SPEC Kits
Supporting Effective Library Management for Nearly 40 Years

Committed to assisting research and academic libraries in the continuous improvement of management systems, ARL has worked since 1970 to gather and disseminate the best practices for library needs. As part of its commitment, ARL maintains an active publications program best known for its SPEC Kits. Through the Collaborative Research/Writing Program, librarians work with ARL staff to design SPEC surveys and write publications. Originally established as an information source for ARL member libraries, the SPEC Kit series has grown to serve the needs of the library community worldwide.

What are SPEC Kits?
Published six times per year, SPEC Kits contain the most valuable, up-to-date information on the latest issues of concern to libraries and librarians today. They are the result of a systematic survey of ARL member libraries on a particular topic related to current practice in the field. Each SPEC Kit contains an executive summary of the survey results; survey questions with tallies and selected comments; the best representative documents from survey participants, such as policies, procedures, handbooks, guidelines, Web sites, records, brochures, and statements; and a selected reading list—both print and online sources—containing the most current literature available on the topic for further study.

Subscribe to SPEC Kits
Subscribers tell us that the information contained in SPEC Kits is valuable to a variety of users, both inside and outside the library. SPEC Kit purchasers use the documentation found in SPEC Kits as a point of departure for research and problem solving because they lend immediate authority to proposals and set standards for designing programs or writing procedure statements. SPEC Kits also function as an important reference tool for library administrators, staff, students, and professionals in allied disciplines who may not have access to this kind of information.

SPEC Kits are available in print and online. For more information visit: http://www.arl.org/resources/pubs/. The executive summary for each kit after December 1993 can be accessed free of charge at http://www.arl.org/resources/pubs/spec/complete.shtml.

SURVEY RESULTS
EXECUTIVE SUMMARY

Introduction
Collaborative teaching and learning tools include a variety of hardware used to view, create, and present information. This survey specifically focused on equipment, devices, or systems being offered to research library users in a self-service environment for individualized, user-initiated, collaborative teaching and learning. Many of these tools have steep learning curves, while others are much more intuitive and are used extensively across research institutions. They may be located at the libraries or elsewhere at the institution. While some tools lend themselves to collaborative teaching and learning, others may be associated with individualized teaching and learning scenarios. Although many institutions provide loanable technology for educational use, there is little documentation of such programs. The survey provides a snapshot of what is or will be offered in 63 libraries at 61 of the 126 ARL member institutions.

Equipment Offered
The 13 types of tools addressed in the survey range from traditional classroom-based resources (e.g., whiteboards) to more sophisticated technologies repurposed for educational uses (e.g., videoconferencing systems). Respondents were asked to identify which of the tools are currently offered at their libraries, which technologies they are planning to provide, which they do not plan to provide, and, if the library does not offer the tool, whether it is available elsewhere at the institution. The survey also asked how many of each type of tool is or will be available. Sixty-one of the 63 respondents (97%) currently offer at least one form of collaborative teaching and learning tools to their users.

Not surprisingly, non-interactive whiteboards are the most available tools identified in the survey. Fifty-eight institutions (97%) have or plan to have them; only two libraries have no plans to offer whiteboards. The number offered ranges from two to 100 per owning institution, with an average of approximately 23 units.

Laptops are the next most commonly available tool. Forty-one of 62 responding libraries (66%) offer or plan to offer laptops. These libraries offer about 59 laptops, on average. At least one respondent reported that while the institution strives to offer emerging technologies, the laptop loan service continues to be “one of [the] most popular and appreciated services” offered by the libraries. In contrast, another respondent noted that they are discontinuing laptop checkout and are instead encouraging students to bring in their own. One institution described the transition from a laptop to netbook loan service as a way to increase the number of units available to users, “given the lower price of [them].” Touchscreen tablet computers such as iPads and Android tablets (e.g., Motorola Xoom) are or will be available at 38 institutions (61%), with owning libraries offering an average of 12 units. E-book readers are also offered or will be offered at 24 ARL libraries (39%), with an average of 10 readers at each library.

Collaborative devices for multimedia production are widely available. Forty libraries (63%) offer video recording devices such as the FlipVideo tapeless camcorder. These institutions reported supporting an average of 13 units each. Fifteen libraries (24%) do not plan to offer these devices, and eight (13%) indicated the equipment is available elsewhere within the
institution. Similarly, more than half the respondents reported having audio recording aids at the library (34 responses or 55%). Several (11 or 18%) reported that other locations on campus have these devices.

Thirty institutions (49%) reported they currently offer or plan to offer interactive whiteboards. These collaborative tools are available elsewhere at 11 institutions (18%), but 20 others (33%) reported that they do not plan to offer this tool. Although interactive whiteboards are used in libraries and throughout several reporting institutions, interactive learning centers (touch tables) that use comparable technologies are only available or will be available at 15 libraries (25%). The specialized nature of content to optimize use of a tool, such as GIS, may contribute to its low response rate. A tool commonly associated with the interactive whiteboard—the audience response system with clickers—is or will be in place at 29 institutions (48%), with an average of 120 clickers at each owning library. Twenty-three respondents reported that audience response systems are being used at locations other than the library. One institution commented that ABTutor or polleverywhere served as an alternative to the audience response system.

Handheld videoconferencing devices such as webcams are offered or will be offered at 14 of the reporting institutions (23%), with an average of 32 units, and one respondent commented that some tablet computers and laptops are equipped with a built-in camera with audio and video capability; since this capability enables use for videoconferencing purposes, purchase of standalone devices was deemed unnecessary. Thirty-six institutions (61%) currently offer or will offer videoconferencing systems. Few libraries offer their patrons gaming systems (eight institutions or 13% with an average of four units each) and personal digital assistants are no longer popular (three institutions or 5%).

Thirty respondents reported they support a variety of other devices, electronics, systems, and workspaces to allow creation, viewing, and editing of information. Viewing devices are mentioned most frequently; monitors and projectors allow a larger group of users to work together without having to crowd around a small monitor. Nine institutions (30%) have anywhere from two to “dozens” of display monitors (LCD and plasma). Eight have between two and 25 projectors (portable to larger data projectors). An alternative to a single, large display is collaborative workspace offered by Steelcase. Mentioned in eight of 30 responses (27%), this media:scape workstation system is described as providing a “collaborative seating arrangement [with] a large screen monitor and table for laptops that connect.” media:scape allows users to shift quickly between displays of connected laptops and other devices such as an iPad. Responding institutions had as few as one station and as many as 20 at some libraries.

Several institutions offer other computer electronics such as scanners, drawing tablets, and various storage media. Headphones (three institutions owning a range of 16 to 60 units) and microphones (six institutions ranging from three to 37 units each) vary from very basic to professional quality. Smaller accessories necessary to optimize use of computing and productivity tools (such as adapters and cables) are noted to be available in “kits” or as standalone items to be used in the library.

Reference to multimedia production was in connection to technology-rich spaces within the libraries, sometimes referred to as information commons, media centers, or knowledge commons. One library reported jointly administering the spaces with institutional/campus technology departments and reported those holdings. Among the equipment frequently maintained for video and audio production are digital cameras (ranging from four to 18 units each at seven institutions) and accessories, including tripods. One respondent explained, “[providing] editing facilities [is] used to integrate media from our collection into academic projects. In addition to using found footage and content in digital productions, our users can also create new content using the digital still and video cameras, audio recorders, and accessories like lighting and microphones.” Audio players, video editing equipment, and video conversion tools, audio editing equipment, imaging technology, music keyboard and mixing boards, transcription kit, and 3-D modeling and animation equipment were reported as available by at least one institution. Appropriate software packages to use these tools are installed when necessary.
Unique responses designated as collaborative tools by respondents included large-scale poster plotters, GPS, and PA systems. Non-electronic tools offered included graphing and scientific calculators, project lockers, media viewing rooms, presentation practice areas, module and mobile furniture, green screens, and carts for transporting equipment.

Equipment Location
The locations of learning and teaching tools include open user areas (such as reference or information commons areas), classroom or teaching/training labs, group study rooms, the circulation desk, and other facilities across the institution, including library conference rooms, campus computing centers, media centers or information technology labs for instructional support services, student unions, and dorm study rooms.

Non-interactive whiteboards are found in many locations at the 63 responding institutions, including open areas (32 responses or 57%), classrooms/labs (30 or 54%), and group study rooms/spaces (43 or 77%). The prevalence of this non-digital collaborative tool is likely due to its inexpensive and easy-to-maintain nature.

Interactive whiteboards are in open spaces at nine institutions (25%), though more often they are housed in classrooms/labs or group study rooms. Nine of the 14 libraries that have interactive learning centers put them in public spaces in the library; one library indicated a touch table is available in an exhibition area within the special collections library.

Although some tools are available in open spaces, expensive equipment is typically not found in open, unregulated areas in the library unless mounted (e.g., plasma displays), grounded (e.g., mediascape tables), or installed to another device (e.g., videoconferencing devices or scanners).

Videoconferencing systems, interactive whiteboards, and audience response systems are commonly found in classroom/lab environments and group study rooms. In the classrooms they are usually only for faculty use. Respondents’ additional comments showed six instances of videoconferencing systems housed in conference rooms.

Many of the tools available for loan and use onsite include laptops, video recording devices, audio recording devices, touchscreen tablet computers, calculators, and e-book readers. Associated peripherals such as keyboards, portable scanners, projectors, power cords, and cables for monitors and webcams are also loaned by at least one institution. Monitors, keyboards, and some other tools/devices for media or video production are sometimes held in the group study rooms (five institutions) and are, in effect, checked out at the time of reserving the user space. The mediascape tables are held in various locations throughout the libraries; institutions varied by making them either openly accessible on a first come-first serve basis or loaned via check out of a group study room.

Scheduling
Forty-six of the responding institutions (74%) indicate they use some kind of scheduling process to reserve collaborative teaching and learning tools. The most common methods are scheduling equipment in person (20 responses or 44%) and using a form on the library’s website (19 or 41%). A few libraries accept reservations by sending an email, scheduling via the catalog, calling in a request, and using an online calendar such as Oracle or Outlook. Four institutions use a commercial booking system (e.g., OnShore Development). The catalog or homegrown systems are most often used for advanced booking. One institution indicated that, “Check out of more advanced/expensive equipment… sometimes requires faculty sign-off.” One institution uses touchscreen tablets outside of study rooms for on-the-fly scheduling.

While respondents are not consistent with the systems used to schedule and reserve tools, they reported some consistency with what is scheduled. Respondents focused either on a specific tool or on booking user spaces that are equipped with tools not individually checked out. Fifteen institutions (68%) reported they book group study rooms or classrooms that house various tools. Examples of this practice are booking the media production room to reserve video equipment and green screens, presentation space to check out monitor and cables, or a group study room to reserve the interactive whiteboard or videoconferencing system. Examples of devices that can be reserved include laptops and e-book readers. These are
barcoded and checked out to the user’s institutional identification/library card.

**Decision Drivers**
 Libraries decide to make learning and teaching tools available to users based on a number of drivers. Respondents to the survey indicated that user request is the most compelling reason to purchase collaborative tools (54 institutions or 87%), while recommendations from a library committee or staff member is the second highest driver (52 or 84%). The third highest driving factor comes from university department collaborations, where libraries focus equipment purchase on tools integrated into the classroom and curriculum (36 or 58%). Adding the tool to designated technology-rich spaces in the libraries (e.g., the information commons) was the fourth highest reported driver (34 or 55%).

Other decision drivers for the purchase and support of collaborative teaching and learning tools range from a consideration of trends and best practices to input from faculty or students. Opportunities such as new construction projects, donations from private donors, improved wireless coverage, and allocation of student technology fees influenced the decision for other institutions. One respondent noted that a plan for continuous assessment of user needs should be in place before including technology. As this plan develops, user demands and expectations may also evolve.

**Use Policy**
 When asked about restrictions on the use of teaching and learning tools, many of the respondents (26 or 43%) indicated that some tools are available to some users while others are restricted. Eighteen (30%) indicated that use is restricted based on user category, while a comparable number (17 or 28%) revealed that all tools are available to all users.

Forty-five respondents provided additional information about restrictions on tool use. In the majority of cases (29 or 64%), currently affiliated students, faculty, and staff can use any of the offered collaborative tools. In some cases (11 or 24%), only students can use the equipment, as purchase and use agreements are governed by the student technology fee paid or other grants specifically targeted to students. At two institutions, students can only reserve an interactive whiteboard if faculty have “signed-off (via email)” on their use. In other cases (nine or 20%), teaching staff (both faculty and graduate students) are eligible to use tools such as cameras, audio recording devices, and laptops. In one case, the library restricts use to a specific population: “Video cameras and digital audio recorders are available to faculty/students teaching/enrolled in a class using oral history or other guided interview methods in coursework.”

Twenty-six of the responding libraries (43%) require a registration process for use of many of the collaborative tools, while the same number of respondents indicated that neither training nor registration is required. The registration process typically requires users to sign an agreement, when they checkout such items as laptops, iPads, MacBooks, cameras, and audio recording devices, that specifies, “They agree to certain responsibilities including how the equipment can be used and their financial obligation in the event of theft, loss, and/or late return” (15 responses or 54%). Registration is usually a paper agreement form, but one respondent indicated that users must complete an online agreement form to book a Kindle in the catalog.

In four instances (14%), users contact staff directly to register to use videoconferencing tools, iPads, and Blackberries. At six institutions (21%) students are automatically registered when they check out laptops and iPads in the library system or during advanced booking by web form.

**Training and Technical Support**
 A quarter of the responding libraries require users to complete training before using these tools. In some cases, library staff simply provide brief presentations that cover use policies, basic equipment operation, and “general how-tos.” One institution requires training for iPads that are used in instructional seminars they offer on the use of medical apps. More complex or very specialized equipment, such as recording studios, multimedia workrooms, videoconferencing equipment, and video cameras, require more extensive training. One institution uses online videos—student technology workers in the media center developed online training modules that users must complete before receiving any equipment. Another institution offers
a workshop for interactive whiteboard use. In one instance, certification is required for “some complex equipment.” Where training is not required, instructions on how to use the equipment is offered upon request.

More than half of the 58 responding libraries (33 responses or 57%) reported that both library IT/systems and non-systems staff play a role in training their coworkers to use and troubleshoot collaborative tools. About a third of these 33 also turn to their parent institution IT staff and/or commercial vendors for training. At 12 libraries only non-IT library staff provide training or troubleshooting. Five rely solely on library IT staff. Only two respondents report training or troubleshooting only by the parent IT staff. The high number of respondents who depend on non-systems staff for training/troubleshooting (47 or 81%) indicates the need for immediate support for staff in public service functions. One respondent describes staff being trained by “super users” in their area. Another commented, “It depends. Most troubleshooting is done and documentation developed by front-line staff. When necessary, IT staff will help resolve technical problems. We intentionally wanted equipment and systems that were readily usable and wouldn’t require staff help.”

When asked who provides technical support for library users, the responses were almost identical to who provides training. The majority of respondents once again depend on either non-systems library staff (47 of 61 responses) or library IT/systems staff (40 responses). With a few variations, the same libraries rely on the parent institution’s IT/systems staff for user support. Only four respondents receive user technical support from vendors. This suggests a dependence on “train-the-trainer” sessions for library staff who receive the training directly from vendors and then pass that knowledge on to the users. Comments on this question also hint at support for students by students.

Not surprisingly, maintenance and repair of collaborative teaching and learning tools shifts more to library IT/systems staff (49 or 81% of responses overall). The number of libraries that rely on non-systems library staff goes down to roughly half. Most of these 30 respondents also depend on library and parent institution IT staff and vendors for maintenance and repairs. Most of the remaining 31 respondents rely on a combination of library and parent institution IT staff and commercial vendors. Additionally, responses in the “other” category imply that institutions are willing to go “out-of-house” (e.g., outsource) to keep highly technical tools in good working order. Reliance on commercial vendors for repairs and maintenance is also likely a reflection on the contractual obligations of the suppliers to honor warranties for malfunctioning parts or hardware.

Considering the complex nature of new technology and hardware involved with the wide variety of collaborative teaching and learning tools, responses to this question and the previous support questions clearly indicate that institutions depend greatly on their IT/systems staff for maintenance and troubleshooting of highly technical hardware and software. However, right along with them are non-IT/systems library staff members that provide assistance in about half of each of the troubleshooting, technical support, and maintenance scenarios.

Financial Support

Initial purchase of collaborative teaching and learning tools in libraries is done through a variety of funding sources, but chiefly they are acquired through the general library budget (53 responses or 86%). The library’s IT/systems budget came in second as a source of funding for half of the responding libraries. About a third relied on the parent institution’s IT/systems budget or student technology fees. Grant funding from outside agencies is used by roughly one-fifth of the libraries. Only six respondents reported using a public/private partnership for funding. The “other” responses fall into several discernable categories: donations/donor funds (seven responses); other institutional departments (four responses); endowment funds (three responses); and renovation/construction funds (three responses). One respondent reported using library fines and fees. Another is considering using collection development funds in the near future to buy e-readers and iPads. A third received funding for laptops and netbooks from a local credit union, while one library system used “shared funding” of student technology fees by collaborating with other units on campus. Such creative and varied responses suggest libraries
themselves are being innovative when seeking outside funding streams to purchase cutting-edge tools.

Funding for ongoing maintenance and replacement of equipment follows a very similar pattern to that of initial purchase funding: most respondents depend on the general library and/or IT/systems budget. Funding from student tech fees drops to 25% of respondents and from the parent institution’s IT/systems budget falls to 20%. As might be expected, grant funding and public/private partnerships drop off considerably after initial purchases of equipment and the parent institution or library takes over maintenance and repair. Two libraries use library fines and fees for maintenance and repair. One institution generates income from a “Distance Learning Library Services program.” One library hopes that as some collaborative tools gain popularity across campus that university administration will acquire a site-license.

Only four libraries report charging fees for the use of collaborative teaching and learning tools. One institution charges unaffiliated users a fee to use some equipment and rooms. At one library, late fees are $5 an hour for electronic equipment and $1 an hour for accessories. Another library charges a fee for late return of laptops ($20/hour, up to a maximum of $200). While no up-front fees are charged to affiliated users of these institutions, refusal to adhere to use policies and due dates for electronic equipment potentially can be seen as additional revenue stream for their purchase, maintenance, and repair.

**Publicity and Evaluation**

When offering a new service, libraries often try to publicize the new service through a variety of media such as library websites, fliers, social networking sites, email, newsletters, and the campus newspaper. However, when asked how they promoted the availability of new collaborative teaching and learning tools in their libraries, respondents overwhelmingly relied on simple word of mouth (59 responses or 95%). Not far behind that response are announcements on the library website (56 or 90%), followed by mentions in library classes and tours (54 or 87%). Such seemingly passive promotion of a new service may be due to the technical support and large learning curves associated with tools that may be deemed technologically advanced for library staff and users. Even a traditional method of promotion like signs and flyers (42 or 68%) ranks slightly ahead of “web 2.0” social networking methods like Facebook, Twitter, YouTube, etc. (40 or 65%). Fewer than half of the respondents reported using email (30 or 48%), library newsletters (29 or 47%), or campus newspapers (16 or 26%), signifying much less reliance on these methods as a means to reach a more technologically advanced user. Open-ended responses indicated use of various “digital signs,” e.g., electronic signs on campus or screen savers on workstations, to reach potential users. Three respondents relied on library outreach or liaisons to campus departments. Two libraries used institutional websites, while one had not started marketing initiatives, yet.

Similar to the methods employed in publicity, assessing the success of offering collaborative teaching and learning tools is largely informal in most of the responding libraries. Informal user feedback (57 or 93%) and tracking the number of uses of each tool (55 or 90%) are the two most common evaluation methods. Surprisingly, fewer than half indicated they use formal surveys of users (26 or 43%), though an analysis of the “other” responses shows this number is misleading. Three libraries report using focus groups, two others use faculty surveys, one uses an “Opinions Survey,” and yet another relies on the library’s annual survey—all of which can be viewed as methods of formalized user surveys. As a measure of user demand, the fourth most popular evaluation technique is tracking the number of requests for each tool (24 or 39%). Some libraries track the number of technical support requests for each tool as an evaluative measure (16 or 26%). One library has recently hired an “Assessment Librarian,” whom they hope will be able to track evaluation of support for collaborative teaching and learning services. Interestingly, one library somehow tracks “turn aways” (i.e., number of users turned away from a service desk because all of the needed tools are checked out).

**Benefits and Challenges**

Some of the most informative and thought-provoking comments in the survey come from the sections in which respondents were asked to list up to three benefits and three challenges associated with
offering collaborative teaching and learning tools in the library. The amount of benefits and challenges are nearly equal, but the number of unique statements for challenges seems to outnumber the beneficial ones. Although the responses are quite varied, several noticeable themes emerge.

The benefits of providing collaborative teaching and learning tools cover many needs of the research community. Their very nature seems to be the inspiration for a large majority of the respondents who feel these tools support a collaborative teaching and learning environment, as evidenced by responses that mention the benefits of team learning, supporting collaborative work and new teaching styles, and meeting the changing needs of teaching, learning, and research at their institutions.

The second most common perception held by respondents is that the popularity of collaborative tools serves as good publicity and outreach for the libraries:

- “Brings users to the library.”
- “Broadens the identity of the library on campus.”
- “Allows us to reach people who might not normally visit.”
- “Good marketing for the library as a technologically relevant place.”
- “Fulfills a user need, thus providing good PR.”

Several comments emphasize the importance of having access to new tools and technology for users in developing the much-needed knowledge, skills, and abilities within a 21st century knowledge discovery environment:

- “Access to technology for workplace skill development.”
- “Improves their skills for future entrance into the work force.”
- “Provides students with valuable skills sets that will make their resumes and grad school applications more competitive.”

Quite a few responses point out the added benefit for users of increased access to new tools and cutting edge technology. The libraries absorb the sometimes prohibitive cost for researchers to experiment with new tools, thus evening the playing field for economically disadvantaged users.

A few institutions stress the mere convenience and flexibility of being able to check out laptops and how that too extends learning beyond the classroom. Another common theme is that offering these tools enhances the users’ learning experiences in and out of the library and also provides improved patron services. Other responses mention satisfying user needs and demands, as well as keeping the library up-to-date and relevant.

When respondents were asked to identify challenges, an overwhelming number of comments concerned costs associated with the initial purchase of these tools. They also expressed the need for recurring funds devoted to technology maintenance, repair, and replacement. Even though not requiring institutional funds, one respondent interestingly pointed out that, “even free apps require having a credit card on file.” Technologies that are lent out could easily be damaged and expensive to repair or replace. Several respondents were concerned that the budget for more traditional library materials (e.g., books) would be cut in favor of buying technology tools.

Another prevalent issue is that collaborative teaching and learning tools always need updating:

- “Keeping up with rapidly changing technologies.”
- “Things change so quickly, deciding where to invest is a challenge.”
- “iPads are challenging to keep updated.”
- “Some technologies are on their way towards obsolescence by the time a service for them is launched.”

A number of the responding libraries mentioned the effect on staff workload and the learning curve involved in keeping up with the latest hardware and software. The time involved in assisting patrons and troubleshooting seems to be taking a toll on some library staff, as one pointed out they, “must maintain a bigger workload with the same number of hours in a day.”
With the influx of new technology comes a rise in the need for technical support that includes the maintenance and upkeep of a variety of devices and platforms. Several libraries seem to be struggling with defining who provides this support and how. Their concerns include:

- “Difficulty in supporting combination of university-owned and student-owned equipment.”
- “How to provide technology support and content/reference support at point of need.”
- “Library IT support for tools that often fall outside the profile of equipment routinely supported.”

The public relations activities involved in getting the word out effectively to influence user buy-in seem to be challenging for one or more libraries:

- “Instructors are not always supportive or interested in their students using these resources.”
- “Some faculty and staff (including library staff) do not understand why the library is involved in providing these tools to users.”
- “Communication between partners is essential and any breakdown can negatively impact services and user experiences.”

Other challenges mentioned include meeting user demand, security, developing policy and procedures, and scheduling. Lack of space, or adequate space at least, in existing libraries for collaborative tools and learning is also a concern for some: “It’s hard to carve out space for group rooms in the current footprint of our buildings.” Surprisingly, only one respondent mentioned the issue of copyright and licensing as a concern. One library aptly pointed out an often overlooked challenge: personal privacy can sometimes be compromised when using shared teaching and learning tools.

**Conclusion**

Results and documentation from this survey demonstrate the variety of collaborative equipment, devices, and systems available or soon to be available to research library users. When considering the provision of collaborative teaching and learning tools, one must take into account the institutional mission, policies, infrastructure, budgetary constraints, staffing, and user demand and expectations. What should be purchased? How many to purchase? Who can use them? Where can they use them? When can they use them? How will they use them? When and how will they be updated? Who will do the updating? Who will train the users? Who will train the staff? Institutions thinking of offering such resources in the future can perhaps make more informed decisions by assessing the experiences reported by ARL libraries in this survey. The study seems to indicate these tools not only enhance current services at libraries but also improve the libraries’ image as a dynamic and responsive partner of the research community.
SURVEY QUESTIONS AND RESPONSES

The SPEC survey on Collaborative Teaching and Learning Tools was designed by Marilyn N. Ochoa, Assistant Head of the Education Library, and Thomas Caswell, Assistant Head of the Architecture and Fine Arts Library, at the University of Florida. These results are based on data submitted by 64 libraries at 61 of the 126 ARL member libraries (48%) by the deadline of March 5, 2012. The survey’s introductory text and questions are reproduced below, followed by the response data and selected comments from the respondents.

Recent library literature emphasizes the increase in technologically savvy library users and the development of “information commons” or “collaboration labs” to serve them. However, little has emerged to give insight on the details of offering complex and technologically advanced collaborative teaching and learning tools, such as interactive whiteboards, to library users. The ability of a library to offer such equipment carries with it a large learning curve, for both users and library staff, along with financial and technical support issues.

This survey is designed to gather information about what collaborative teaching and learning tools are currently being offered to users in ARL member libraries. It covers questions on which kinds of tools are offered, how many, and why, where they are located, who may use them, the sources of funding, who provides training and support, and what techniques are used to promote and evaluate the tools. Data and documentation gathered from this survey should provide a snapshot of collaborative teaching and learning tools currently offered in academic and research libraries and also provide a basic framework for those thinking of offering such resources in the future.

For the purpose of this survey, “collaborative teaching and learning tools” are limited to the equipment, devices, or systems being offered to research library users in a self-service environment including, but not limited to, the following: interactive whiteboards (IWBs, e.g., SMART Board), touchscreen tablet computers (e.g., iPads), classroom/audience response system (e.g., clickers), interactive learning centers (e.g., TouchTables), and Wii gaming systems. Please restrict responses to this survey to those services and equipment that result in individualized, user-initiated, collaborative teaching and learning scenarios.
1. For each of the following types of collaborative teaching and learning tools please indicate whether the library currently offers it, plans to offer it in the near future, or has no plans to offer it. If your library does not offer the tool, please indicate if it is available elsewhere in your institution. N=63

Plan to Offer N=2  
Developing presentation practice studio space.

Media:scapes will be part of a scheduled renovation this summer.

Selected Comments  
Although we don’t offer webcams as a separate item for checkout, our 160 Dell laptops have webcams installed in them.

Media:scapes. These are collaborative seating arrangements that have a large-screen monitor and table for laptops that connect—with a switching device that allows users to quickly shift displays between connected laptop—or device such as an iPad.

The library has plans to offer iPhones at one branch to explore the utility of mobile devices.

Video and audio recording is available in our presentation practice room only. We do not check out these devices. The Polycom system is available in our Business Library, but it is available to the College of Business community only.

We have three interactive whiteboards but do not believe they are easy enough for users to operate. We previously circulated laptops from our circ desks, but decided to discontinue the service. We are doing things to encourage students to bring their own laptops instead.
If making these tools available for users is in the planning stages, please answer the following questions to the best of your ability based on plans at this time.

**NUMBER OF TOOLS**

**Selected Comments**

The library is also considering the purchase of Windows based tablets. Subject specialists are also investigating the possibility of providing a 3-D printing service for students and faculty. Subject librarians will meet with other departments on campus to discuss possible partnerships that might bring a 3-D printing service to the library.

[Our institution] is a very large de-centralized institution and I have not attempted to collect information from other units on campus that make these tools available to students.

If you selected “Other Location,” please specify the tool and identify its location. N=22

- Other technology, media, and computing labs: 15
- Conference rooms: 7
- Student unions: 4
- Exhibit area: 1
- Student dorm study rooms: 1
- Dean’s office: 1
Selected Comments

| A videoconferencing system (Skype) is available for faculty use in a conference room. Other tools (gaming systems and touch tables) are available through other campus facilities. |
| Clickers available through Center for New Designs in Learning and Scholarship. |
| Digital Union/Emerging Technology Center. |
| iPads are for checkout but also distributed as sets for classroom use. Usually for an entire semester. |
| Laptop: multimedia room. Videoconferencing systems: conference/training rooms. |
| Laptops are available for checkout through central Instructional Support Services ISS on campus. SMARTBoards are available in some classrooms, and some union and dorm study rooms. |
| Media Center, general Circulation desk. |
| Media technology center provides over 3,000 pieces of equipment including audio and video recording devices. |
| Multimedia Services of the Information Technology Services provides classroom support on campus and offers clicker and video recording hardware. The TECHB@R (operating in the library but organizationally part of Information Technology Services) provides laptops, iPads, power adapters, and HDMI connectors. |
| Polycom available for reserveable conference rooms. |
| Polycom available in the dean’s office area. |
| Provided by our Academic Computing group within Information Technology. |
| Smart Boards: also in Cox Hall Computing Lab, Emory Center for Interactive Teaching (ECIT). White-boards: also in Cox Hall Computer Lab. Videoconferencing: also in Cox, ECIT. Interactive tables (media:scape): also in Cox. Personal digital assistant: ECIT provides assistance. |
| The Polycom is available in a conference room in the Business Library. |
| The touchtable is in an exhibit area of our special collections library. |
| There are multiple computer labs across campus. Some offer webcams. The College of Mass Communications and Media Arts checks out video and audio equipment to its students. Clickers are used by some instructors, but students must purchase their own device. |
| Videoconferencing and videoconferencing devices: A number of university Academic Media Services classrooms on campus. |
| Videoconferencing system is also available in a meeting room. |
| Videoconferencing system is also available in the Research Library’s “Big” Conference Room. |
| Virtual Desktop Software available from virtual servers, following authentication. |
| Web cams are mounted on public services staff computers. Polycoms are located in the conference rooms. |

4. Does the library use any scheduling system to reserve any of these tools? N=62

| Yes | 46 | 74% |
| No  | 16 | 26% |
5. If yes, please briefly describe the scheduling system (e.g., an online form within the library catalog, a web form, in-person requests, etc.) N=46

Selected Comments

Because the interactive white boards will be located in group study rooms in our commons when it opens in Fall 2012, they will essentially be scheduled via our group study reservation system which is web-based.

Classrooms are reserved through a home-grown system called LMS. Group rooms are reserved via Outlook. Other items are checked-out via Voyager.

For the gaming consoles and the games themselves, we have placed records for them in the catalogue and students check them out like a reserve item for a set period of time. The videoconference systems are booked on our staff Exchange system.

Patron requests for equipment can be made via email; those requests are scheduled using an online, departmental calendar. Scheduling requests for additional resources and learning tools can be made through the campus Event Management System (EMS). The library and the Clough Undergraduate Learning Commons host four presentation studios. The presentation studios offer a variety of multimedia resources (projectors, recording equipment) that students and faculty may use for presentations. We have also discussed the prospect of using commercially available scheduling tools/software for the library’s multimedia equipment.

The equipment does not require reservation but the group study rooms (technology rooms) in which some equipment is used do require reservations. Online web form sued for requests and R25 room scheduling system.

PhPSchedule-it open source software on the library website.

Rooms with equipment (e.g., SmartBoard) and the Media:scapes are reserved via a web form or in person -- these are tracked in a special reservation system. Laptops are reserved in person but recorded in the library catalog system.

We have two online registration systems in place used to book rooms, which contain some of the technology/tools listed in this survey. Both are web forms, available on the websites of the sites that maintain the rooms/technology. Rooms can also be booked in-person and via phone. In addition, equipment that is checked out is ‘registered’ in some way. Many of these items are ‘checked out’ like a book, which means we scan the barcode on the item and the user’s campus ID (also library card). Check out of more advanced/expensive equipment is logged in a different way (by the lending unit) and sometimes requires faculty sign-off.
We use a library-wide Oracle Calendar to schedule and reserve equipment.

We use a scheduling and circulation system called WebCheckout developed by OnShore Development.

**DECISION DRIVERS**

6. Please indicate the main drivers that influenced your library’s decision to make these tools available to users. Check all that apply. N=62

**Selected Comments**

Part of the library’s proactive support for integrating media into the curriculum.

Video games recommended by a staff member as an experiment, noting that many language learners had posted information on blogs about their usefulness.

We brainstormed progressive tools and are making them available for students. We asked students what kind of tools
they would find useful, but they didn’t know what to ask for. We will work with students closely moving forward. As part of the new construction project, we worked with a technology consultant, the Sextant Group, they advised on progressive tools such as the Tidebreak software and Magic PLanet.

**USE POLICY**

7. Are the tools your library offers or plans to offer available to all library users or is their use restricted to certain categories of users? N=61

<table>
<thead>
<tr>
<th>Option</th>
<th>N</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>All tools are available to all users</td>
<td>17</td>
<td>28%</td>

<td>Use is restricted to certain categories of users</td>
<td>18</td>
<td>30%</td>
</tr>
<tr>
<td>Some tools are available to all users; other tools are restricted</td>
<td>26</td>
<td>43%</td>
</tr>
</tbody>
</table>

Please briefly describe any restrictions on the use of these tools (e.g., user category, institutional affiliation, prior training, etc.) N=45

- Institutional ID/current faculty, student or staff: 36
- Student Technology Fee or other grant specifically targeted to students: 11
- Faculty and graduate students with teaching assignments: 9
- Faculty and staff: 6
- Faculty: 6
- Library staff: 6
- Institutional ID and community users: 4
- Library classroom use: 4
- Specific college or unit: 3
- Students with faculty co-sign: 2

Selected Comments

- All equipment is available to anyone with a valid ID.
- Devices that check out are available only to students and are paid for by student tech fees.
- If tools are funded by student fees, use is limited to students.
- iPads only available for students and faculty in teaching seminars we offer.
- Laptops are available to all campus users, but not public patrons; video conferencing is only available to students.
- Media:scapes are available to all users, but can be reserved by faculty and graduate students. Laptops are available to users with university IDs. Classrooms (with Smartboards) can only be reserved by faculty and librarians.
- Most equipment for checkout (laptops, flip video cameras) and study rooms/videoconferencing are restricted to use by students only. Non-interactive wipeboards not in study rooms are available to any user of the libraries. Currently, SMART
board technology is only available for teacher education students of the College of Education.

Most tools are available to all users. Some equipment requires training beforehand, some checkout equipment requires faculty sign-off (via email), so that use of equipment for class projects take priority.

The headphones are available to anyone. All other tools are only available to university faculty, staff, and students.

The interactive white boards in the commons will be limited to institutional affiliates only—enrolled students, faculty, and staff.

Video conferencing restricted to staff scheduling and use. Clickers also only used during librarian led sessions.

Video, audio, camera, and scanning equipment limited to faculty and graduate students; although another campus unit located within the library does lend this kind of equipment to undergraduates.

8. Does your library require users to complete any training or registration process before using collaborative teaching and learning tools? N=61

</tr>
</tbody>
</table>

Online tutorials/modules 2 current, 1 planned

Selected Comments

At the time of checkout, staff members in media services provide required training in use of audio and video devices.

Brief ten-minute training in-person training required for use of video, audio, camera, and scanning equipment. Training conducted by member of Library’s Digital Collections unit.

Employees provide overview of use policies and basic equipment operation. Online videos being planned.

For conference/ training room and its equipment, training on “rules of the road” and general how-to’s.

For some tools, there are no requirements. For others, registration is used to keep track of equipment, and some very specialized resources (recording studios, multimedia workrooms) require workshop attendance or training before use. Library staff provide this training.
Some items are hands-on training with staff member. We have used our student tech workers in the media center to create some online training modules that users need to complete before receiving the equipment.

Studio media production lab provides online and hands-on training for complex equipment such as video cameras. Training is required for the more complicated equipment. New Media Center staff perform the training.

Video conferencing equipment requires support/training.

We don’t require training, but we will usually meet with users prior to class or meeting to help setup and provide hands-on training/demos.

10. If registration is required, please briefly describe the process. N=28

<table>
<thead>
<tr>
<th>Registration Type</th>
<th>Count</th>

</tr>
<tr>
<td>Certification</td>
<td>1</td>
</tr>
<tr>
<td>Use of Event Management System</td>
<td>1</td>
</tr>
</tbody>
</table>

Selected Comments

Certification is required for some complex equipment.

Check out with student ID in library system (Voyager) as Reserves items.

Facilities are booked through a web form.

For certain products, such as iPads or Blackberries, staff must register with the appropriate IT or social media staff.

For laptop checkout, a laptop kit borrower agreement must be completed by the user. This agreement is kept on file.

For our laptops, users complete a User Agreement Form and the information is recorded in our Voyager system; the Kindles contain an online user registration form. None of the other tools requires registration. Use of the DMS requires registration.

Some tools and resources require the user to register through the campus EMS (Event Management) system.

Students who wish to check out laptops, MacBooks and iPads must complete and sign an agreement form every semester. They agree to certain responsibilities including how the equipment can be used and their financial obligation in the event of theft, loss, and/or late return.
11. Who trains library staff to use and/or troubleshoot collaborative teaching and learning tools? Check all that apply. N=58

<table>
<thead>

Please specify the other person. N=7

- AV Library staff.
- Certain products, such as iPads and videoconferencing are handled by NARA staff. Some products, such as Blackberries, are handled by IT staff.
- College IT staff.
- In some libraries, staff are trained by their LSPs (Local Support Partners), but many are trained by “super users” in their area.
- It depends. Most troubleshooting is done and documentation developed by front-line staff. When necessary, IT staff will help resolve technical problems. We intentionally wanted equipment and systems that were readily usable and wouldn’t require staff help.
- New Media Center staff are Library employees. They instruct themselves and each other on how to use new equipment.
- Subject librarians teach a variety of multimedia classes that are open to students and staff members.

12. Who provides technical support to library users? Check all that apply. N=61

<table>

Selected Comments

Donation for iPads. Library underwent a huge 2.7 million dollar renovation so interactive whiteboards part of that budget.

Donation from campus athletics department.

Endowment for learning spaces.

In partnership with office of undergraduate education.

New construction funding and Student’s Union Grant funding.

Parent institution’s design office.

We have discussed using collection development funds for future purchases of e-readers & iPads.

15. Please enter any additional comments you have about the initial funding of these tools. N=2

Laptops and netbooks at one location were made available with funds from a credit union that wanted to make a donation. The library identified laptops/netbooks as a resource to fund.

Some purchases have been collaborations between the libraries and the colleges with shared funding with student technology fees.

16. How is ongoing maintenance and replacement of the collaborative teaching and learning tools funded? Check all that apply. N=60

Selected Comments

Friends of the Library.

Income generated through our Distance Learning Library Services program.

Overdue fines and replacement costs charged for overdue/lost electronic items.

Some maintenance is funded through the university’s IT budget.

Some of the products, particularly the Tidebreak TeamSpot software is gaining popularity across campus. We hope the university will support a campus-wide license.

17. If the library charges a fee for the use of any of the collaborative teaching and learning tools, please briefly describe which tools have use fees, the type of fee (e.g., per item, amount of time it is used, etc.), and the fee amount. N=4

All rooms and equipment are available to all university affiliates (staff, students and faculty) for no fee. Some rooms/equipment are available to those not affiliated with the university for a fee, according to [a set] schedule.

Late fees are charged on laptops. Fines for late return are $20/hour to a maximum of $200.

Some equipment is purchased through fines and replacement charges, but is not a line item funding source.

We only charge overdue fines of $5 an hour for equipment and $1 an hour for accessories.

PUBLICITY

18. How does the library publicize the availability of collaborative teaching and learning tools? Check all that apply. N=62

<table>
<thead>
<tr>

</tbody>
</table>
Please describe the other publicity method. N=13

- Digital signage, e.g., slides, screen savers  7
- Librarian/liaison outreach  3
- Institutional website  2

Selected Comments

- Digital signage and screen-savers used on computer workstations in learning commons.
- Liaison outreach to potential faculty adopters.
- Slide show in the lobbies/entry areas of each of the libraries.
- Student Technology Fee website and information they make available to students.
- We haven’t started our marketing initiatives yet, but we hope soon.

EVALUATION

19. What techniques/strategies does the library use to assess the success of offering the collaborative teaching and learning tools? Check all that apply. N=61

- Informal user feedback  57  93%
- Track the number of uses of each tool  55  90%
- Track the number of requests for each tool  24  39%
- Track the number of technical support requests for each tool  16  26%
- Through formal surveys of users  26  43%
- Other evaluation technique  13  21%

Please specify the other evaluation technique. N=13

- Focus groups  3
- Faculty surveys  2
- Observation  2

Selected Comments

- Counting Opinions Surveys.
- Not every tool is formally assessed, e.g., whiteboards.
- Recently established an Assessment Librarian position, charged with evaluating all library services, including support for
collaborative teaching and learning.

Track the number of turnaways for each tool (i.e., a student wants to check out a laptop but all laptops are checked out).

We are not evaluating yet, but we hope to track number of uses and user feedback very soon.

We do some of these things but only the annual user survey is used for evaluation purposes.

**BENEFITS**

20. Please list up to three benefits of providing collaborative teaching and learning tools to library users. N=58

**Supports a collaborative teaching and learning environment N=37**

- Allows for engaging and interactive information literacy education.
- Contribution to student success.
- Directly supports emerging trends in higher education.
- Enables our patrons to collaborate more effectively within existing collaboration spaces.
- Encourages innovation in the classroom.
- Enhances the teaching and research capabilities of our faculty.
- Facilitates collaboration and interaction.
- Fosters team work and creativity among students.
- Group projects are improved in quality and students are more engaged in them.
- Group study rooms and whiteboards are in very high demand as assignments are increasingly collaborative.
- Improved teaching and learning environment.
- Increased student and faculty use of library for meetings and teaching sessions.
- It is another way the library adds to the university’s teaching mission.
- It provides students with options for doing collaborative work.
- Partnerships with faculty.
- Promotes team learning.
- Provides many of the tools they need to produce multimedia projects for their classes.
- Provides students with tools for informal group learning and tutoring.
- Support educational needs of campus.
- Support the changing needs of teaching, learning and research.
Supports a combination of media and information literacy that involves many campus collaborators.

Supports campus initiative to include use of media in classroom instruction and student assignments.

Supports course integrated media assignments.

Supports faculty and student teaching and learning.

Supports faculty with many of the tools they need for their teaching.

Supports important part of student learning.

Supports more creative approaches to teaching and learning.

Supports our faculty’s teaching style.

Supports teaching and learning at the university.

Supports/promotes students’ research and collaboration skills.

Technological tools of this kind are often crucial to teaching methods and to specific academic expectations.

The installation of interactive whiteboards in group study rooms greatly enhances student collaborative work.

The library is providing devices that contribute to student learning.

The opportunity to display, share, or exhibit work with others.

To facilitate group study and research.

Users are provided with tools that support their assignments and learning styles in a comfortable and safe environment.

White boards and plasma monitors in group study rooms allow collaborative study.

**Good publicity and outreach N=28**

Allows us to reach people who might not normally visit [the library].

Brings students and faculty into our space.

Brings users to the library.

Broadens the identity of the library on campus.

Building community with library users.

Fulfills a user need, thus providing good PR.

Good marketing for the library as a technologically relevant place.

Helping to see libraries as beyond books.

Illustrates to the campus the diversity of activities the Library is equipped to support.

Improve image of the library by providing collaborative spaces/tools.

Increase number of patrons using the library.

Increased use of the library.
Increases the sense of the Library as “place” instead of just a facility to use a computer or check out a book.

It brings students into the library.

It makes the library a learning destination.

It’s additional draw to bring people into the library.

Makes us seem up to date, cool.

Making the library highly visible to current and potential users.

Many students come to check out a device and discover to other services and collections.

More traffic into library as instructors use new classroom spaces.

Not providing access to these tools would necessitate that they go elsewhere.

Promotes library’s role in supporting community’s collaboration and technology needs.

See library as a location for collaboration.

Students (in particular) realize that the library doesn’t just house books.

Students appreciate that the library offers more than just books to our patrons.

Students come to the library to use these teaching and learning tools.

These resources bring more people into the library and one of several ways that the library demonstrates it is relevant to student success.

We are an innovation centre on campus.

**Increases access to new technology** N=19

Access to technology for at-risk students.

Allow members of community to experiment with some new technologies.

Encourage experimentation and innovation in use of technology.

Evens the playing field for economically disadvantaged students.

Exposure to the technology.

For a number of our students, provides access to tools they could not afford on their own.

Having these tools around means they are also available to library staff.

Increased awareness of capabilities of tools.

Introduces library users to new technologies.

Learners engage with new technologies.

Many of our students would not have personal access to collaborative teaching and learning tools we provide to them.

Provide a forum for the introduction of and experimentation with new technologies for library staff, students and faculty.
Provide patrons opportunities for exploration and practice using new technologies.
Removes cost barrier for entry to experimentation.
Students and instructors can experiment with new tools.
Students can test out new technologies like the Kindle and iPad.
The library is the only source of these tools for some students.
The opportunity to encounter and use new forms of technology for the first time.
We provide opportunities for use of these tools not available anywhere else on campus.

**Provides skill development for users N=14**

Access to technology for workplace skill development.
Allows staff to be abreast of the latest technology.
Closely tied to various kinds of longer run academic and professional success, within a 21st century knowledge discovery environment.
Creates opportunities for Library staff to assist students, staff and faculty in the new ways they now use, manipulate, analyze and share information.
E-readers & tablet computers raise levels of student technology skills.
Helps students academically and improves their skills for future entrance into the work force.
Library faculty and staff get familiar with these technologies as well.
Opportunity for students to use materials they will encounter in their post-educational work lives.
Prepares students for the workplace.
Provides students with valuable skill-sets that will make their resumes and grad school applications more competitive.
Provides users with practical experience in using the types of technologies and work methods utilized by employers.
Students can gain skills in technology and collaboration.
Students gain experience in technology-mediated collaboration.
We experiment in order to do what we do even better, making us campus experts.

**Provides convenience and flexibility N=13**

Allows for better support of distance and online learning activities.
Allows instructors to take lessons beyond the traditional classroom setting.
Allow library staff to connect with remote users.
Check-out laptops let students take a laptop to class without having to carry one to campus.
Convenient location for users to check out the tools in the library.
Extends learning beyond the classroom.
Laptops provide flexibility for meeting location—not restricted to formal computer classrooms.
Offers flexibility to instructors and students.
Provides flexibility.
Researchers have the ability to perform assignments and use a computer at any physical point in the library.
Some don’t own a laptop, users like flexibility of a laptop.
Some students choose not to bring their own laptops - convenient.
They appreciate not always having to lug around their own laptops.

Enhances experience and service of users N=12
Allow users to make the best use of space.
An enhanced student instructional experience.
Brings students in to the library and provides an opportunity for them to be exposed to other services and information resources.
Contributes to enhancing educational outcomes.
Creates a more dynamic and interactive classroom environment for library instruction.
Improved learning space and higher satisfaction of services.
Improved patron services.
Providing a space with useful equipment for library users to meet and collaborate.
Providing these tools helps students have better success.
Students benefit from flow from formal classroom instruction to group spaces to individual study spaces.
The opportunity to create new kinds of assignments, productive collaborative experiences.
Users of the research commons stay in the library, on average, 3 times longer than those who use other library spaces.

Satisfies user needs N=11
Ability to support educational needs.
Allows us to ‘go where the customers are’ and provide the services our constituents expect.
Availability of laptops for check out makes up for the fact that there are never enough workstations available for the students.
Better meet student learning needs in 21st century.
Desire to give students stuff to play with.
Laptops continue to be extremely popular despite growing percentage of students owning their own.
Meets long-standing requests for this type of equipment by users.

Meets the needs of users.

More tools means more use.

Other units on campus have an outlet to satisfy student needs.

The tools support the way students and researchers want and need to work.

**Keeps libraries relevant, up-to-date N=5**

- Helps the library remain a relevant and desired destination.
- Helps us keep up with the technologies our patrons are using.
- Increasing the relevance of the library to students’ lives and to the ways they learn.
- Provided opportunity for library to be involved in research done on video games and language learning.
- Seeing how our patrons use these tools helps us prepare for future services.

**CHALLENGES**

21. Please list up to three challenges of providing collaborative teaching and learning tools to library users. N=58

**Costs/ Funding N=40**

- Cost (4 responses)
- Funding (4 responses)
- Affording best tools and features for our users.
- Balancing costs against budget for more traditional library materials (e.g., books).
- Budgeting for continued access to the newest technology.
- Buying apps.
- Check-out laptops are easily damaged and expensive to repair.
- Cost of maintaining devices.
- Cost of maintaining equipment.
- Cost of replacing equipment.
- Cost of updating devices at a respectable rate.
- Costs, particularly in maintenance for tools with heavy wear-and-tear.
- Even free apps require having a credit card on file.
Expense.

Funding for staff support to assist with the tools.

Funding for the tools.

Funding to stay current, purchase new tools, etc.

Funding to support the purchase, staff maintenance, and ongoing replacement of technology tools.

Funds to maintain equipment / account for depreciation are not always forthcoming.

Having a reliable budget for renewing and maintaining equipment.

Having sufficient funding to purchase all the devices we would like to have.

High cost of installation and maintenance.

Initial funding.

Loss and replacement costs.

Maintaining ongoing funding for updating the collection of tools.

Money to purchase.

Ongoing costs.

Our resources (staff, money, equipment) are fairly constrained.

Recurring cost of acquiring new equipment.

Recurring funding.

Selecting hardware and software on a limited budget

Staffing the check-out counter for laptops is expensive.

These ventures tend to be expensive, and funding is extremely difficult to come by.

We debated whether the e-readers are an appropriate use of collection development money.

**Keeping up with Technology (Obsolescence) N=22**

Keeping up with the technology. (2 responses)

Being aware of new versions or evolutions in teaching and learning technologies.

Evaluating new ones.

How often do we need to replace our laptop fleet?

iPads are challenging to keep updated.

Keeping abreast of rapidly changing technology.

Keeping current versions.

Keeping technology up-to-date and working properly.
Keeping up with new developments.
Keeping up with rapidly changing technologies.
Keeping up-to-date.
Older equipment becomes obsolete.
Picking the right technology to invest in, since gadgets can change very quickly.
Rapid changes in technology can sometimes make effective evaluation difficult.
Rapidly changing technology.
Replacing equipment with new version on a regular basis.
Some technologies are on their way towards obsolescence by the time a service for them is launched.
Staying up-to-date is a constant challenge.
The equipment becomes outdated relatively quickly.
Things change so quickly, deciding where to invest is a challenge.
Tools become obsolescent.

Training N=19

Training. (2 responses)
... adds a level of complexity for library staff and requires more staff training.
Collaborative teaching and learning tools sometimes require a steep learning curve.
Complexity of the technology requiring staff with specialized skills.
Keeping staff up to date on tools as they change.
Learning curve for library staff to learn and master certain equipment.
Learning curve for students and staff.
Maintaining staff skills in using and repairing devices.
Needs for training of students/faculty.
Staff training / skills to support the use of those tools.
Staff training and staff capacity to support these tools and services.
Staff training in the use of these tools.
Staff training.
Training can be difficult.
Training for faculty and staff in learning these technologies.
Training Library staff on new skills and changing culture to accept rapid pace of change.
Training of staff and users.
Training staff to be able to support new types of technology.

**Maintenance N=16**

- Maintenance. (3 responses)
- Ongoing maintenance. (3 responses)
- Equipment can break or malfunction.
- For the laptops the biggest challenge is maintenance.
- Keeping the tools up-to-date and well maintained.
- Keeping tools in good repair.
- Maintaining a large variety of equipment.
- Maintenance and upkeep are additional challenges.
- Maintenance and upkeep.
- Maintenance of multiple devices and platforms.
- Software and hardware maintenance.
- Upkeep and maintenance of tools.

**Technical support N=11**

- Technical support. (3 responses)
- Difficulty in supporting combination of university-owned and student-owned equipment.
- Getting someone qualified to repair the video cameras and still cameras.
- How to provide technology support and content/reference support at point of need.
- Library IT support for tools that often fall outside the profile of equipment routinely supported.
- Responsibility for troubleshooting devices.
- Support staffing.
- Users not always sure how to use the technology.
- We find ourselves providing support/training for the use of technology tools.

**Public Relations N=8**

- Balancing promotion of use with available devices.
- Communication between partners is essential and any breakdown can negatively impact services and user experiences.
- Convincing Department heads it is really worth doing.
Funding them at a public university can be tricky.

Getting the word out about available equipment.

Instructors are not always supportive or interested in their students using these resources.

Publicizing what we have is a challenge.

Some faculty and staff (including library staff) do not understand why the library is involved in providing these tools to users.

**Staff Workload N=8**

Collaborative tools require staff to handle the troubleshooting. This can be very time consuming.

Introducing, teaching and supporting use of these products are resource intensive.

Limited staff time to learn to use equipment and help users learn to use it.

Making time to learn to use them ourselves.

Managing more expensive technologies [while] reference librarian/staff presence is being reduced.

Managing the circulation of such items and their return.

Must maintain a bigger workload with the same number of hours in a day.

Staff time involved in maintenance of various devices.

**Space Needs N=6**

Creating spaces for users to be able to use collaborative tools.

How to facilitate, staff the space.

Identifying infrastructure, technology and furniture to satisfy a variety of applications.

It’s hard to carve out space for group rooms in the current footprint of our buildings.

Space to house the students using the devices.

They challenge users’ and librarians’ traditional definitions of libraries as quiet, study spaces.

**Keeping up with User Demand N=4**

Balancing a variety of equipment with availability of high-use equipment.

Having enough equipment especially during peak times.

Keeping up with user demand and expectations.

Often “crunch” time of semester where demand exceeds equipment.

**Security N=4**

Coordination between library needs and the parent institution’s IT security measures.
How to best physically secure items which need to be charged.
Things get broken (sometimes stolen).
When tools are lost/stolen.

Development of Policies/Procedures N=3
Establishing device and procedural standards campus-wide.
Inordinate amount of time and effort to develop policies and procedures around new tools and services.
Very difficult to systemize and scale initiatives.

Scheduling N=3
Availability of scheduling and circulation system.
Prioritize library classes over other campus classes desiring to use the library instruction classrooms.
Students frustrated when not able to access rooms when they need them.

Copyright/Licensing
Licensing and copyright and DRM.

Privacy
Many of these tools are designed to be collaborative but not shared.

ADDITIONAL COMMENTS

22. Please submit any additional information regarding collaborative teaching and learning tools at your institution that may assist the authors in accurately analyzing the results of the survey. N=14

Selected Comments from Respondents
We don’t use clickers in library classrooms because we use ABTutor polling or polleverywhere. Instructor’s computers and many librarian computers have Camtasia Relay to record screens and audio. Formal and informal learning spaces have modular and mobile furniture, which we find as significant as devices.
Each Collaborative Technology Lab has instructions on how to use the equipment.
I know that reference librarians have had discussions about bringing in equipment like iPads and ebook readers. I expect that the acquisition of some of these learning tools will be considered over time.
Institutions that utilize collaborative teaching tools must be prepared to continually assess user needs; libraries must also keep pace with the evolving technology to keep from falling behind. Institutions that do not stay current with the
technology run the risk of failing to meet user demands and expectations.

Many of our collaborative learning tools are in our Interactive Media Center. Software plays just as large, if not larger, role in collaborative teaching and learning.

Strong collaboration in this area with the Dartmouth Center for the Advancement of Learning. Along with the Writing and Rhetoric Program and, to some extent, the academic computing department.

The survey seems to indicate that the library offers the service if it is in the library. However, for many information commons, IT services are provided by university/college IT services. While our TECHB@R is right next to the library’s reference desk, and uses our library systems to check out equipment, they are administratively run by another group and cooperatively work with us. Some of the questions imply that the library or IT only, not both.

We anticipate an increase in the availability of these kinds of tools in the library as the library transforms its spaces to better support more collaborative approaches to teaching and learning.

We are in the very early stages of considering collaborative teaching and learning tools, too early to answer any of these questions.

We began our laptop circulation program in fall 2002 with approximately 50 laptops. In spite of rolling out many innovative programs since then, it continues to be one of our most popular and most appreciated services.

We have also introduced touch screens and red/green lights to the outside of each student workroom so students can see if the room is available, and book it on the spot using the touch screen.

We have over 2000 pieces of equipment from a $3500 video camera to $3 audio adapters. Some of our kits have 15 pieces that include chargers, cables, batteries, filters, etc. Over the last 10 years that we’ve been growing to serve the needs of our community we’ve developed extensive policies and procedures.

We recently replaced our circulating laptops with netbooks. Given the lower price of the netbooks, we were able to increase the number we are offering our users.

We’re still fledglings in this effort. We are currently concentrating on providing these tools to library staff in order to help them become familiar and up-to-speed on their usage before making them more widely available to our library users. These responses mainly relate to the Smithsonian Natural History Library, which has specifically been designed for collaboration and training.

Equipment | Video
http://www.library.georgetown.edu/gelardin/equipment

Video Cameras

Canon ZR960

The Canon ZR960 is an entry level SD (standard definition) camcorder that is reliable and simple to use. This camera records to miniDV tape. This camera does NOT provide phantom power to microphones that require it.

Read more...

Flip Video Camcorder

The Flip Video Camcorder records to a 2GB internal memory that downloads internet-ready files for emailing and video sharing sites. The included Flip software helps you easily organize and archive your footage in both Microsoft Windows and Mac. No tapes are required. This camera does not have a microphone input, and therefore does not work with external microphones.

Read more...

Flip Video Ultra HD Camcorder

The Flip Video Ultra HD Camcorder can record up to 120 minutes of 1280 x 720p HD video to the 8GB built-in memory. When you're done shooting just connect the flip out USB arm to your PC or Mac for instant sharing via email or social media sites. The built-in FlipShare software compresses your HD video to an internet friendly size and helps you to email, edit, capture stills from video, and upload. This camera does not have a
microphone input, and therefore does not work with external microphones.

Panasonic DVX-100-B

The Panasonic DVX-100-B is a professional-grade SD (standard definition) camcorder that offers film-like 24-frame per second recording. This camera records to miniDV tape. This camera DOES provide phantom power for microphones that require it.

Sony HVR-1000U

The Sony HVR-HD1000U is an HDV camcorder specifically designed for videographers looking for a shoulder-mounted camera. Ideal for event work, the camera has minimal external controls and is capable of recording in SD (standard definition) or 1080i HDV (high definition) directly onto a regular MiniDV tape. Recording to harddrive is possible with this camera, but not supported by the GNMC. This camera does NOT provide phantom power to microphones that require it.

Sony HVR-Z1U

The Sony HVR-Z1U is the more professional version of the HVR-1000U and includes more external controls, similar to the Panasonic DVX-100-B. This camera is capable of recording in SD (standard definition) or 1080i HDV (high definition) directly onto a regular MiniDV tape. Recording to harddrive is possible with this camera, but not supported by the GNMC. This camera DOES provide phantom power for microphones that require it.

Canon XA10 Kit

The Canon XA10 camcorder is a fully featured, ultra-compact AVCHD pro video camera that includes 64GB of internal flash memory.

Sanyo VPC-HD2000
The Sony VPC-H2000 is an entry level HD (high definition) camcorder that is reliable and simple to use. This camera records to SDHC memory card. This camera does NOT provide phantom power to microphones that require it.

You can view a tutorial for this camera here.

---

**Canon Vixia HF R11**

Canon’s VIXIA HF R11 Dual Flash Memory Camcorder provides you with 1920 x 1080 HD recording, 2MP digital still capture, and a myriad of additional features and functions. In addition to the camera’s 32GB built-in flash memory, the HF R11 also records to SD/SDHC memory cards.

*This camera shoots in AVCHD format. A quick reference guide is included with this kit for iMovie and Final Cut Pro users.*

Additional info:

---

**Video Accessories**

**Bescor A/V Bracket**

The Bescor VB-50 A/V Bracket attaches to tripod mount of your camcorder. The VB-50 can be mounted to the camera alone, or between the camcorder and tripod. A rubber side grip allows for comfortable use.

A top (cold) shoe mount allows for the addition of video lights and microphones.

---

**Bescor On Camera Light**

The Bescor LED-70 is an on-camera, dimmable, daylight balanced (6500°K) LED light designed to combine bright output with a compact, highly flexible form factor. Powered by either 4 standard AA batteries or an optional AC power adapter, the unit’s 96 LED bulbs produce an ultra bright, 70W-equivalent beam with a reach of up to 30 feet.
PRESENTATION REHEARSAL ROOMS

The Library & Clough Commons Presentation Rehearsal Rooms are an ideal space on campus to practice and put the finishing touches on classroom presentations.

Room 441
Capacity = 10
Technology = 1 Projector, PC, Laptop Connection
- [Request Now](http://www.library.gatech.edu/about/rehearsal.php) (allow 3 business days for approval)
- [Reserve a Room Tips](http://www.library.gatech.edu/about/rehearsal.php)

Room 443
Capacity = 8
Technology = 1 Flat Panel Display, PC, Laptop Connection
- [Request Now](http://www.library.gatech.edu/about/rehearsal.php) (allow 2 business days for approval)
- [Reserve a Room Tips](http://www.library.gatech.edu/about/rehearsal.php)

Room 448
Capacity = 9
Technology = 1 Flat Panel Display, Document Camera, PC, Laptop Connection
- [Request Now](http://www.library.gatech.edu/about/rehearsal.php) (allow 3 business days for approval)
- [Reserve a Room Tips](http://www.library.gatech.edu/about/rehearsal.php)

Room 450
Capacity = 6
Technology = 1 Flat Panel Display, Document Camera, PC, Laptop Connection
- [Request Now](http://www.library.gatech.edu/about/rehearsal.php) (allow 3 business days for approval)
- [Reserve a Room Tips](http://www.library.gatech.edu/about/rehearsal.php)

Library Rehearsal Studio (Room 109)
Capacity = 12
Technology = 1 Flat Panel Display, PC, Laptop Connection
- [Request Now](http://www.library.gatech.edu/about/rehearsal.php) (allow 3 business days for approval)
- [Reserve a Room Tips](http://www.library.gatech.edu/about/rehearsal.php)

**Policies**

- Please allow up to 3 business days for your room request to be approved.
- All rehearsal rooms may only be reserved by currently enrolled GT students, faculty or staff.
Rehearsal rooms are intended for rehearsing, class presentations, job interviews, and similar activities.

- All rehearsal rooms must be reserved in order to be used. No walk-in use is permitted without making a reservation through GT Events.
- No food/drink is permitted in rehearsal rooms.
- All rehearsal rooms are available to reserve up to 2 weeks in advance.
- Reservations cannot exceed 2 hours.
- Please cancel your reservation online if you do not need to use the room.
- Users are requested to turn the plasma screen and digital camera off after use and to leave the room orderly.

For technology assistance users may:

- Ask for help at Library Services Desk or the Clough Commons Core Desk
- Go to the [http://classrooms.gatech.edu](http://classrooms.gatech.edu) web page
- Refer to the handout at the podium
- Problems with the technology in the rehearsal rooms can be reported 24 hours per day to the OIT Machine Room at (404) 894-4669.
Collaborative Spaces in Middleton Library for Students

Group Collaboration Spaces

All group collaboration spaces consist of a single computer with a large plasma screen, seating for groups of 4 to 8 people, and collaboration software. The collaboration software allows group members to connect to a session with their laptops via wireless if they choose. Once connected, participants can be granted control of the central computer or share their screens with the group on the large screen.

Locations

Library Maps

- 1st floor (Walk-ups)
  There are (3) GLCs behind the Reference Desk in room 141. Another four are in room 126 around the corner from CCs.
- 3rd floor (Walk-ups and Reservations)
  There are (4) GLCs total on the 3rd floor: rooms 300 T, 300 V, 300 I, and 300 N.
- 4th floor (Walk-ups and Reservations)
  There are (4) GLCs total on the 4th floor: rooms 400 T, 400 V, 400 I, and 400 N.

Presentation Practice Rooms

The presentation practice rooms are configured much like multimedia classrooms, consisting of a lectern, computer, and very large plasma screen. Additionally, video cameras are installed so that students may record themselves delivering their presentations and review their performance at their leisure.

Locations

Library Maps

- 3rd floor (Walk-ups and Reservations)
  There is (1) PPR on the 3rd floor: room 312.
- 4th floor (Walk-ups and Reservations)
  There is (1) PPR on the 4th floor: room 412.
How to use the calendar

1) Using the drop-down box to the upper right, select which room(s) availability you would like to view.

2) For instance, to view only the 4th floor collaborative spaces, select calendars 400 T, 400 V, 400 I, 400 N, and 412.

Making Reservations

Rooms may be reserved in three ways:

- Emailing lsunibstudy@gmail.com
  Include the following: your name, the members of your group, and the title of your study group. Please include ‘Reservation’ in the subject field of your email.

- Calling 225-578-6926 or 225-578-6927
  Library staff will assist you in making a reservation over the phone.

- Visiting room 305 or 405 of Middleton Library
  Library staff will help you make a reservation in person at the stack offices of the 3rd and 4th floors.
Rules

All room reservations must end one hour before the library closes.

Rooms are available for reservation by current LSU students only. Instructions for faculty on how to reserve a classroom in the library can be found here.

Requests will be processed no later than the beginning of the next working day.

Please note that you are responsible to appear with at least two other LSU students on time for your reservation and you must present LSU IDs with legible writing and photo.

Please also note that you will be held responsible for any damage to the equipment, furniture, or to the room itself during your reservation.

Reservations can be made up to one week in advance. The time limit for a reservation is 3 hours. You cannot make more than one reservation for one room at a time. Reservations made by one person apply to the whole group.

The room will be held for you for fifteen minutes past the reserved time. If you have not arrived by then, it will be made available on a first-come, first-served basis until the time for the next scheduled reservation.

These regulations are subject to change. Their interpretation is at the discretion of the staff member on duty in the stacks office.

SUPPORT

IT Help Desk, Middleton Library Room 141, 225-578-3375, for logon questions, or opening a trouble ticket.

Lab Technology & Software Support, Middleton Room 141, 225-578-0008, for assistance with the collaboration and presentation practice equipment.
Hardware Devices

- M.I.D.E.N.
- Stereowall
- 3D Printer
- PDM Machine

Collaborative Technology Labs

Create, Design, Share in these high-tech, multimedia, group work spaces. Rooms are available for reservation. Use your MSU NetID when reserving a room. Visit our Reservation System to reserve a room now.

Note: If your library account is blocked from checking out MSU Library material (by fines, bills, overdue recalls, etc.), that situation must be resolved before you may check into the room. Login and check your library account here.

The Collaborative Technology Labs are intended to support student group projects assigned in MSL academic courses. Occupants may be asked to vacate the Lab if it is not being used for its intended purpose.

Select a Lab to Learn More:
- Presentation Lab
- Smartboard Labs
- Copy Center Lab
- Interactive White Board Lab
- SmartBoard Lab
- Additional Labs are located in the Engineering Library and the Business Library

Have you checked out a CTL?
Take our survey and tell us what you think!

Need Help?
Collaborative Technology Labs Printing and Software Help
List of software on lab computers - All labs use Full App machines

Presentation Lab:

Location: Room E118 (1st floor, East Wing)
Check In: Circulation Desk
Have a Speech or Presentation to give? Practice and Video and Audio Record Speeches and Presentations. Playback in the room or take the DVD with you.
Play DVDs and Blu-Ray discs on the computer and project them onto the Smart Board. Use the Interactive Smart Board and computer to enhance group work and collaborative efforts.
Reserve a Lab

Smartboard Labs:

Location: Rooms W101B and W101C (1st floor, West Wing)
Check In: Circulation Desk
Use the Interactive Smart Board and computer to enhance group work and collaborative efforts. The computer will play DVDs and Blu-Ray discs and will project them onto the Smart Board
Reserve a Lab

Copy Center Lab:

Location: Room W217 (2nd floor, West Wing)
Check In: Reserves Desk
This Lab has two computer lab computers. One Mac and one PC.
This room is equipped with a moveable table, power outlets for your laptop, and a whiteboard.
Interactive White Board Lab:

**Location:** Digital Multimedia Center, Room W426E (4th floor, West Wing)

**Check In:** Digital Multimedia Center Desk

Do your group work in a comfortable room with a white board that can save your work, print your work, or save it to the web. No need to copy your ideas into your notebook. You can just print, save, or e-mail whatever you write on the board. The room also includes a Mac computer with all the computer lab software on it.

**Reserve a Lab**

SmartBoard:

**Location:** Digital Multimedia Center, Room W426F (4th floor, West Wing)

**Check In:** Digital Multimedia Center Desk

Use an interactive Smart Board to project your work from the computer screen or from your laptop. The computer will play DVDs and Blu-Ray discs and will project them onto the Smart Board. VHS playback available upon request.

**Reserve a Lab**
Media Resources Support

Media Resource Support for Your Teaching and Research

Media can convey information in powerful ways and is ever increasing for instructional use. Finding the right image to use in your research or the perfect film that covers an issue from a certain perspective can be a challenge.

Whether we own it or the media is available online, Media Services will work with you and your subject librarian to help find, access, and use quality media (e.g., videos, images, audio) to support your teaching and research. For example, we can help you create a custom media bibliography for your course.

For media resource consultation contact: Scott Spicer | 612.626.0629
For immediate assistance with short term course video reserves contact:
SMART Learning Commons | 612.624.1584 or Jennifer Velle | 612.624.6536

Request a Media Purchase (Video, Image, Audio Formats)

To request a library purchase of video or other media resources, please contact your subject librarian.

Subject Librarians: I am familiar with many of the major media vendors and willing to negotiate a discount on a limited basis depending on the situation (e.g., digital media database licensing, replacement or second copies of DVD's, bulk DVD purchases from educational/independent film vendors). Please contact me for further assistance.

Support for Media Conversion and Clip Creation

In the SMART Learning Commons (Walter location) we have the equipment and staff expertise to assist you with video clip creation from VHS/minIDV/DVDs, audio clips from LP/CD/cassette, and still image scanning. We can also advise on ways to integrate the media into your course or research once they have been created.* Schedule an appointment with our media specialist to assist with your media creation needs.

Note: although there are several different legal provisions that support educational use of 3rd party content, capturing, re-using and distributing 3rd party content from any source without permission always raises significant copyright issues. Capturing content from DVDs and many other video sources may also raise separate issues relating to the "anticircumvention" provisions of the Digital Millennium Copyright Act. Though we may be able to provide some general guidance, copyright consideration is ultimately the patron's responsibility. See the Libraries Copyright website or contact the Copyright Librarian, Nancy Sims, for further information.
Streaming Video

The Libraries have licensed several packages of streaming video full length video (see our Digital Video Collections Guide for a more comprehensive list of licensed/open video collections). These titles are great for screening in class, provide supplemental content to compliment classroom subject matter or assist students in better grasping a difficult concept on their own time (embeddable into Moodle):

Films OnDemand Streaming Video

Films OnDemand provides access to streaming video on a wide range of discipline areas from Arts & Humanities to Professional Programs (e.g., Nursing, Business). Access Films OnDemand collection: Films OnDemand

Search MNCat for Films OnDemand titles.

Note: We recently renewed our licensed over 20 titles, with plans to subscribe to more titles as collection and instructor needs develop. If you would like to request that we subscribe to a title, please check out the Films catalog of streaming media and contact either your subject librarian or help desk for order consideration.

Alexander Street Press Streaming Video

Alexander Street Press Video packages provide access to collections of discipline specific collections in a number of subject areas. Currently, the Libraries subscribe to the collections Theatre in Video (250 performances), Dance in Video (492 performances), Opera in Video (260 performances), and Counseling and Therapy in Video (352 titles).

Ambrose BBC Shakespeare in Plays Video Series

We now have access to 37 streaming video titles from the critically acclaimed BBC Shakespeare in Plays series!!! To access the collection, either browse through titles on the Ambrose video site directly (click on the "BBC Shakespeare" link below) or search for MNCat for individual titles.

Digital Image Resources

Media Services has developed a comprehensive interdisciplinary guide to digital image resources that covers 85 subjects and features amazing online collections and licensed image databases such as ARTstor, ArtHistory TV, Birds of North America Online, and Carpaccio.

Announcing Recent Subscription to AP Images!!

AP Images is one of the world’s largest collections of historical and contemporary imagery, with a 50 million-image print and negative archive. As an essential source of photographs and graphics for professional image buyers, AP Images strives to meet the needs of today’s global customer through superior image quality, selection and service. Search AP Images.

ARTstor Tutorial

Consisting of over one million images curated from thousands of interdisciplinary museum, institutional, and user-generated collections, ARTstor is one of the most commonly used resources for specialized images. Watch the video below to learn how to access and navigate ARTstor, just one of several ARTstor YouTube videos.
Equipment Available for Checkout

Love Library has digital cameras, digital camcorders, digital projector, external hard drives, digital audio voice recorders and microphones for UNL students to check out.

In order to check out equipment from Love Library, a user must first receive a short orientation on how to use that piece of equipment and sign an Equipment Use Agreement form. Training is available in the Media Services department in Love Library's second floor. You must present your NU ID card for the orientation and everytime you check out the equipment.

Once you've gone through orientation, you can check out the equipment for which you have been trained to handle. You do not need to go through training every time you check out an item, unless it is a piece of equipment for which you have not yet been trained.

If you have questions about the circulation of equipment or the training, please call the Media Services desk at (402) 472-6039.

---

Media Services:
phone: 402-472-5039

### Equipment Checkout Policy
- Items will be checked out from and returned to the Media Services department of Love Library (Room 201). Do NOT use the book drop boxes or circulation desk when returning items.
- Must have current UNL ID card present to check out equipment.
- Library record must be in good standing to check out equipment. (No blocks on record, fines etc.)
- Borrowing is on a first-come-first-served basis.
- A student may not check out two or more cameras at one time
- All digital equipment may be borrowed for 3 days (72 hours). Portable hard drives check out for 7 days.
- No renewals allowed. When an item is returned, please wait 24 hours before checking equipment out again.
- **Overdue fines are $5 an hour**, with a maximum fine of $25. Overdue notices are sent as a courtesy only.
- While equipment is in your possession, you are responsible for it at all times. You may not loan it to anyone else. DO NOT LEAVE EQUIPMENT UNATTENDED. If an item is not returned, you will be charged for the replacement.
- All equipment must be present to check in item. If any equipment is missing, the item will stay on your record until every piece is returned. PLEASE NOTE: Fines are not waived for overdue equipment caused by missing items.
- If items fall into MISSING STATUS:  
  - A registered letter will be sent and police will assist in recovering equipment  
  - You will be banned from future equipment checkouts
- If any equipment is damaged while in your possession, you will be responsible for the cost of the repairs, not to exceed the replacement cost of that item.
- Replacement costs vary according to type and model of hardware, and we reserve the right to purchase an equal or similar model in case of discontinuation.
- Equipment cannot be used in violation of the law or of the University of Nebraska-Lincoln policies.

PRODUCTION AREA
The production area of The Studio offers space and equipment for digitizing and working with media materials. Workstations in the production area are PowerMac G4s and Dells with Pentium III processors. These stations are connected to a variety of input equipment for analog to digital and digital to analog conversions.

INPUT EQUIPMENT
- VCR Players
- DVD Players
- Laserdisc Players
- CD Players
- Audio Cassette Decks
- MiniDV Deck
- S-VHS Deck
- Small & Large Format Flatbed Scanners
- Slide / Negative Scanners
- MIDI Keyboard
- Turntable
- Microphones
- Media Converters
- Wacom Pen Tablet
- Jog Shuttle (for Final Cut Pro)
- Photo Quality Inkjet Printer

MULTIMEDIA / GRAPHICS
- Adobe Photoshop
- Adobe Illustrator

STUDIO FALL & SPRING HOURS

revised 01/13/02
What is the Studio?
The Media Center Studio is a digital media lab. It provides media equipment, computers, software, and consultation services for the creation of media-enhanced instructional products. It also provides computer access to electronic text resources and digital image collections in the library. Services are available to students, faculty, and staff of the University of Tennessee. Our goal is to provide media computing resources, a trained staff to provide assistance, and information about campus-wide training opportunities for students.

Where is the Studio?
The Studio is located in the Media Center of Hodges Library (room 245).

What can be done in the Studio?
The Studio is open to any UT student, faculty or staff. The Studio provides the necessary equipment, software, and assistance to create media-enhanced assignments, which is its primary purpose. The Studio is not designed to be a location for the conversion of personal collections such as converting an entire LP collection to CD. OIT has labs available for checking email, surfing the Internet, uploading content to Blackboard, general word processing and basic scanning.

What do I need to bring with me to work in the Studio?
A valid UT ID.

If you are saving your work, bring media (zip disks, blank CD’s, DVO’s, MiniDV tapes, VHS Tapes).

Plan for your project by learning unfamiliar software programs ahead of time.

Should I make a reservation?
YES! Studio workstations and checkout equipment are in high demand, so users are encouraged to reserve time and equipment. Priority will be given to users who have made a reservation in advance. To make a reservation, please go to our website at http://www.lib.utk.edu/mediacenter and fill out our reservation form. We will contact you within 2 business days with information regarding your request. You may also make a reservation via telephone or in person.

Workstations may be reserved for up to 3 hours per session. If you are editing video you may reserve up to 5 hours at once.

We expect users to be on time for reservations. Reservations will be held for 15 minutes after which the workstation or equipment may be assigned to someone waiting.

What equipment can I check out?
The Studio circulates miniDV cameras, digital cameras, a minidisc recorder, microphones and tripods. You need to attend a course to use the equipment. In addition, users must sign a contract agreeing to be responsible for any damaged or lost equipment.

Where can I save my work?
Files saved on Studio computers will be deleted. Most of our workstations have CD-RW drives and zip drives available for your use. Some production workstations also have DVD-R drives. You must provide your own media to use these. For large projects involving video, we recommend an external Firewire hard drive. Storage space (50MB) is also available on your VoISpace at http://voispace.utk.edu. If you have questions, please contact us.

Note: Disruptive behavior and the use of cell phones are not permitted in the Studio. The installation of unauthorized software is PROHIBITED.

Loan Policies and Agreements
University Libraries
Laptop Lending Agreement

Please read this agreement completely before signing. It must be signed before a laptop is checked out to you. This agreement will be kept on file by the University Libraries.

I understand the following:

1. Only UAlbany faculty, staff and students may borrow a laptop. Blocks due to outstanding library financial obligations will prevent laptop loans.
2. A laptop is to be used only within the library building from which it is borrowed.
3. The loan period is 4 hours or until 30 minutes before closing, whichever is less, with no renewals and no overnight lending. No laptops will be loaned within 30 minutes of building closing.
4. Overdue fines are $15/hour or part of an hour, to a maximum of $225 even if the library is closed.
5. Files must be saved to an external drive.
6. I am responsible for this laptop at all times — I will not lend it to anyone else. I will not leave the laptop unattended. If the laptop is stolen or damaged while checked out to me, I am liable for replacement charges.
7. There is no direct method of printing from this laptop. Plan accordingly.
8. Laptops not returned within three days past due will be declared lost and I will be billed for replacement based on the items lent to me. A Student Accounts block is in effect until full payment is made. Failure to pay library invoices may result in a referral to a collection agency.

I agree to the following:

1. I am responsible for checking the printed TIME DL on my receipt and obtaining a return receipt.
2. I am responsible for the return of all pieces which accompany the laptop based on the inventory completed by library staff for each loan. I will pay the replacement cost of any laptop peripheral lost, stolen, not returned, or damaged beyond repair while checked out to me. I will pay the full replacement cost of $2,195 if the laptop is lost, stolen, not returned, or damaged beyond repair while checked out to me. If I fail to pay the replacement cost, I understand that such payment due will be added to my student account and that such monies owed could impact my ability to enroll in classes, graduate, and obtain transcripts.
3. I may not copy any software to or from the laptop and I may not deliberately attempt to make modifications to the machine including to the software, hardware and system settings.
4. I agree to abide by campus information technology policies [http://www.albany.edu/its/cio/glance_it_policies.htm].
5. Failure to abide by these terms may result in my future ineligibility for this service.

My signature below indicates that I understand and agree to abide by the policies of UAlbany's laptop lending program while I am affiliated with the University.

Last revised 7/30/08
TECHB@R Equipment Lending Terms and Conditions

I understand that:

- I will not be eligible for the lending program if I have $100 in outstanding library fines or any lost items.
- Any personal data saved on the item will be removed when the item is returned.
- Laptops reset their configurations and remove personal data when rebooted or powered off.
- I am responsible for all personal data or damage.
- If a device has multiple pieces or accessories, I am responsible for making sure they are all returned.
- I will not drop any equipment off in a book drop-off slot; I may be fined a lost/damaged item fee if I return my item in this manner.
- Lending is by currently registered faculty, students, and staff.
- Items may only be returned to the TECHB@R, Regenstein circulation desk, or Regenstein entry control desk.
- I may have three in-person renewals of an item. After three renewals, I must wait a minimum of one day before borrowing the same item type again. Renewals may be refused if an item is renewed late or an item type is popular.
- These terms and conditions are subject to change without prior notification.

Available Equipment

The following equipment is available to currently registered faculty, students, and staff free of charge. Equipment that would be due after the TECHB@R closing is instead due one hour after opening the next day. Laptops come with a power adapter and carrying case. Both have the same late fees as the laptop itself.

There is up to a $5 fee for lost bags/vinyl satchels, and a $50 fee for lost laptop carrying cases.

iPod and Nook Color Loans

Check out an iPod Version 1 or a Nook Color from the Music and Media Library!

Music & Media Library circulation desk
Level 4 in the Woodruff Library Building

We currently offer iPods Version 1 and Nook Colors and their corresponding power adaptors and USB cords.

Please note the following policies about the program:

- Emory University students must present their Emory Card to checkout an iPod or a Nook Color. Emory University faculty and staff must present their Emory Card or driver's license.
- iPods and Nook Colors check out for two weeks, with no renewals.
- Overdue fines are $5.00 per day, with a $250 fine for any Nook Color and a $600 fine for any iPod that is lost, stolen, damaged beyond repair, or not returned.
- If an item is brought back to the library incomplete (without the A/C adaptor, sync cable, cover or carrying case), the patron will be given an extra day to gather the missing pieces. If any pieces are lost, patron will be charged replacement costs.
- If the Music & Media Library is closed, iPods and Nook Colors must be returned to the Security Desk on Level 2. The $5 per day overdue fine will accrue until the device is checked in the following morning.
- Charges for damage will be assessed based on repair cost.
- In order to download Barnes & Noble Nook content, you can deregister the Nook Color and register it to yourself rather than the Music & Media Library.

Nook Registration Instructions

iPods and Nook Colors are available on a first come, first serve basis. Please check discoverit for availability:

Site design by: Shearlot.
Gelardin New Media Center Equipment Use Policy

Our equipment offerings are vast and varied. We have simple gear for simple projects, and professional gear for true (aspiring) professionals.

Policies

1. Equipment check-outs are for 24 hours only. Plan accordingly.
2. Reserve equipment by phone (202-687-7410) or in person. The GNMC is located on the 1st floor of Lauinger library.
3. Please be on time to pick up your gear, or call to let us know you will be late. Due to high demand, we reserve the right to cancel your reservation if you are more than 30 minutes late.
4. Fines for equipment kits are $5 per hour late. Bring your equipment back on time! See detailed fine information under the library's borrowing policies.

General tips:

1. When you receive your equipment, check that your battery is charged and that your equipment works. The GNMC charges batteries and inspects equipment regularly, but as responsible producers, it behooves you to check your gear before taking it into the field.
2. Almost all of our video cameras record to miniDV tapes, which you need to purchase yourself. Be prepared! The GU Bookstore carries miniDV tapes.
3. If you are picking up more than 2 pieces of bulky equipment, consider bringing a friend or also reserving an equipment cart to help out.
4. We very highly recommend that you learn how to use your equipment before renting it. We have online tutorial and guides, or you can schedule a one-on-one consultation for hands-on guidance. Training is mandatory for some equipment. See below for details.

NEW Fall 2011 - Training is mandatory for some equipment.

For the safety of our advanced equipment, some items require that you receive in-person training before you can reserve it or check it out. Previously, the below items did not require any training.

Will users be able to make a reservation for equipment that they are not trained on? You will only be able to reserve restricted equipment after completing a short training. Workshops are offered weekly and consultations can be scheduled 3 days in advance. Please plan ahead, and contact us if you have any questions.

What about returning users who have used the equipment before? You will need to take the training even if you have used restricted equipment.
In the past. However, if you wish to forego the training because you are confident in your experience with the equipment, you may speak to a supervisor about becoming an authorized user. To speak to a supervisor, please come to the front desk during normal hours or give us a call at 202-687-7410. The supervisor will ask you a couple of questions about your experience.

Restricted equipment includes:
1. Panasonic VX-11K video camera
2. Sony HVR-1000U video camera
3. Sony HVR-Z1U video camera
4. Sennheiser Wireless Lavaliier Microphone Kit
5. Sennheiser Dual Wireless Lavaliier Microphone Kit
6. Marantz 66C audio recorder
7. Marantz 67C audio recorder
8. 3-Light Kit
9. On-Camera Light Kit
10. Advanced Tripod
EKSTROM LIBRARY KINDLE LOAN AGREEMENT

I UNDERSTAND AND AGREE TO THE FOLLOWING:

1. THE LOAN PERIOD IS TWO (2) WEEKS WITH NO RENEWALS
   If the Kindle is lost, stolen, or not returned, charges of $300.00 will be placed on my account.

2. I AM RESPONSIBLE FOR RETURNING THE KINDLE IN GOOD WORKING CONDITION.
   If the Kindle is lost, stolen, or damaged while it is checked out to my account, I am responsible for
   repair or replacement fees of up to $300.00. If a Kindle is returned on time but
   damaged, the replacement fee is $300.00. Any student accounts will be Bursar Blocked until
   replacement fees and fines are paid.

3. I WILL NOT DELETE EXISTING CONTENT OR RE-REGISTER THE KINDLE.

4. I WILL NOT ATTEMPT TO ADD NEW CONTENT TO THE KINDLE.
   The Kindle must be returned with the same content loaded on it at time of check out.

5. I WILL RETURN THE KINDLE TO MEDIA RESOURCES SERVICE DESK STAFF AND WILL
   NOT PLACE IT IN ANY BOOKDROP.
   Failure to return the Kindle directly to the Ekstrom Library Media Resources Desk staff will prohibit you
   from borrowing a Kindle in the future.

6. I AGREE TO PROVIDE FEEDBACK ON THE PILOT WEB SITE.

Play and Discover (+)

MRC Equipment Loan Policies (+)
The purpose of the Media Resources Center equipment checkout policies follows from the mission of the Media Resources Center to serve the instructional and curricular needs of the University community and the individual study, scholarship, cultural enrichment and recreation needs of UNC students and faculty.

To borrow equipment from the Media Resources Center, the patron must present a valid UNC OneCard. Equipment will not circulate during the first two hours MRC is open or during the last two hours MRC is open. Video cameras, still cameras and accessories may be borrowed for 2 days (over 2 nights) at a time. Patrons will be charged $13.00 for every hour (or partial hour) that the equipment is overdue. Please note that there is no maximum fine for overdue equipment. If a patron returns equipment late, they will require a one-time warning in addition to their fine. Returning equipment late a second time will result in not being allowed to check out equipment for the duration of the semester.

Borrowers will be held responsible for damages to all equipment while it is checked out to them. This includes, but is not limited to theft, abuse or misuse of equipment (both unintentional and intentional), neglect, or carelessness. Patrons will be responsible for paying the University of North Carolina a replacement charge plus a processing fee for damage to or the loss of the equipment and accessories issued to them up to a maximum of $4,000. These charges will be added to the same collection procedures that are used for fines or fees for damaged or lost materials, meaning, they will be added to your UNC account payable at the Cashier’s office. Damage, destruction or loss must be reported to the Media Resources Center no later than the beginning of the next workday following knowledge of such damage, destruction or loss.

MRC staff will inspect equipment upon its return before discharging it from the borrower’s account. This will be done during the first two hours MRC is open and during the last two hours MRC is open on a given day. If damages are noted, MRC staff will contact the borrower to assess fines.

Returns are not accepted. This is to ensure that MRC staff has time to inspect equipment. Equipment that is loaned out will be assumed to be in proper working order unless a checkout supervisor has noted otherwise. Borrowers will not be held responsible for previous damages.

Reservations must be made for all equipment. Patrons can reserve equipment starting the day after it is due to be returned (this includes a 2 day loan plus 24 hr for staff inspection). Patrons may only reserve one item at a time. Patrons may borrow only one video camera or still camera at a time. The 2 day loan period begins on the day of the reservation, no matter when the patron arrives to pick up the materials. Please note that reservations are subject to availability of working equipment.
Guidelines for Equipment Lending from Digital Collections

1. Eligibility: Digital Collections equipment loans are free of charge and available only to current faculty, graduate students, and NU staff with valid Wildcats. Only the faculty, graduate students and NU staff may handle or use the equipment while it is on loan. Equipment is lent to an individual who assumes the financial risk for the complete equipment set until all equipment is returned.

2. Equipment usage: Equipment is available for curricular and extra-curricular purposes. Equipment may be used both on-campus and off-campus. All patrons are expected to adhere to all computing policies as described at http://www.library.northwestern.edu/policies/comput. 

3. Equipment reserve, pick up and return: Equipment can be reserved up to one month in advance, and recurring reservations can not be accommodated. Equipment must be reserved via email or telephone to the Digital Collections Department. Proxy users will not be permitted to pick up or drop off equipment. Equipment not picked up within one hour of the scheduled pickup time may be checked out by other patrons. Equipment may not be picked up or returned at any other location - only at Digital Collections in 2 East Tower. Equipment must be picked up and returned during opening hours, 8:30-5:30 pm Monday-Friday.

4. Loan period: The standard loan period is up to 72 hours. Longer loan durations of up to one week will be approved in special circumstances. Loan durations of over one week are not allowed except through written approval and approvals. To submit a request for longer loan periods, please email digitalcollections@northwestern.edu explaining your need and the equipment requested. Once equipment is returned to the Digital Collections Department and checked by staff, an item may be borrowed again, if available.

5. Training: Patrons are required to complete a 10 minute, in-person training with Digital Collections staff before borrowing equipment for the first time. To ensure staff are available, please make an appointment for this training. Appointments can be made via email or phone and are only available during opening hours, 8:30-5:30 pm Monday-Friday.

6. Signed statement: Patrons are required to sign a statement acknowledging receipt of the equipment and the terms of the loan before equipment is lent - including financial responsibility for damaged or lost equipment and fees for late return. Equipment will be checked by Digital Collections staff to confirm its good condition before loan is made.

7. Fines and Fees: Patrons are financially liable for any items not returned on time or returned requiring repair or replacement. For items not returned on time, a late fine of $25 per day will accrue for the first week. The full replacement cost will be charged for all equipment not returned by one week after its due date.
   a. All fines related to repair and replacement costs will be charged to the person who checked out the equipment.
   b. Fines are invoiced and payable by credit or debit card only.

8. Receipt upon return: When equipment is returned, DC staff will inspect all equipment for visual damage or missing items. Patrons will receive a return receipt that acknowledges return of all items, or notes any exceptions. Equipment return may take up to 10 minutes to check all equipment components and cables. The patron is expected to stay until the return process is complete and the return receipt is generated. Patrons are financially liable for any missing cables or components, including items or damage discovered after the generation of the return receipt.

9. New service: Equipment lending to faculty is a new service, thus guidelines and procedures may change. Availability of equipment is dependent on future funding.
Statement of Responsibility

I have read this document & fully understand its terms and my obligations. I understand that this document is contractual in nature and my signature below indicates my agreement with the below & side two statements.

Name (please print):

Date ____________________________

Email ____________________________

Current Local Address ____________________________

City, ST Zip ____________________________

Local Phone # ____________________________ OSU Student ID # ____________________________

Responsibility

1 I understand that the laptop is my responsibility while it is checked out to me. I will take all reasonable precautions to protect it. If others use it while it is checked out to me and damage or loss occurs, I understand that I will be held liable for any loss, damage, or criminal acts that may occur.

2 I agree that I will be responsible for repair or replacement of the computer and its accessories due to any loss, damage, or theft (see accompanying estimated repair and replacement cost sheet). I understand that replacement cost of the laptop is approximately $2500 or current market price.

3 I understand that it is my responsibility to make arrangements with Oklahoma State University to pay any and all charges incurred as a result of improper use, loss, or theft of the laptop. Failure to do so may result in an inability to register for classes or receive my diploma or transcripts.

4 I understand that if the laptop is stolen I must notify Library Personnel at the Circulation Desk (first floor) immediately and file a theft report with the Oklahoma State University Campus Police.

Shortterm Laptops

1 I understand that laptops can be checked out for five hours and can leave the building.

2 I will follow the policies and guidelines for laptop use in the library and understand that these rules are subject to change.

Longterm Laptops

(OSU Faculty & Staff Only)

1 I understand that University Library Laptops have two loan periods. Short term loans are for five hours and can leave the building. Other Laptops can be borrowed for 7 days and renewed for an additional seven days.

2 I will follow the policies and guidelines for laptop use in the library and understand that these rules are subject to change.
Use guidelines
1. I agree to adhere to the terms and conditions outlined in licensing agreements including but not limited to licensing grant restrictions, copyright restrictions, and transfer restrictions.
2. I agree to adhere to use policies for uniform access computing as outlined by Oklahoma State University and other Student Technology Fee Laboratory restrictions or requirements.
3. I understand that the hard-drive is rebuilt after each use and anything I might save there will be erased. If I wish to save any data, it must be to a floppy or my network drive.

Liability
1. I understand that Oklahoma State University is NOT responsible for loss of data or damage to files that may occur due to the use of the laptop computer.
2. I understand that this agreement must be renewed each academic year and that a loss of privileges will occur for a failure to comply to these policies and guidelines.
3. I am currently enrolled as a student of Oklahoma State University, Stillwater or Tulsa or currently employed as an OSU Stillwater Faculty or Staff member.

Laptop Damage Rates
- Replacement due to loss or damage (including failure to return the laptop) $2500 (or current market price)
- Intentional vandalism (includes any scratches or marks on any part of the laptop, removal or rearrangement of keys, or any other malicious damage) $100 minimum charge or actual repair cost
- Display hinge broken or inoperable damage due to misuse or negligence $100 minimum charge or actual repair cost
- Damage which impairs operation of the laptop or any peripherals for 5 working days or longer $100 minimum charge or actual repair cost
- Missing floppy drive $100 minimum charge or actual replacement cost
- Missing CD Drive $100 minimum charge or actual replacement cost
- Missing SWDvd/CDRw $100 minimum charge or actual replacement cost
- Missing battery $100 minimum charge or actual replacement cost
- Missing or damaged Network Card $50 minimum charge or actual replacement cost
- Missing or damaged Power Cord $50 minimum charge or actual replacement cost
- Missing or damaged keys $50 minimum charge or actual replacement cost
Laptop Checkout Registration & Liability Form

Morris Library – SIUC

Personal Information: (Please print clearly and complete ALL fields)

Full Name: ___________________________ Last ______ First ______ M.I. ______

SIU Dawg Tag: _______________________

Local Street Address: ___________________________

City: ___________________________ State: ______ Zip Code: ___________________________

Phone: ___________________________ E-Mail: ___________________________

By completing this form, I am requesting to participate in the laptop checkout program at Morris Library, SIUC. I pledge to be responsible for the laptop computer during each checkout period.

If a laptop computer is damaged or broken while in my possession, I agree to pay the related costs to Morris Library to repair the laptop to return it to normal working conditions within 30 days of receiving a statement. I understand that until charges are paid, laptop privileges will be suspended and the expense may be charged on my Bursar account. Laptop privileges will not be reinstated until the charge is paid in full. If I experience a problem with a laptop computer while it is checked out to me or if it breaks due to what I believe is normal wear and tear, I will immediately return it to the Circulation Services Desk and explain the situation.

If a laptop computer is lost or stolen while in my possession, or if I fail to return it to the Circulation Services Desk, I agree to pay the replacement cost of $1500.00.

I Laptop Fines! A late fee of $60/hour ($1.00/minute) will be charged if the laptop is returned late ($300/5-hour maximum). Return on time to avoid these hefty fines!

I understand that this Registration & Liability Form is valid and binding during the time I am enrolled at SIUC and covers all laptop checkouts during that time. I also understand that if I leave SIUC, I must complete a new Registration & Liability Form upon return if I wish to re-enroll in the program.

I understand that failure to comply with all points of this registration form may result in suspension of laptop/library privileges, fines and/or possible legal action.

Laptop Checkout Policy
Morris Library – SIUC

**Rules and Regulations For Laptop Checkout**

- Laptops may only be checked out by current Undergraduate and Graduate students with a valid SIUC photo ID.
- Faculty, staff, courtesy card holders and CESL students are not eligible to check out laptops.
- Each student will be required to sign a Laptop Checkout Registration & Liability Form to enroll in the program and this form must be filled out at the Circulation Desk.
- Laptops may be checked out for a 4-hour time period.
- Laptops must be used within the library and its security gates.
- Laptops may be renewed depending upon user demand.
- Laptops are configured with the same software as the public computers in the library; attempts at installation of other software will automatically be blocked.
- Never leave the laptop unattended.
- Save all personal files to a personal flash drive, other storage device, or send to your email account. Any files left on the hard drive will be deleted each night during the updating of the machine. Neither SIUC nor Morris Library is responsible for the recovery of personal files saved on the hard drive.
- Laptops must be turned in 15 minutes prior to library closing.
- Laptops must be returned to the Circulation Services Desk, 1st floor.
- Laptop, AC adapter and case are all reviewed for damage at both check out and check in.
- When returned, ask for a receipt and keep it for at least three months.

! Laptop Fines! A late fee of $60/hour ($1.00/minute) will be charged if the laptop is returned late ($300/5-hour maximum). Return on time to avoid these hefty fines!

I understand that failure to comply with all points of this policy may result in suspension of laptop/library privileges, fines and/or possible legal action.

Video Tutorial
Capturing Video on the Mac

Capturing Analog Video
Analog Video is any source that typically uses the RCA cables to capture video, in particular VHS video. DVD video is digital video which can many times be copied directly to the hard drive, but sometimes video from DVDs may be captured as analog video (from the “composite” RCA cables).

Currently, the easiest way to capture analog video (VHS video) on the Macs is to use the JVC VHS/DV player which will automatically convert your analog VHS tape into digital video. The only thing you need to do is make sure the DV IN/OUT port on the player is connected to the G5 Firewire port with a (mini to standard) firewire cable. At this point capturing the video will be nearly the same as capturing video from a digital source.

There are two programs that can be used to capture video on the Mac:

iMovie
In the top of the window click "go" and "applications".
" Double-click on "iMovie HD".

You should see your video playing in the main window. Adjust the volume control on the window.
Make sure to switch the small circle control to the camera symbol (capture) and not to the scissor (edit) symbol. If you still do not see your video, make sure you have the tape in the JVC player with the DV IN/OUT port on the front.
Make sure the tape is playing. If all else fails, close and restart the program with the video still playing.
Click “Import” to capture video.

**Final Cut Pro**
In the top of the window click “go” and “applications”.
Double-click on “Final Cut Pro”.
This will open the Final Cut Pro program.
Click “File” and “Log and Capture”.
You should see your video playing in the capture window. If you do not, make sure you have the tape in the JVC player with the DV IN/OUT port on the front. Make sure the tape is playing. Note: If you close and open Final Cut Pro with the video playing and still see no video in the capture window, try opening IMovie and check if you can see your video there. Then, close IMovie and reopen Final Cut Pro and you should be able to see your video in then capture window.

On the right hand side of the capture window, click “Capture Settings”, make sure “Device” is “Non-Controllable Device”.

In the capture window, click “Now” to capture the video.

**Using the “Dazzle” Capture Device**
An alternative, although more labor-intensive way of capturing analog video on the Mac is with the “Dazzle” capture device. Unless this device is connected to the Mac, you will need to get it from the MRC desk.

Verify that the VCR/DVD player has the 3 RCA cables connected from the player “OUT” to the Dazzle “IN” (video is yellow, audio is red and white). It is important to make sure that the Dazzle device has “A to D” light. If the “A to D” light is not lit, press the “Mode” button until the “A to D” light is lit. Verify that the firewire cable is connected to the back of the Dazzle device and that the other end of the cable is connected to the Mac. From here, you can capture the video very much like digital video, the only difference being that there is no “device control”.

Double-click on “Macintosh HD” on the desktop. Double-click on “Applications”. Double-click on “Final Cut Pro HD”.

Click “File. Click “Log and Capture. Click on the “Capture Settings” tab. Make sure “Device Control” is set to “Firewire NTSC. Make sure “Capture/Input” is “DV NTSC 48 kHz. You should see the video in the preview window, if you do not, check the “Mode” button on the Dazzle device and make sure the Dazzle device is set to “A to D”.

To start capturing video click on the “Now” button. To stop capturing video, press the “esc” key. Close the capture window when done capturing videos. You should see your captured videos in the upper left part of the “Final Cut Pro” window. You can now drag and drop these files to the timeline window near the bottom of the “Final Cut Pro” window. You files should be located in the “Users/multi” folder.

**Capturing Digital Video**
Digital video is from a source that has a firewire connection, for example a mini-DV or Digital-8 video camera.

To capture digital video, connect the camera to the computer firewire port (not the Dazzle device firewire port!).

Turn on your camera and put the camera in “play” mode.

Currently on the MRC MAC there are 2 programs to capture digital video:

**iMovie**
Open “Finder”, double-click on “Applications”, double click on “iMovie”.

In the program bar on the top of the screen click on “File” and “New Project”. You can save this new project in the
“Movies” folder.

You should see a blue screen with the word “camera connected”. You can now use the “play”, “rewind”, etc… controls to view the video on your camera. To capture video click on the “Import” button. You should see your captured video clip on the right hand side of the window. You can double click on the square with your video to rename or play the video. You can change back and forth between play and capture with the sliding switch with the scissors. All video formats on the Macs are Quicktime.

**Final Cut Pro**

Open “Finder”, double click on “Applications”, double click on “Final Cut Pro”.

Click “File. Click “Log and Capture. Click on the “Capture Settings” tab. Make sure “Device Control” is set to “Firewire NTSC”. Make sure “Capture/Input” is “DV NTSC 48 kHz”. You should see the video in the preview window.

To start capturing video click on the “Now” button. To stop capturing video, click the stop button or press the “esc” key. Close the capture window when done capturing videos. You should see your captured videos in the upper left part of the “Final Cut Pro” window. You can now drag and drop these files to the timeline window near the bottom of the “Final Cut Pro” windows. You files should be located in the “Users/mrcguest” folder.

Room 310: Connect Mac laptops to media:scape tables

http://guides.main.library.emory.edu/content.php?pid=260770&sid=2158473&search_terms=room+310

Why connect laptops to media:scape tables?
When students connect their laptops to the media:scape tables, they are able to project their laptop screens on the large screen so that others sitting with them can see what’s on their laptops.

Connect a Mac laptop to media:scape tables:
Connecting a Mac laptop to the media:scape desk requires a VGL adapter. (These are available to borrow at the Music and Media Library.)

The default configuration on a Mac is to display an extended desktop, so the students would have to drag a window to the right of their laptop screens to display on the media:scape screen. Below are instructions for “cloning” a Mac laptop to the media:scape screen (i.e. having whatever is displayed on the laptop’s desktop display on the media:scape screen).

To Clone your Mac laptop’s desktop:
1. Click the Apple sign in the top left corner of the laptop monitor, select System Preferences

```
System Preferences Edit View Window
About This Mac Software Update...
App Store...
System Preferences...
Dock
Recent Items
Force Quit System Preferences
Sleep
Restart...
Shut Down...
Log Out Alex...
```

2. In the popup window, select “Displays”
Room 310: Connect Mac laptops to media:scape tables

http://guides.main.library.emory.edu/content.php?pid=260770&sid=2158473&search_terms=room+310

3. In the new popup window, select “Arrangement” and check the “Mirror Displays” box.

4. Click on the red button in the top left corner of this window to close it.

Extend a Mac laptop’s display

Extending your desktop to the second monitor means that the media:scape screen will not automatically display your laptop’s desktop, but instead will provide additional desktop space. You will need to drag the application windows you want to display on the TV monitor from your laptop desktop to the TV monitor’s desktop.
Room 310: Connect Mac laptops to media:scape tables
http://guides.main.library.emory.edu/content.php?pid=260770&sid=2158473&search_terms=room+310
GETTING TO KNOW THE KINDLE FIRE

slide to unlock

Connecting the Kindle Fire Wirelessly

Kindle Fire can connect wirelessly via Wi-Fi allowing you to download and stream music, videos, Kindle content and apps stored on your Amazon account. You can also browse the web using the built-in Amazon Silk web browser and access your e-mails using the preinstalled e-mail app. Once you’ve downloaded books, magazines, videos, MP3s or apps to your device, a wireless connection is not required to access these items.

To connect to Wi-Fi follow these simple steps:

1. Tap the Quick Settings icon (_WIFI_ ) in the top right corner of the Home screen.

2. Select Wi-Fi (_WIFI_ ).
Ensure Wireless Networking switch is in the on position.

A list of networks will appear. You may have to wait a moment as your Kindle detects networks in range. If your network doesn't appear tap the box next to Wireless Networking off and on to refresh the list.

Tap the name of the network you wish to connect to from the list of available networks. If on-campus, select GuestNet.

If a lock symbol appears next to your network, it requires a password. Enter the characters of the password using the onscreen keyboard.

Tap Connect.

Once you are connected to a Wi-Fi network, Kindle Fire automatically connects to it again whenever that network is in range. If more than one previously used network is in range, your Kindle Fire automatically connects to the network that was most recently used.

Register your device

Before using the GNMC Kindle Fire you must create an Amazon account through the Amazon.com website. If you already have an account you do not need to create a new one. When you return the GNMC Kindle, please deregister your account. The GNMC staff will reset the Kindle to its factory settings.

To register or deregister the GNMC Kindle Fire:

1. Tap the Quick Settings icon \(\text{⚙️}\) in the top right hand corner of the Home screen.

2. Select More \(\text{More...}\)

3. Select My Account.

4. To register, tap the Register button. On the next screen, Enter Amazon account info and tap the Register button. To deregister, tap the Deregister button and wait for the button to say Register.

Options bar

The Options bar is located at the bottom of every Content library screen. Options vary depending on the content type.

Standard options include:

- **Home**: Tap Home from anywhere on your Kindle Fire to return to the Home screen.
- **Back**: Use this button to retrace your steps.
- **Menu**: Select Menu to view additional options related to the content type.
- **Search**: Tap this button to search your Content library.

The Options bar may be hidden when some applications are running.

It can be expanded by tapping the arrow at the bottom of the screen or by swiping upwards from the bottom of the device. When reading, simply tap the middle of the screen to display the Options bar.
Students: Questions You May Have about Clickers

Q: When and how do I register my clicker?
A: The registrations are cleared at the end of fall, spring, and summer semesters. So, a clicker needs to be registered at the beginning of each semester it is used. To register a clicker:
1. Log onto PAWS.
2. Click Student Services located on the PAWS desktop to the left.
3. Under Student Services, click SRS Keypad Registration.
4. With LSU selected as the campus, click Continue.
5. Type the 6 character ID on the back of the clicker under the barcode in the box provided. (See picture to the far right.)
6. Click the Add button ONCE; wait for a confirmation message.
   Note: "D" is the number zero; there is no letter "o" in the code.

Q: What if my clicker is already registered?
A: Please contact the ITS Help Desk (578-3375 or email helpldesk@lsu.edu). Be sure to provide:
1. Your clicker ID.
2. The error message you received when trying to register the clicker.
3. The name of the course and instructor in which you will be using the clicker.

Q: How do I set the channel?
A: To set the channel,
1. Check with your instructor to determine the channel number being used in your classroom.
2. On your clicker, locate the button in the lower left corner that says “Go” or “Ch” (for channel).
3. Press the buttons in the following sequence: “Go” → Channel Number → “Go” or “Ch” → Channel Number → “Ch.” At the end, a green light glows for a few seconds to indicate that the channel entry was successful.

For additional help ...
Visit: http://its.lsu.edu; then select Students → SRS Clickers

Digital Media Services Help!

Lab consultants on duty can help you get started on your project. For more in-depth help, you can consult with a Digital Media Librarian through appointment, or look at software links to help and manuals online. We also have how-to guides developed specifically for the lab.

Software Help Links  How-To Guides

Here are a few links to Software Help websites. Tutorials and "how-to" software questions can also be answered by searching the web for software name and "tutorial" or keyword of the problem you are trying to figure out. For example "photoshop and red eye". There are binders located next to each Digital Media computer with step-by-step illustrated guides for most basic tasks.

- Information Technology Training from IS
  Computer classes, including some on multimedia software, for students and faculty available through the Information Services department.
- Webmonkey
  A rich resource for help on web authoring.

Here are a few tutorials designed by the Digital Media Librarians for use with the specific equipment in the Love Lab. All computers should have a Help File binder nearby with print versions of these guides. These guides are accurate as of the date on the bottom of the guide, and may not work with computers outside the lab. Please consult the Help File binders for the most accurate information and deck manuals.

Info Commons Project Room

Usage Instructions

The Project Room can be reserved at the Info Commons Desk.
If you have not been trained on this equipment, please call the Info Commons Desk: 847-491-7658

Starting the System and Selecting a Source

1. If the touch screen is dark, press it once to display the touch screen image.
   Once you see the screen image, press the screen again. This will power up
   the projectors and all A/V equipment.
2. Select your Source (Resident PC or Laptop).

Starting the System and Connecting Your Laptop

1. If the touch screen is dark, press it once to display the touch screen image.
   Once you see the screen image, press the screen again. This will power up
   the projectors and all A/V equipment.
2. Select Laptop from the Sources options.
3. Connect the VGA, pull-out cable to your laptop (Mac Adaptors can be checked
   out at the Information Commons Desk).

Starting the System and Using the Resident Computer

1. Select Resident Computer from the Sources options.
2. Use the wireless Keyboard and Mouse to log in to the Resident Computer.

Shutting Down the System

Shutting down the system decreases the setup time for the next classroom user.
1. Select Shutdown System in the upper right hand corner of the touch screen.
2. A Select Yes – Shutdown System.

Support
Room Scheduling: Info Commons Desk (847-491-7685)
Non A/V related room issues: Facilities Management (847-491-9301)

For Immediate Support, Call

IC Project Room

11/2011 v1
Interwrite Board Instructions

Things you should know to get started:

- There are 3 components to the Interwrite Board system:
  1. Software
  2. USB (already in podium) – communicates between the computer and the school pad
  3. School Pad
- The School Pad has an internal charger. There is a skinny cord in the podium that does this. (It remains plugged into the podium at all times.)
- To turn the School Pad on, press the On button. Then press Link to connect the pad to the computer. The green light will blink and the pad will make a noise when it is ready.

To access the software on the computer, follow this path:

- Start
- All Programs
- eInstruction
- Interwrite Workspace
- Interactive Mode

To use the Interwrite Board:

- Click on the mouse on the side panel. The pen attached to the board acts like a mouse. NOTE: You do not need to actually touch the board. Simply float over the top of the board.
- To Click: touch the pad. Double click and single click the same as you normally would.
- Pen Buttons: Can be used like mouse buttons.
- Soft Keys: These are on the pad around the perimeter and can be used as shortcuts. If you wish, you can simply click the buttons on the panel.
- If you want to use a keyboard, select it from the pad. There is no button on the control toolbar.

To shut down the board:

- Click the X at the bottom of the control toolbar to get out of the program.
- It will ask you if you wish to save your material.
- To turn off the pad, hold the ON button until it shuts off.
- The pen has no off switch.

Suggested Uses of the Board:

- Highlight text in a webpage.
- Write on a webpage or circle information.
- Go back and forth between webpages with ease.
Flash Card Reader

The Flash Card Reader is an external USB device that can be used to read various types of memory cards. It allows you to transfer files from your card to a computer without using the camera. While many cameras can be directly connected, some types are incompatible; using the flash card reader enables you to access virtually all memory cards as a drive.

Instructions:
- Connect the reader to the USB port on the computer. The green light will turn on.
- Insert your card. Note that the two slots each read different types of cards.

Mac users: The card will appear as a drive on the desktop.
Windows users: The card will appear as a removable drive just as the C or A drives.
NMNH Video Conference Quick Start Guide

1. Press the Power Button on the surge protector to turn the system on. The surge protector is on the back of the unit.

2. **WAIT 60 Seconds.** Then check the top right hand corner of the TV screen and make sure the IP address starts with 172.19. Then locate the remote control unit.

3. To make a call, the orange box must be highlighted on the telephone handle on the TV. Then press the ok button on the remote control unit. Using the remote control unit, enter the VTC IP address that you’re trying to connect to. The symbol that you will use for a period is *. Then press the green button on the remote to start the call.

4. To end the meeting, press the red button on the remote. Press the Power Button on the surge protector to turn the Tandberg and Monitor off.

**How To Show a Presentation On The VTC**

1. To show a presentation from your computer, use the VGA cord to connect the computer to the VTC.

2. Once the computer is connected, press the blue presentation button on the remote.

3. Once the TV says “no PC detected,” press FN and F8 at the same time until the desktop is displayed on the TV.

4. When you’re finished with the computer and you want the site to see you again, they will be able to see you.

The Library Minute: Study Spaces (Video)

At the ASU Libraries your find all kinds of spaces, just for you.

Our libraries have lots of different study spaces where you can focus and get your work done. We can provide a coffee shop atmosphere or a traditional library setting. We have study cars, inside wide benches, private study carrels and rooms, free Wi-Fi, cables, and laptop workspaces, and don’t forget our helpful parking lot to help you with all your research needs.

The Library Minute is hosted by Janet Perry

Get technology training at Regenstein TECHB@R

The University of Chicago Library and IT Services are partnering to present new, technology-related training programs for the UChicago community at the IT Services TECHB@R in the Regenstein Library. Because IT Services and the Library both provide training and support on information technology resources, it can be challenging for many of our users to identify which unit to turn to for help with specific tools. This collaborative nature of the TECHB@R breaks down such barriers, providing faculty, students, and staff seamless access to the training and assistance they need.

During Spring Quarter, the TECHB@R will host a wide range of programs, which are free and open to the entire University community. Some sample topics include Google Sketch-up, wikis, citation managers (such as Zotero and EndNote), Firefox Add-ons, and the ever popular "Chalk Talk." Days,* as well as its other training programs for instructors and students alike.

A new monthly series, entitled "Tech Treats," offers a more casual learning experience. Individuals can drop by the TECHB@R to enjoy refreshments and learn about new technology tools. Scheduled for Spring Quarter are programs on presentation software (such as PowerPoint, Keynote, Impress and Prezi) and online technology training tools (such as Lynda.com, the IT Services Knowledge Base, and Safari Tech Books online). Last quarter, librarians presented a "Tech Treats" program on the news databases Factiva and LexisNexis Academic and featured a demonstration of different news apps for the iPad.

In addition to presentations and classes, the TECHB@R hosts various "Ask the Expert" office hours. Librarians, training specialists, and Chalk support technologists offer in-depth, individual assistance using a variety of software products and systems including Chalk, Microsoft and Adobe software, citation managers, as well as other tools like WebShare and the campus wiki. The "Ask the Expert" service compliments the drop-in tech support services already offered at the TECHB@R during its regular hours and is available to all faculty, students, and staff.

The TECHB@R training spaces in Room 160 (located behind the TECHB@R counter) are appropriate for a wide variety of programs and teaching styles. These include a configurable conference-style area, a small-group training/conversation space, and small tables for one-on-one assistance. The TECHB@R's equipment lending program provides presenters and attendees access to laptops and iPads for a hands-on learning experience.

To learn more about the TECHB@R and see a complete schedule of events for Spring Quarter, visit library.uchicago.edu/techbar. We welcome your comments regarding our programs and services.

Rebecca Starkey is Librarian for College Instruction and Outreach. Jason Edelstein is Senior Support Services Specialist.

Our Mission

By providing access to innovative technologies, collections, services, and spaces, the Lauinger Library’s Gelardin New Media Center strives to continuously transform the ways faculty teach, students learn, research is published, and knowledge is conceived. Our experienced staff collaborates with partners across the Georgetown University campus to turn ideas and research into expressive multimedia stories of communication.

Workshops + Compositions

The New Media Center works synergistically with faculty to build students’ digital and visual literacy skills and give them the tools required to participate fully in a dynamic and information-rich media landscape. We frequently partner with Gelardin’s Center for New Designs in Learning and Scholarship (CNDSL) to spark interest in the use of technology in pedagogical endeavors and help faculty integrate new media projects into their courses. We host instructional sessions open to Georgetown faculty, students, and staff on digital imaging, video production and post-production, delivery of media content, and other software applications and technologies.

In order to communicate effectively in the digital era, it has become increasingly important for scholars to have access to the latest technologies and equipment. Our equipment offerings are vast and varied — we have state-of-the-art software and hardware for multiple projects and advanced applications for true-to-life scene projection, professional digital video, audio, and lighting equipment available 24 hours a day.

Collections

Our collection is interdisciplinary and international in scope and includes more than 25,000 video titles and 8,000 CDs. The collection continues to grow in all areas of the curriculum, and online access is expanding exponentially. Some courses require weekly and/or additional access for students for 24 hours, and we stream media online by request.
