This is IS IT OKAY TO COPY | SHARE | SCAN | CHANGE | PLAY | DISPLAY | A COPYRIGHTED WORK?

As a busy, hard-workin’ Aggie, you no doubt prepare papers, projects, and other assignments that require you to consult and draw on works created by others. These works contain valuable information that is necessary for your studies, research, creative pursuits, and service activities on campus. And these works may also be protected by copyright, the federal law that governs how original works may be copied, modified, distributed and shared.

If you are using any sort of material that you yourself did not create, you need to think carefully about copyright. Using someone else’s copyrighted material without permission could constitute copyright infringement, an illegal and unethical act that violates not only US law but also the Aggie Honor Code, as well as other professional and research standards of conduct.

To comply with copyright law and with standards for ethical conduct, you need to do one of three things:
º Determine that your use qualifies for one of the limitations to the copyright holder’s rights, such as Fair Use
º Use materials that are free of copyright restrictions because they are in the public domain, or they are published with an open license for use
º Obtain permission for your use from the copyright holder.

How do you know what approach to take in your particular situation? That’s what this Guide is designed to help with. Here you will find some brief explanations of key copyright concepts as well as resources for learning more.

Ultimately, each Aggie makes his or her own decision as to whether, or how, to use copyrighted works in a legal and ethical way. The information and resources are offered here to provide helpful and reliable information you can use to make that decision.
