**University of Arizona Information Commons Software – Assistive Technology**

http://www.library.arizona.edu/ic/ic-atech.html
The ADA Services' staff and facilities on the Tempe campus are available to assist individuals with disabilities in accessing library materials and information. Our services are for ASU students, faculty, and staff who self-identify as having a disability. While members of the community with disabilities are welcome to do library research with our staff's assistance, ASU affiliates will be given precedence. Our services include:

- Orientation to the library and its materials
- Instruction on accessing and searching the Library Catalog, Online Databases, and the Internet
- Assistance with using various MS Office Applications
- Assistance with library research skills
- Book retrieval and assistance with photocopying and printing during staffed hours
- Training on our adaptive equipment and technology

Location

The ADA Services room is a comfortable, user-friendly area with 9 workstations equipped with a wide selection of adaptive technology. Map (link to Hayden map)

Hours

ADA Services facilities are open during all Library Hours (link to Hayden). Staff available during these hours (link to desk and chat). If individual assistance is needed, we encourage making an appointment to ensure our availability. Please call 480-965-0573 to schedule your appointment.

Equipment

Adaptive technology available:

Blind or low vision:
- Braille Embosser
- Large Print Keyboard
- Duxbury Braille Translator
- JAWS Screen
- Magic OpenBook
- JAWS Braille Viewer

Other physical impairments:
- BigKeys Keyboard
- Micro Mini Keyboard
- Maxim Adjustable Keyboard
- VersaPoint Wireless Keyboard
Smart Cat Touchpad Mouse
Pro Trackball Mouse
Roller Plus Joystick
Trackman Live! Wireless Mouse
Tracker 2000
Jelly Bean Switches
Softype On-screen Keyboard

Learning Disability:
Kurzweil 3000
Scan and Read Pro

Other technology:
Adjustable-height tables
Headphones
Adjustable lighting
CCTV
Scanners
Microform Scanner
TTY
Omnipage
E-Text Reader
Text to Audio
Inspiration 8

UNIVERSITY OF CALGARY
Adaptive Technologies
http://library.ucalgary.ca/home/service-points/information-commons/services/adaptive-technologies

Adaptive Technologies

Services for Persons with Disabilities

For physical assistance with research work, volunteers/aides are available through the Disability Resource Centre (403) 220-6920.

MacKinnon (Main) Library

- Please contact Leslie Potter, liaison person for the disabled, at the Information Commons (2nd Floor Library Block) for any assistance or information you may need. 220-3446 ljpott3@ucalgary.ca
- For more available services, please visit http://library.ucalgary.ca/information-commons/services/

Adaptive Technologies:

- Students registered with the Disability Resource Centre can book the adaptive workroom in the Information Commons. Bookings can be made:
  - In person at the Information Commons Service Desk (2nd Floor Library Block)
  - By phone or email to Leslie Potter 220-3446 ljpott3@ucalgary.ca

- The adaptive workroom has a PC with the following specifications:
  - IBM Net-Vista
  - Pentium 4 Processor, speed 1.8 GHz
  - Hard Drive size: 40G
  - Memory: 256 RAM
  - Epson Perfection 2580 Photo Scanner
  - Inspiration v.7.5
  - TextHelp Read&Write v.7.0
  - ZoomText Xtra v.7.0

- Retrieval of Materials:
  - Library staff will gather materials and leave them at the Circulation Desk (Main Floor Library Tower) for pickup. Turnaround time is usually 24 hours (Monday-Friday). Please ask for assistance at the Information Commons Service Desk (2nd Floor Library Block).
Equipment
The LAS computer lab has a range of specialized equipment including:

- 7 computers on adjustable-height worktables, equipped with scanners and a full range of conventional and assistive software.
- A high-speed scanner.
- A printing station.
- A colour, closed-circuit television with a 17-inch monitor.
- A Braille embosser that can create tactile images.
- One desk-mounted, and one portable, illuminated magnifying glass.

Adaptive Software
The following adaptive software is installed on the lab's computers:

- Kurzweil 1000 and 3000
  Programs that scan and read text for people with visual impairments and learning disabilities.
- Dragon Naturally Speaking, Preferred
  A program which enables you to create written documents using dictation.
- TextHELP! Read & Write
  A support program for people who experience difficulty reading, spelling and writing.
- Inspiration
  A visual thinking program that enables you to brainstorm, and organize your written work.
- Zoomtext Extra!
  A screen magnifying and reading program.
- Jaws
  A screen reading program that operates in all Windows applications.

The following adaptive software is available for loan at the Library Circulation Information desk:

- Kurzweil 3000 Version 11 In USB Key Format
  3 fully authorized, complete versions of Kurzweil 3000 on Flash USB drives
  Please note - currently these drives only work on computers running Windows XP or Vista.

**Assistive Technology Center**

**Welcome!**

The Assistive Technology Center, also known as the ATC, at the Main Library has been established to provide assistive and adaptive technology designed to provide patrons with various disabilities access to the library and its resources. This Center is maintained by Denise Forro and other library support staff to provide advice and technical support for the resources located in the room.

Denise Forro, Librarian and Coordinator

**Hours of Operation**

The Assistive Technology Center is available the same hours that the Main Library building is open. If the room is locked, please ask at the Circulation Desk for it to be unlocked. Personal assistance is available from the Reference Desk staff after 10:00 am Monday through Friday and limited hours on weekends and breaks.

**Location**

The ATC is located in room W124 on the first floor of the Main Library. The room is near the Red Cedar entrance, which is ramp accessible and has power assisted doors.

**Contacts**

To schedule appointments for assistance or for more information on the Assistive Technology Center, contact Denise Forro at 517.884.6458 or email forro@msu.edu.
Room Layout

This page will give you an overview of the different workstations in the Assistive Technology Center, the software installed on each machine and the location of other useful equipment in the room for our patrons.

The Assistive Technology Center is accessed from the concourse in the Main Library from either the Beaumont Tower entrance to the North, or from the Red Cedar entrance to the South of the room.
Software in the ATC

The Assistive Technology Center, also known as the ATC, at the Main Library has been established to provide assistive and adaptive technology designed to provide patrons with various disabilities access to the library and its resources. This Center is maintained by Denise Forre, and other library support staff to provide advice and technical support for the resources located in the room.

Public Workstation Software (1 computer)

The software on this workstation is designed to provide our community users access to Federal documents and materials currently available in the MSU Libraries on our Selected Electronic Resource computers. This computer contains a screen reader with magnifying capabilities.

Adaptive Technology Lab Equipment

JAWS For Windows (JFW) by Freedom Scientific, Inc.
Synthesized speech technology that makes it possible for a Windows based computer to speak the information being displayed on the monitor. Key combinations provide access to reading, navigational and system controls for individuals with visual, learning and other impairments.

ZoomText Xtra by Al Squared
Screen magnification application for use on Windows based computers. Information can also be spoken by the computer using the application's built-in synthesized speech technology.

SmartView Color CCTV by PulseData International
Close-circuit monitor and camera system provides access to print and other materials by increasing their size, contrast and brightness. Built-in controls are available for image size, focus and a variety of both black/white and color video modes. The SmartView can divide the screen to display both material placed under the camera and computer generated output on the monitor simultaneously.

BrailleWindow by Humanware, Inc.
Forty-five eight-dot cell refreshable Braille display allows tactile reading of text presented on the computer monitor. Multiple built-in controls are available for screen navigation and other functions.

Juliet Braille Embosser by Enabling Technologies Company
Braille printer that produces double-sided (interpoint) Braille documents. Output is 11” (H) X 11.25” (W) pages with 25 lines of 40 characters each per side.

Duxbury Braille Translator for Windows by Duxbury Systems, Inc.
Windows application used for creating, editing and producing Braille documents. Text in a variety of standard file types (e.g., .TXT, .WRI and .DOC) can be imported and converted to Braille.

NaturallySpeaking by Nuance Communications, Inc.
Speech recognition technologies that make it possible to control a computer and enter data without touching the keyboard or the mouse. A person who is unable to use their hands or who must limit their use can move cursors and pointers, perform keystrokes, carry-out system functions and create documents using only their voice.

WRIST WIZARD by R&H TECHNOLOGIES
The Wrist Wizard provides total support to the arms, wrists and palms. Vertical and lateral wrist motion is stabilized, while allowing fingers to move freely. The system holds the wrist rigid and allows the forearms to move effortlessly in any horizontal direction.
HELPs RELIEVE:

- CARPAL TUNNEL
- NECK PAIN
- BACK PAIN
- WRIST PAIN

Microsoft Natural Keyboards by Microsoft, Inc.
Microsoft Natural Keyboards are the result of extensive ergonomic and usability research. Their split, gently sloped shape encourages natural hand, wrist and forearm positioning. A built-in palm rest provides a comfortable place for hands when not typing.

Trackballs by Kensington Technology Group
Trackballs encourage natural hand positioning and reduce arm, shoulder and wrist
movement. A top-mounted ball allows easy fingertip or mouth-pointer control and precision pointing. Their symmetrical design fits both left- and right-handed users and all hand sizes. Some models offer custom programmable buttons, which can automate repetitive tasks or enable mouth-pointer users to perform drag-n-drop functions. Some models also offer scroll wheels for speeding through long documents and web pages.

**Kurzweil 1000 by Kurzweil Educational Systems, Inc.**
An advanced reading tool for people who are blind or severely visually impaired.
Kurzweil 1000 works on a personal computer in conjunction with a flatbed scanner and synthetic speech to convert printed text into speech.

**Kurzweil 3000 by Kurzweil Educational Systems, Inc.**
Reads scanned or electronic text aloud using human sounding synthetic speech. Words are highlighted as they are spoken. This auditory and visual presentation of information helps increase reading accuracy, speed and comprehension for struggling readers.

**OmniPage Pro by Nuance Communications, Inc.**
Scanning application used to acquire and process digital images of print materials. Optical Character Recognition (OCR) processing can convert graphical characters into text, which may then be read using synthesized speech technology.
Adaptive Technology Lab

Computers in the Adaptive Technology Lab

Location
Main Library, Lower Level, Room 517G

Number of Computers
One (1) Windows Vista

Hours of Operation
Call the AV Services for Students with Disabilities office at 630-465-6500

Printing Availability
One (1) Brother Printer

Other Hardware
- Touchpad
- Scanner
- Closed-circuit TV for magnification of text

PC Software
Operating System
- Windows Vista

Software
- Microsoft 2000 version 8 Scan and Read (students can scan their texts and have the Kurzweil read texts in three while taking notes and highlighting these texts online)
- Dragon Naturally Speaking version 6 (voice-to-speech software that allows students to dictate their papers)
- Notepad (allows students to type easily)
- Java (enables everything on the computer screen)
- DubStation (subtitles for student translation software necessary for Braille printing)

Adaptive Equipment Room

Adaptive Equipment room is maintained by G. Lyn Shostak and is located on the second floor in the Learning Commons. Staff are available to assist persons with mobility needs or those in need of study or learning aids. This room is accessible via the Reference Desk. The hours for the Learning Commons are open 24 hours a day, with extended hours on weekends and holidays. If you have any questions or need assistance, please call the Reference Desk at 740-593-2699. Additional assistance can be obtained by calling the Reference Desk.

Disability Services

Assistive Technology

In addition to our other services offered, the Office of Library Services for Persons with Disabilities also provides a large number of assistive technology devices for use by our patrons. We also provide training and support during office hours, M-F 8:00-4:30.

Hardware
Software
Other Devices

Hardware

- Assistive Learning Devices (ALDs): Transmitter/receiver that assists persons with hearing impairments
- Braille Printer: Prints Braille material from a computer
- Headphones: Used with programs (e.g. screen readers) and devices that read material to a student with visual impairments
- Large Monitors: Facilitates computer use by individuals with visual impairments by allowing for more continuous display of magnified material without excess scrolling.
- Scanners: Computer peripheral used to create digital images of print materials to be processed by the computer. The image is manipulated so that individuals with disabilities can access it.

Software

Dragon Naturally Speaking

Software program that uses voice recognition technologies allowing users with visual impairments and mobility to control a computer and enter data without touching the keyboard or the mouse.
Typing is the main function, but the user can also perform some formatting and control certain aspects of the computer.
Duxberry Braille

Windows application used for creating, editing and producing Braille documents
Text can be imported and converted to Braille from a variety of standard file types (e.g., .TXT, .WRI and .DOC)

Inspiration Pro

Software program acting as a visual learning tool that assists individuals with learning disabilities
Helps to develop ideas and organize the thought process

Jaws

Software program that uses synthesized speech technology to speak the information being displayed on a computer monitor for individuals with visual, learning, and other impairments
Allows a visually impaired user to navigate a graphical interface using voice output and sound cues
Can understand HTML tags and read the information correctly
Combines Web reading and browsing.

Kurzweil 3000

Aids individuals with visual, learning, reading disabilities by reading scanned or electronic text aloud using human sounding synthetic speech
Users see the printed material on the screen and hear the text.
Omni Page

Scanning application used to acquire and process digital images of print materials
Uses Optical Character Recognition (OCR) processing to convert graphical characters into text
The text may then be read using synthesized speech technology

Read and Write

Screen reader application that helps people with disabilities such as dyslexia
Integrates with almost all windows applications

ZoomText

Screen magnification application for use on Windows based computers
Can also read text aloud with integration of other products

Other Devices

Adjustable Desks

Allow for wheelchair access and accommodation of people with back problems by using electrically adjustable height work surfaces
Workstations are usually oversized for easier access

**Audio/Tape Player**
Allow for the taping of lectures and also materials be read out loud

**Braille**
A typewriter with Braille keys

**CCTV**
Close-circuit monitor and camera system provides access to print and other materials by increasing their size, contrast (viewing dark type on a light background or light type on a dark background), brightness, and focus
Built-in controls are available for image size, focus and a variety of both black/white and color video modes
Helpful for people with visual impairments
Users can change print contrast

**Speech Calculator**
A talking calculator for individuals who are blind or have visual impairments

**Tactile Image Enhancer**
Takes a hand-drawn or printed picture from a computer and raises the lines to create a tactile image
Benefits people who are blind or have other visual impairments

**Wheelchair**
For use by individuals who have a hard time moving through the library

Are there any other assistive technology devices that you are interested in? Or do you have any questions? If so, please contact our department.

Disability Support Services

Southern Illinois University Carbondale

Disability Support Services (DSS)

SIUC DSS is the central office for services to students with disabilities. Support services are offered to a wide range of individuals including those with mobility, sight, and hearing impairments, deaf or hard-of-hearing, learning disabilities, and other impairments. Prospective or newly admitted students should contact SIUC DSS at 453-5738 for further information.

The Library offers the following services to disabled patrons:

§ Retrieval and help with photocopying of materials in the Library

§ Research assistance

§ Assistive technology in the DSS Room

Disability Support Services (DSS) Room

Assistive technology for disabled patrons is located in the DSS Room (Room 103M) on the 1st floor of Morris Library. It has the following equipment:

Hardware

- Two Pentium Dual-core 2.66GHz computers
- Two Dell 22 in. wide screen monitors
- Two sound cards with speakers
- One laser printer
- One Stylus printer
- One flat bed scanner
- One Reader-Scanner
- One Braille
- One headset microphone (checkout at the Reserve Desk)
- One cassette player
- One CCTV

We're Here to Help!

Ask a Librarian

Contact Info:
Send Email

Links:
Website / Blog
Profs & Guides
Software

First computer, specialty software:
- Connect:OutLook Version 2.0
- HP Scan Wizard
- IBM Via Voice TTS Runtime
- Jaws Version 10.0
- OpenBook Version 7.0
- Via Voice OutLook Version 4.0
- WinErase Version 3.13
- ZoomText 9.1

Second computer, specialty software:
- Dragon Naturally Speaking 10.0

Both computers:
- Ad-Aware Version 6.0
- Adobe Reader Version 9.0
- Microsoft Office XP Professional
- McAfee Enterprise Edition 8.5

Overview of Assistive Technology Software:
Ad-Aware - a tool that allows System Administrators to remove spyware from the computers to protect the privacy of the users
Adobe Reader - allows users to open Adobe Acrobat files that are attachment in an e-mail and that are used in web pages
Arkenstone OPENBook - allows computer users to read, edit and manage scanned images from printed documents
Dragon Naturally Speaking - voice recognition software that receives input from a microphone and translates it into text, when you say "Hello," it types "5-6-1-1-5-0-6"
HP scan Wizard - HP scanning software allows users to scan images onto the computer
IBM Via Voice TTS Runtime - a module that allows OpenBook to read documents that are scanned onto the computer
JAWS for Windows - recognizes information laid on the screen and reads it aloud to the computer user
McAfee Enterprise Edition - an antivirus that protects the users and computers from viruses
MS Office XP Professional - allows user to create, manipulate, and view documents, spreadsheets, power point presentations, databases, and front page web development
WinErase - a driver that allows printing to a Braille printer

Patrons who need in-depth training in using the software should contact the SIUC DSS office. If DSS is unable to provide them with training, Morris Library can provide training, though not as in-depth as that provided by DSS. Patrons who would like to receive training from Morris Library should make an appointment with either the Support Services staff member or the Computer Support Specialist.

Library Procedures for Disability Services:
When a disabled patron needs assistance in Morris Library, the following people help in the order they appear on the list:

1. Information Desk staff members can help patrons do research; identify the equipment and programs related to assistive technology; and direct patrons to the appropriate computer/equipment.

2. If patrons need additional services, they will be put in contact with the Support Services staff member, who acts as a professional liaison to SIUC DSS and provides reasonable assistance for all assistive equipment and software in Morris Library. The Support Services staff member has been trained in basic use of the equipment and software, and by arrangement, can also provide help disabled patrons with research and retrieval/photocopying of materials.

3. Should there be complex software questions that are beyond the scope of the Support Services staff member’s knowledge, the Computer Support Specialist will be contacted. This person provides a more advanced level of assistance, as well as troubleshooting hardware problems and being the liaison with software companies when such needs arise. The Computer Support Specialist has had ongoing training in the use of the equipment and software.

University of Virginia Library

Disabled Patron Services

The University Library, in partnership with the Learning Needs and Evaluation Center and ITC, provides a variety of services and equipment in support of the research needs of individuals with disabilities.

Arrangements can be made for retrieving materials or providing specialized study arrangements.

Patrons with visual or hearing impairments can find a variety of assistive technology in Clemons Library. This includes:

- Headphones (checkout from Circulation)
- ZoomText software
- Kurzweil 3000 Reading, Writing, Learning software
- JAWS screen reading software
- A Scrivner VideoPhone for ASL communication
- A Pico handheld magnifiers (checkout from Circulation - magnifiers can also be checked out at Alderman Library, Brown Library, and the Music Library)
- A Trupax desktop video magnifier (also available in Alderman Library in the Government Information Reading Room on the 3rd floor, in the Music Library in Old Cabell Hall, and in the Brown Science and Engineering Library in Clark Hall)

Individual libraries can provide specific information about wheelchair accessibility. For more information about these and other services, call Todd Barks, Coordinator of Disability Services (Office phone: 924-3562; Clemons Library Main Desk: 924-3562; Email: LibAng@virginia.edu).

Campus parking map This map can be enlarged on your screen. Look for the blue disability symbol to indicate parking spaces.

Holland and Terrell Libraries (Humanities/Social Sciences)

Access to Collections: Stacks are ADA-spaced. Assistance is available for special needs; ask at the Circulation Desk. The video collection can be keyword searched in Griffin; the Libraries' catalog, for the closed caption feature.

Reference Assistance: Specialized reference services are available. For assistance contact the Holland and Terrell Libraries Reference Desk at 335-8516. For assistance with specific subject disciplines, contact the designated liaison librarian. Appointments for research consultations with a librarian may also be arranged.

Assistive Technologies:
Wheelchair-accessible computer on height-adjustable table (reference area on 1st floor; ask Reference Librarian for adjustment)
Kurzweil Reader (reference area on 1st floor)
Screen reader magnifying monitor (reference area on 1st floor)
Magnifying glass (reference desk on 1st floor)
Magnifying glass on stand (Manuscripts, Archives, and Special Collections on Ground Floor)
TDD phone - Telecommunications Device for the Deaf (hallway between old and new libraries, 1st floor)

Building access: entrances equipped with automatic door; ramp to rotunda area. Some inner doors to public units do not have automatic access. The elevators are located in the hallway connecting the old and new libraries and are wheelchair-accessible. Restrooms, also wheelchair-accessible, are on 1st, ground, and basement floors in hallway connecting old and new buildings.

Parking:
Underground parking garage beneath the Holland and Terrell Libraries, enter from Colorado St. Disability parking in the Compton Union Building (CUB) parking lot (east end of the building); enter CUB from parking lot and continue through to Terrell Library at the we
end of that floor.
