The screenshot shows the ASU Libraries website interface. At the top, there is a navigation bar with links for 'ASU Home', 'My ASU', 'Colleges & Schools', 'A-Z Index', 'Directory', 'Map', and 'SIGN IN'. Below this is a search bar for 'ASU Libraries Site'. The main header features the 'ASU Libraries' logo and the 'thelibrarychannel' branding with social media icons for Flickr, Vimeo, iTunes U, Twitter, YouTube, and Facebook. The featured content is a video titled 'The Library Minute: Study Spaces (Video)' dated November 30, 2011. The video thumbnail shows students in a library setting with the text 'spaces and places'. Below the video, there is a description of library study spaces and links to download the video and view it on YouTube. A 'Leave a Reply' form is visible at the bottom left. On the right side, there are sections for 'topics', 'location and programs', 'recently tweeted' (with social media links and tweets), and a 'calendar [archives]' for November 2011.

Get technology training at Regenstein TECHB@R

Posted on March 26, 2012 by Rebecca Starkey and Jason Edelstein

Library and IT Services collaboration brings technology-related programs to TECHB@R

IT Services TECHB@R in Regenstein Library (Photo by Quinn Dombrowski)

The University of Chicago Library and IT Services are partnering to present new, technology-related training programs for the UChicago community at the IT Services TECHB@R in the Regenstein Library. Because IT Services and the Library both provide training and support on information technology resources, it can be challenging for many of our users to identify which unit to turn to for help with specific tools. This collaborative nature of the TECHB@R breaks down such barriers, providing faculty, students, and staff seamless access to the training and assistance they need.

During Spring Quarter, the TECHB@R will host a wide range of programs, which are free and open to the entire University community. Some sample topics include Google Sketch-up, wikis, citation managers (such as Zotero and EndNote), Firefox Add-ons, and the ever popular "Chalk

Days," as well as its other training programs for instructors and students alike.

A new monthly series, entitled "Tech Treats," offers a more casual learning experience. Individuals can drop by the TECHB@R to enjoy refreshments and learn about new technology tools. Scheduled for Spring Quarter are programs on presentation software (such as PowerPoint, Keynote, Impress and Prezi) and online technology training tools (such as Lynda.com, the IT Services Knowledge Base, and Safari Tech Books online). Last quarter, librarians presented a "Tech Treats" program on the news databases Factiva and LexisNexis Academic and featured a demonstration of different news apps for the iPad.

In addition to presentations and classes, the TECHB@R hosts various "Ask the Expert" office hours. Librarians, training specialists, and Chalk support technologists offer in-depth, individual assistance using a variety of software products and systems including Chalk, Microsoft and Adobe software, citation managers, as well as other tools like WebShare and the campus wiki. The "Ask the Expert" service complements the drop-in tech support services already offered at the TECHB@R during its regular hours and is available to all faculty, students, and staff.

The TECHB@R training spaces in Room 160 (located behind the TECHB@R counter) are appropriate for a wide variety of programs and teaching styles. These include a configurable conference-style area, a small-group training/consultation space, and small tables for one-on-one assistance. The TECHB@R's equipment lending program provides presenters and attendees access to laptops and iPads for a hands-on learning experience.

To learn more about the TECHB@R and see a complete schedule of events for Spring Quarter, visit: itservices.uchicago.edu/techbar. We welcome your comments regarding our programs and services.

Rebecca Starkey is Librarian for College Instruction and Outreach. Jason Edelstein is Senior Support Services Specialist.

Our Mission

By providing access to innovative technologies, collections, services, and spaces, the Lauinger Library's Gelardin New Media Center strives to continually transform the ways faculty teach, students learn, research is published, and knowledge is conveyed. Our experienced staff collaborates with partners across the Georgetown University campus to turn ideas and research into expressive multimedia forms of communication.

www.library.georgetown.edu/gelardin

Workshops & Consultations

The New Media Center works synergistically with faculty to build students' digital and visual literacy skills and give them the tools required to participate fully in a dynamic and information-rich media landscape. We frequently partner with Georgetown's

Center for New Designs in Learning and Scholarship (CNDS) to spark interest in the use of technology for pedagogical purposes and help faculty integrate new media projects into their courses. We host instructional sessions open to Georgetown faculty, students, and staff on

digital imaging, video production and post-production, delivery of media content, and other software applications and technologies.

Equipment

In order to communicate effectively in the digital era, it has become increasingly important for scholars to have access to the latest technologies and equipment. Our equipment offerings are vast and varied — we have basic gear for simple projects and advanced gear for true (and aspiring) professionals. Video, audio, and lighting equipment circulates for 24 hours at a time.

Collections

Our media collection is interdisciplinary and international in scope and includes more than 20,000 video files and 6,000 CDs. The collection continues to grow in all areas of the curriculum, and online access to media is expanding exponentially. Items circulate to faculty for one week and to students for 24 hours, and we stream media online by request.

The Project Room

@ the Information Commons

- Practice your presentation
- Hold a group study session
- Use your laptop or the resident PC
- Capture, save and print whiteboard notes
- Available all hours the library is open

Reserve in advance at the Information Commons desk

What is The Studio?

The Studio is not just a digital media lab; it is a community. We provide media equipment, computers, software, and consultation services for the creation of media-enhanced instructional products. Services are available to students, faculty, and staff of the University of Tennessee. Our goal is to provide media computing resources, a trained staff to provide assistance, and information about campus-training opportunities. As a part of the University of Tennessee Libraries, The Studio continues a rich tradition of innovation and operates in a creative environment of instructional and service excellence.

Dedicated storage space for long-term projects

To check out equipment you must complete a certification course and sign a loan agreement.

Consultation, Instruction, & Reference

The Studio is staffed by full-time consultants who have experience in multimedia production. Studio consultants are available for one-on-one consultation with UT faculty, students, and staff. In addition, consultation assistance is given on an "as-needed" basis when working in the studio. Short instructional classes on media software are also offered—see our website for details and registration.

The Studio Reference Collection contains media-based tutorials, manuals, and books for beginners and advanced users of software. See our website for titles.
