Gift/Purchase Agreements
The Donor acknowledges that the Library acquires the materials with the intent of making them available for an ongoing or indefinite period of time. In order to accomplish this, the Library may need to transfer some or all of these materials from the original media as supplied by the donor to new forms of media to ensure their ongoing availability and preservation. The donor grants the library rights to make preservation and access copies of materials in the collection and to make those copies available for use.

The Library may contract with university staff or outside contractors to store, evaluate, manage or analyze materials in the collection. Any such arrangements must abide by the terms of this agreement.

Upon accessioning, the Library will transfer all electronic records to a secure server space with restricted access. Descriptions created for each group of records will indicate whether or not they are likely to contain Secure Electronic Information (SEI). When the records are processed, the Library will use standard software packages to scan the content for common types of SEI (phone numbers, social security numbers, etc.) Records containing SEI will be embargoed and processed later in accordance with any restrictions outlined in this agreement and with the Library’s policies and practices.

Section 3: Access Policies

University records are public records and once fully processed are generally open to research use. Records that contain personally identifiable information will be restricted in order to protect individual privacy. Certain administrative records are restricted in accordance with university policy as outlined below. The restriction of university records is subject to compliance with applicable laws, including the Freedom of Information Act (FOIA).

CATEGORIES OF RESTRICTED RECORDS

- Personnel related records, including search, review, promotion, and tenure files, are restricted for thirty years from date of creation.
- Student educational records are restricted for seventy-five years from date of creation.
- Patient/client records are restricted for one-hundred years from date of creation.
- Executive Officers, Deans and Directors records
  
  As of January 1, 2001, university records generated by the university's Executive Officers, Deans, Directors and their support offices are restricted for a period of twenty years from their date of accession by the Bentley Historical Library. The restriction is subject to applicable law, most notably the Freedom of Information Act (FOIA).

For further information on the restriction policy and placing FOIA requests for restricted material, consult the reference archivist at the Bentley Historical Library or the University of Michigan Freedom of Information Office website.

The Beinecke Library (BRBL) is committed to collecting, preserving, and providing access to important literary archives including materials documenting creative processes, writing lives, aesthetic communities, publication records, etc. in a range of formats and media. In keeping with this commitment, the Library recognizes and appreciates the increasing and inevitable significance of born-digital materials in literary archives. We have established, therefore, a flexible framework for working with archive creators and their representatives in various contexts to systematically, efficiently, and safely work with born digital manuscripts, correspondence, and related materials as they are acquired, accessioned, organized, maintained, accessed, and used for various research and education purposes.

To that end, the Beinecke Library employs the following guidelines in approaching the assessment, evaluation, collection, capture, accession, and preservation of materials created using digital media;

--BRBL collects digital archival materials in any and all relevant formats (including text, image, sound, etc);

--In acquiring born digital materials, a forensic approach, including the capture by “snapshot” of all working files on a specific computer, will be the preferred method of acquisition; in most cases BRBL will wish to capture entire digital environments without any advanced collection editing by creator or curator;

--Because BRBL is interested in collecting digital materials that have substantive research value, such materials may be segregated from other materials in a broadly-conceived digital archive (spam and other commercial email, for example, may be excluded; extensive personal image or sound file collections may be curated by BRBL before collection and accession). This more limited acquisitions approach will be applied primarily in cases where a small group of materials are to be acquired (a specific body of correspondence, for instance) and not in the case of acquisition of a complete archive;

--In order to retain whatever organization, file structures, and associated data exists in the a digital archive or collection, BRBL staff members need direct access to digital files in their original environment to perform data appraisal, capture, and verification; it is suggested that representatives of archive creators (family and friends, book dealers, agents) should not manipulate, rearrange, extract, copy etc. data from its original source in anticipation of offering the materials to BRBL for gift or purchase.
