically regarded as a reading room. Toward the rear of the building is the reference room, with a few dozen computers, photocopiers, and the printer for the first floor public computers as well as the reference collection and reference desk. Most of the offices for staff and librarians are located adjacent to the reference room.

To respond to these needs and allow for both quiet and non-quiet areas the Information Commons Task Force strongly recommends the following:

- **Designate the back area of Evans (current reference room) as quiet study space.** Remove the reference desk and close the doors, in a configuration similar to the quiet study areas of the West Campus Library.

- **Designate the front area of Evans as non-quiet/collaborative study space.** Create a “help” desk in the front section of the first floor, roughly where the public “stand-up” computers are, that combines the current functions of the LPS and reference desk. Current reference staff will take over the “welcome desk” function from Access Services. Tier 1 questions will be handled at this desk and librarians will meet patrons there when referred.
• Move much of the public computing function on the first floor toward the front, away from the reference room, and purchase workstation furniture that encourages collaboration between students.

• Invest in far more soft and comfortable seating to be used in all areas of the 1st floor of Evans and the Annex.
Recommendation 2
Enhance group and collaborative study spaces

Students want more group study options. The current group study rooms are at capacity much of the time. The Information Commons Task Force strongly recommends the development of several group study environments:

- **Study Booths**: As a way to increase group study areas without building more walls, we recommend restaurant-style study booths. This type of design will allow for the creation of small group areas as needed. Booths will include dry erase boards, plugs for laptops, and lamps. Possible areas for implementation include Annex first floor and the front area of Evans.

- **Small Study Alcoves**: Study alcoves for small gatherings will be created using existing wall structures, new movable furniture, more comfortable lounge type furniture, greenery, mid-height shelving, mid-height tables, and other furniture items. Possible areas for implementation include Annex first floor and the front area of Evans.

- **Enclosed Group Study Rooms**: The seven offices at the rear of current reference room will be converted to group-study rooms. This is a low cost way to add group study rooms without construction costs. Librarians will be reassigned to remaining private offices and staff will be reassigned to cubicles that will be constructed in the Evans reference office suite.
Recommendation 3
Create a Presentation Practice Room

Today’s students are often required to do individual and group presentations. However, there are currently no spaces on campus for students to practice these presentations. The Task Force recommends that the current “lecturer office” in CRCP be converted into a presentation practice room. This room, which is 24x12, will be an ideal location and size for students to rehearse presentations, with an option to record their performances. It will also serve as an additional group study room when appropriate.

- Equipment will include a computer, projector, digital document reader, DVD player, Interactive White Board, camera, microphones (portable and desktop) and accompanying presentation software.

- Furniture will include a conference table and chairs so that groups and individuals can gather to practice presentations, speeches, or finalize projects.

Presentation Practice Room, NCSU
Recommendation 4
Create a Media Studio

The Task Force recommends the creation of a Media Studio – a controlled access environment in which students, regardless of major or department, can use creative technology such as video and audio software to create projects, web sites or interactive assignments.

- Convert the former patent library space by installing 6 iMacs and 3 Windows PCs.
- Fund a FTE as media lab coordinator to accomplish the following: 1) offer direct training in using media computers and software, 2) give workshops for the university community in using hardware and software and emerging technologies, 3) facilitate the integration of emerging technologies and their applications with existing library roles.
- Purchase and lend “gadgets” such as digital cameras, video cameras and field recorders for students to use on projects, regardless of major or departmental affiliation.
- Include an enclosed podcast booth as part of the studio.
Recommendation 5
Expand Poor Yorick’s

It is well-established that the coffee shop is of vital importance to student life. Students overwhelmingly requested an expansion of Poor Yorick’s. Given this strong response, several members of the Information Commons Task Force met with Nadeem Siddiqu, Andy Cronk and two associate directors of Dining Services to discuss the role of Poor Yorick’s in the library. As is no surprise, Poor Yorick’s remains one of their top priorities. Dining Services has several different concepts concerning Poor Yorick’s and has asked permission to submit some of these to the library. These submissions, including CAD drawings, are expected very soon.

The Information Commons Task Force recommends the following:

• The libraries and Dining Services should work closely together to expand the coffeehouse-at-the-library concept and develop a practical model of collaboration that works for all stakeholders and constituencies.

• We further recommend that Poor Yorick’s be expanded with either an entrance or a counter with service inside the library.
Recommendation 6
Create a large, flexible Instruction Classroom

Classroom feedback forms indicate that the demand for hands-on library instruction is at an all-time high. As the library continues to purchase electronic resources, it becomes even more critical that we have a facility to teach large groups. Computer classroom availability across campus is highly competitive. Rooms often need to be reserved weeks in advance.

The Task Force recommends the creation of a 40-50 person classroom in Annex 116. This will enable librarians to conduct larger classes with full electronic resources and A/V capability. The availability of this space is the result of the planned relocation of the Digital Initiatives staff.

- Equipment will include a presentation podium with computer, desktop computers, projector, Smart Board Symposium, video camera, audio system, clickers, and classroom management software.

Instruction Classroom, Undergrad Lib, UNC-CH
Additional Considerations

There are many improvements that can be made quickly based on our findings. Movable white boards should be purchased immediately and dispersed throughout the library.

Many students voiced a need for more electrical outlets. Students indicated that they require more places to plug-in their laptops so they can work longer hours in the library. Any redesign must find a way to provide more power for the devices our students need.

Attached to these recommendations are additional space planning solutions brought forward by task force member Pixey Mosley, who also serves on the space planning committee for the libraries. See Addendum.

Although not central to our service concept, plasma-type e-boards, such as those used at NSCU libraries, would be a creative way to emphasize library information and services.

Reference staff must become more proficient with technology. Georgia Tech has managed to increase their proficiency with reference staff in the last few years as they created their information commons, and we could look to them as a model for how to manage this concern during a period of transition.

Depending on the future ownership of library public computers, we envision a role for CIS support staff within the library, preferably based out of the 1st floor Help Desk.
Partners on Campus

The task force recommends collaborating with various partners on campus to provide educational programming for both student and faculty populations. Identified partners include the University Writing Center, Center for Teaching Excellence, Career Center, International Programs Office, English Language Institute, Office of Undergraduate Research and targeted student groups.
Space Planning Team Addendum

Additional Group Study Rooms (Annex): Add 8 small and 1 large group study room in the Annex 5th floor office suite that will follow the same check out/scheduling policies as the other Annex group study rooms. The rooms would be furnished in the same way as the other study rooms.

Resource Requirements: The availability of this space is a result of the planned relocation of the Digital Initiatives staff to the 6th floor of the Annex. Each of the small offices would need to have a table and 4-6 chairs and a computer. There may need to be a partial wall or moveable partitions to help define the current open workspace (3.501A) as a useable “room.” Also, the back door that opens into the stacks space would need to be walled over so that the stacks area could still be closed at midnight to support patron safety/security but to allow 24/5 access to the study rooms. For easier monitoring (again safety and security), the door form the main corridor into the suite of rooms should be removed from its hinges. (This is also consistent with the recent decisions to leave the hallway corridors on the Annex 5th and 6th floors unlocked).

Additional Large Group Study Rooms (Evans): Create 1 or 2 additional large study room in Evans 4th floor utilizing room 410. The rooms will follow the current checkout policies used for 422/424.

Resource Requirements: The availability of this space is a result of the planned relocation of the Digital Initiatives staff. The current square footage of 410 is 370 sq ft. The room could be configured as a single study room for large groups (slightly larger than Annex 403/404) or by adding a wall in the middle and a second door, used as two medium sized study rooms consistent with Evans 422/424. The current solid door would need to be replaced with a windowed one that allowed easier monitoring of the users of the room.

The room/rooms would need to be furnished with tables, chairs, and chalkboards (consistent with 422/424).

Presentation Practice Room (Evans): Create a presentation/interview practice room in Evans 310. This floor is not a group study floor (actually is considered a quiet study area). Establishing a regular group study room on this floor would be inviting noise management problems. However, the walls to 310 are thick and well insulated so an individual speaking should not present a significant problem. The room is spacious (370 sq ft) to set up different style vignette areas for different types of presentation activities. The room could be equipped with a chair and desk configuration, as well as a podium/panel discussion/debate/small audience configuration. It would need to offer projection equipment such as a flat screen TV hooked up to a computer (since the
students could not be relied upon to turn off projection equipment (such as in 204A). We get periodic requests for space to conduct interviews.

Resource Requirements: The availability of this space is a result of the planned relocation of the Digital Initiatives staff. The furniture and A/V equipment requirements are outlined in the proposal. It should probably also include the ability to video record the presentation/interview, for students to be able to review their performance and see where they can improve their communication styles.

**Study Booths (Annex):** Create some additional non-room/small group (2-4 people) study spaces through the use of restaurant style booths in the Annex corridors (along the side that faces the garage).

Action Plan: Implement in Phases...
Phase One...1st Floor Evans

1) Simplify Services
   - Consolidated Service points

2) Redesign Study Spaces
   - Front area...
   - Theme: Cool space for collaborative experiences!
   - Enhanced technological experiences, for example OALs
   - Flexible furnishings for group and individual study
   - Sound level – moderate to noisy
Phase One...1st Floor Evans

2) Redesign Study Spaces (cont'd)

- Back area...
- Theme: Inspirational space for innovative thinking!
- The campus reading room for the 21st century
- Sound level – quiet study
- More group study where possible (formal and informal)
- Study booths, study alcoves, enclosed group study
Phase One...1st Floor Evans

3) More Poor Yorick's

4) Additional Guiding Principles

- More places to plug-in, recharge, and get connected
- Maximize public spaces throughout the 1st floor
Action Plan: Implement in Phases

**Phase Two... Beyond Evans 1st**

1) Large Flexible Instruction Lab
   - Probably on 2nd floor of Evans

2) EdMS Expansion
   - Media lab!
   - Presentation room/s
   - Relocation?
Phase Three...

We’re still thinking of possibilities! re-Imagine with us as we move along!
movement and space

- Theses & Dissertations—move to one archival copy, digitize the rest, relocate and consolidate archival copies
- Government Docs (Y1s & Y4s)
- Reference Collection—condensed and relocated
- Remote Storage Facilities

Timeline for other moves...
What’s In It for Us?

An opportunity to re-imagine user experiences!

- We are all on-stage when we enter the library!
- Each of us has a role in improving user experiences
- Each of us has a unique perspective on user experiences based on our own personal interactions with patrons – let’s share ideas!
Service Change Announcements
Message from the University Librarian about the SEL Chemistry closure

From the UCLA University Librarian Gary Strong:

"New Locations of Science and Engineering Library/Chemistry Collection

Since the Science and Engineering Library (SEL)/Chemistry closed on June 30, 2010, its chemistry and physics collections have been relocated to keep them accessible to users. Their new locations are as follows:

Reference materials: SEL/Engineering and [...]"

By choffner | January 25th, 2011 | Category: SEL/Chemistry Closure, Spaces & Places | Leave a comment

SEL/Chemistry update: New Collection Locations

The Science and Engineering Library/Chemistry Collection is now housed primarily in the Louise M. Darling Biomedical Library. The UCLA Library Catalog shows the new locations of all Chemistry Collection materials. Books and journals will be at the Biomedical Library, while most reference books will be at the SEL/Engineering and Mathematical Sciences Collection.

By tjaponte | January 5th, 2011 | Category: SEL/Chemistry Closure, Spaces & Places | Leave a comment

SEL/Chemistry update: New locations for Chemistry materials

SEL/Chemistry is on the move! Library staff have begun relocating materials previously housed in SEL/4238 Young Hall. To locate specific chemistry items, search the UCLA Library Catalog.

Books have been temporarily moved to the new Chemistry Book Section of the Biomedical Library.

Example catalog [...]"

Welcome back to another semester... and another view of KSL, as we change some things to make spaces work better for you! Gone are the high carrels on the main floor—now you have expansive views all the way to the windows. Here's a few more "new" spaces:

- Relax in the new casual reading area, next to the Cafe that is developing.
- Research & Reference staff are now at the Main Service Desk, convenient to other things you do there.
- High carrels on the 2nd floor are gone, opening up the view and study spaces.

Come in and see the new KSL spaces that are great places to read, work, study, relax & gather!

Posted by Karen Oye on January 21, 2011 05:12 PM

Comments

I am very disappointed about the new layout. I feel that the cafe will only create more distracting noise in a building that in my opinion is already too noisy. I don't know when library etiquette changed but it is very frustrating to study in a library full of chattering students and staff. Private study rooms would be much appreciated and/or carrels for graduate students would be much appreciated, as humanities graduate students do not have offices or graduate lounges that are available 24/7. Also I am confused as to why the book return was moved further away from the door. I don't have much time to spare between running to classes and now I have to walk all the way around the lobby to return books; it is just inconvenient.

Introducing **UCit@Langsam**

a 24/7 Computer and Study Space

UC students who are looking for a place to use a powerful computer equipped with the latest software, print papers at 2am, meet with a project group, or study quietly have a new space to do just that—UCit@Langsam, a 24/7 computer and study space located on the 5th floor of Langsam Library. With seating for 219 people, UCit@Langsam offers services students have requested in surveys and in conversation with library and IT staff.

"A 21st-century learning environment requires connectivity to the Internet and its resources, including other learners," said University Vice President & CIO Fred Siff. "This modern amalgam of the computer lab and the library study space provides that, in a warm, inviting, and comfortable environment, available to students 24/7."

For computer users, 60 Windows PCs and 40 Macintosh computers, all with network access and the university standard software, are available. For those bringing in their own laptops, wireless access is found throughout the facility. Lab consultants are on site in UCit@Langsam to answer questions.

For students seeking a place to work, a large Quiet Study Room provides a comfortable space for individual study. In addition, four Group Study Rooms, two with SMART Boards, are available for those working on group projects and can be reserved in advance for up to three-hour sessions.

"Working together, University Libraries and UCit have created an exciting and inviting 21st-century learning environment," said Dean and University Librarian Victoria A. Montavon. "The space is comfortable, flexible, and fully equipped to meet student needs."

During Langsam Library’s regular operating hours, students enter UCit@Langsam via the 4th floor main library entrance, and proceed to the 5th floor. After the library closes, UC students must enter the facility via the 5th floor Langsam Lobby entrance by swiping their valid UC IDs. A security officer is on site when the library is closed and, upon request, will walk users to their cars in the Woodside (Langsam Library) Garage every hour at the top of the hour.

Outside UCit@Langsam, the 5th floor lobby now includes colorful picnic tables, inviting users to study there, perhaps while enjoying snacks from the new vending machines that have been added to the lobby.

UCit@Langsam is a collaborative initiative of University Libraries and UCit with support from Senior Vice President for Academic Affairs and Provost Anthony J. Perzigian and funding from UC Student Government (a $5,000 gift) and a UC|21 grant ($40,000). For more information about UCit@Langsam, visit <www.uc.edu/ucitatlangsam>.
Library service desk, stacks get makeover

The Woodruff Library’s new Library Service Desk, expected to open the week of Aug. 16, will combine Circulation, Reference and Learning Commons desks on the main floor. There will be two self-checkouts and a separate consultation area for complex questions from patrons. (Reserves and laptop checkout moved to the Music and Media Library on lobby level 4.)

“We’re hoping to get a fuller picture of faculty and student needs,” says Frances Maloy, services division leader.

Stack Tower Project
The Stack Tower Project will store some 200,000 items, freeing up level 9 for the Manuscript, Archives, and Rare Book Library.

The stack tower will remain open, and collections on all floors will be accessible.

Visit the Stack Tower Project on the Emory Libraries website for updates.
Maps, Media, Microforms & Reserve have merged

Over the summer, two previously separate collections in the Parks Library--Maps and Microforms--were merged with the existing Reserve & Media collections to form a unified "Media Center" with a single service desk. The Media Center is housed on the lower level of Parks Library, in space formerly occupied by Reserve & Media Services. Commencing August 25, 2008, the new Media Center offers expanded hours and improved public access to maps, microforms, audio-visual media (CDs, DVDs, VHS tapes, etc.) and "hard-copy" course reserve material (books and other physical formats).

The vast majority of course reserve material is available online, via the e-Library. The small "hard copy" reserve collection maintained in the Media Center represents items (such as entire books, DVDs, etc.) that cannot be digitized. Please also note that the staff who process Course Reserve lists are no longer housed in the Media Center. Instead, they are now part of the Instruction Department, with offices in the area formerly occupied by the Microforms Center (Floor 1, Room 140). Please see the related announcement, New home Library 160 & Reserve Processing.

The most efficient way for instructors to submit a new or revised Reserve List is to use the online submission form available in the e-Library. Printed submission forms and/or physical items to be placed on reserve can also be dropped off either in the Instruction Department (Monday-Friday, 8:00-5:00) or the Media Center (more expanded hours). However, if you wish to consult with Reserve Processing staff, please do so by email (ereserve@iastate.edu), by phone (515-294-4958), or by visiting their offices in the Instruction Department (Floor 1, Room 140).

Questions or comments about the overall merger of these services points or related issues can be directed to David Gregory, Associate Dean for Research & Access, 515-294-0447, dgregory@iastate.edu.
Physical Sciences Reading Room to close

09-Dec-2009

As part of a campus planning initiative to make more effective use of limited university resources, including space on central campus, the ISU Library will close the Physical Sciences Reading Room (PSRR) at the end of fall semester. The PSRR is located in 208 Office and Laboratory (O&L) Building. The unit's last day of operation will be Friday, December 18, 2009. After that date, PSRR collections will be integrated with the collections of Parks Library, and all associated services will be provided by Parks Library staff.

The most heavily-used PSRR collections, including currently received journals and popular journal backfiles, will be integrated as quickly as possible into corresponding collections in the Parks Library. Less heavily used items will need to be stored indefinitely in a closed stack until space can be made available in the Parks Library. At all times, the Library’s online catalog will accurately reflect a title's current location/availability. Items in temporary storage will be retrieved by library staff.

Heather Lewin (hslewin@iastate.edu; 294-1004) and Steve McMinn (hsmcminn@iastate.edu, 294-4789), from the Library’s Science & Technology Department, will continue to serve as the subject librarians for chemistry (Lewin), physics, and Materials Science & Engineering (McMinn). Questions or comments regarding collections in these areas, as well as requests for consultation or instructional services, should continue to be directed to these two subject librarians. Questions of a more general nature regarding library public services or the closing of PSRR can be directed to David Gregory, Associate Dean for Research & Access (dgregory@iastate.edu; 294-0447).
Science Libraries Relocations in Summer 2011

Some science libraries and services will be relocated on the UNC campus during the summer of 2011.

The moves are a response to the serious budget situation confronting the Library and the campus. They also reflect efforts to economize while still preserving priorities conveyed by faculty and students through surveys, focus groups, interviews, and discussions during the spring semester.

“We heard repeatedly about the need to acquire digital content, while also ensuring that print collections would be as available as possible for in-person browsing,” said University Librarian Sarah Michalak. “Also, that if we needed to move collections, we should do our best to keep science materials together.”

As a result of these conversations, the Library has planned the following:

- The collections of the Brauer Math/Physics Library and the Geological Sciences Library will relocate to expanded browseable stacks in Wilson Library. Materials will be consolidated with the biology and chemistry collections already in Wilson Library, providing the opportunity for interdisciplinary browsing. The science collections are accessible from the South Road entrance to Wilson Library, opposite the Bell Tower.

- Hours for the science collections in Wilson Library will be: Mon.-Thurs., 8 a.m. – 8 p.m.; Fri., 8 a.m. – 5 p.m.; Sat. 9 a.m. – 1 p.m.; Sun. 1-6 p.m. This represents an increase in staffed hours over any of the current science libraries, gained from efficiencies in staffing only a single browsing point.

- The campus delivery (Carolina BLU) program will deliver books to faculty campus boxes, and to the library of choice for students. High-impact undergraduate science collections will remain in the Undergraduate Library, which also provides reserves services in all disciplines.

- The science librarians will have home offices in the newly opened Kenan Science Library in Venable Hall. They will continue to serve the departments in their areas of expertise with consultations, instruction, collection development, and customized services for the departments they work with.

- The Library has purchased expanded backfiles of 42 e-journals in physics and the physical sciences from the American Institute of Physics (AIP), the Institute of Physics (IOP), National Research Council (Canada), and Elsevier.

Relocation of and access to science collections in Wilson Library will not be affected by the recently announced installation of sprinklers in the Wilson Library special collections stacks during 2011-12.

For more information about science libraries on the UNC campus, contact Carol Hunter, Associate University Librarian for Collections and Services: (919) 962-1301, chunter@email.unc.edu.
Wilson Library Reading Room Update

The opening of a new Reference Center and consolidated reading room in the Wilson Special Collections Library will not take place in March, 2011, as previously announced.

Library administrators have determined the need for additional study of student and faculty use patterns and broad solicitation of input in order to guide future development of Wilson Library services.

The search room on the fourth floor of Wilson Library will continue to provide accessMondays through Fridays for the Southern Historical Collection, Southern Folklife Collection, and University Archives and Records Management Services. The reading room on the second floor of Wilson Library will continue to be used for those collections on weekends, and at all times for the North Carolina Collection and Rare Book Collection.

For information about Wilson Library and its collections and services, please contact the Library staff.
Evans Library Reopens Renovated First Floor

"We've redesigned our space to ensure that teaching, learning and research take place in a stimulating, comfortable environment that offers the latest in information technology along with the amenities of a Starbucks," explained Colleen Cook, dean of the University Libraries. "Students and their parents support the library through user fees, and we want to have the best resources available, even in difficult times," she added.

The ever popular, but overcrowded Poor Yorick's coffee shop has expanded seating from 16 to 85 with direct entry into the Evans Library. New tables, benches, booths and chairs offer a more relaxed ambiance for individuals and groups. The renovation brings 12 new group study rooms with erasable whiteboard walls for brainstorming and conceptualizing projects in writing and diagrams.

A favorite study lounge and relaxation spot, sponsored by the Aggie Moms, has been made larger and refurbished with colorful, comfy furnishings. New accessories, furnishings and technology were funded by the Federation of Texas A&M University Mothers' Clubs Library Endowment.

A warm, earthy color palette throughout offers a calming effect in this high traffic crossroads where library services and serious study intersect. The use of plants, natural light and soft furnishings also add to the ambiance and comfort of the space. Users of laptops, cell phones and other electronic devices will find more electric outlets for convenient operation and recharging.

A new all-in-one service desk will offer a personalized experience for users seeking assistance. Unique consultation areas nearby will provide users with a focused service by library professionals with expertise in subject areas from art to zoology.

Rubber floors will help control noise levels and provide comfort to sore feet. Two large monitors display student-focused information such as hours and announcements.

"We're very excited about the makeover of this space and the innovative features," commented Dennis Clark, head of Public and Research Services. "The response from students in the first days of classes has been overwhelmingly positive."
Reimagine the Library

You asked for it, we did it! Based on students’ feedback, the Sterling C. Evans Library underwent renovations this summer. As you begin the new semester, you’ll notice the first floor of Evans has received a makeover. Enjoy this new space and consider it yours!

So, What’s New:
- New earthy color palette - no white walls
- More electric outlets
- More computers
- Wireless access
- Quiet AND loud zones
- All-in-one information desk
- Consultation area with expert help in subjects ranging from art to zoology
- More natural light
- New comfy furniture
- Rubber floors for noise reduction
- Whiteboards - write on!
- Large digital displays for announcements
- A living room feel and room to stretch out in the Reading Room
- More outdoor seating, tables and desks
- Plants
- Recycling time
- More group study rooms
- Enlarged lounge with new furniture sponsored by the Apple Store
- Kilowatt
- Functional furniture - tastered chairs
- Fun furniture - human chairs

The UW Libraries Research Commons is meeting a new set of student and faculty needs that are emerging with the growth of data-driven research, digital scholarship and interdisciplinary studies. The space provides a collaborative environment in which students and faculty can come together to share and discuss research, as well as get support for all steps of the research process: searching, writing, publishing, and funding. The Research Commons is a place to collaborate and connect with fellow students and faculty on research projects. It is a place for workshop and presentation opportunities, and a place to discover what peers and colleagues are researching.

QUICK FACTS

SIZE
The Research Commons is 15,524 square feet (entire Ground floor of Allen South Library).

RENOVATION COST
$360,260 (see below)

SEATS
201 Total: 164 work seats, 25 computer seats, 3 booths. Max Occupancy: 267

ARCHITECT

RENOVATION
July - October 2010

STAFFING
The Research Commons Help Desk is staffed Mon-Thurs 7:30am-10pm, Fri 7:30am-6pm, Sat 1-5pm, Sun 1-10pm.

FEATURES
Walltalkers whiteboard walls; Steelcase furniture: whiteboard tables, mobile chairs and Media:scape; Collaboration screens; open Presentation Place

FUNDING SOURCES

Capital Projects funding from the Office of the Provost: $300,000 (Design, Construction and Furnishings)
In-kind from UW IT: ~$15,000 (Data and Wireless Upgrades)
Allen Endowment Grant: $11,440 (Furnishings and Equipment)
Student Technology Fee Grants: $28,820.86 (Computers, Plasma Screens, Additional Technology)
Friends of the UW Libraries: $4,480 (Information School Graduate Student Assistant)
Private Gift from Wayne and Anne Gittinger: $5,000 (Furnishings)
In-kind from UW Libraries (Facilities Management, Program Support, Furnishings, Ongoing Staffing)

VISION

FOSTER INTERDISCIPLINARY CONVERSATIONS AND COLLABORATION

HUB OF SUPPORT FOR EACH STEP OF RESEARCH PROCESS

EXPERIMENTAL, CREATIVE, PARTICIPATORY SPACE
