You want to publish, we want to help...

Scholarly publishing is undergoing fundamental transformations and the UB Libraries want to help you understand how these changes impact your scholarly endeavors. Here are some ways we may be able to assist:

- **Accurately measuring the the impact of your work:** librarians are available to assist you with using Web of Science, Harzing's Publish or Perish/Google Scholar, altmetrics, and other resources to capture a more complete picture of the impact of your scholarly output.
- **Archiving your work:** the UB Libraries can provide assistance with sustainable, long-term, online preservation of your work (articles, data, and other scholarly output).

Publish and Archive Your Work

You've done your research, and now you're ready to share it with the world. At Duke University Libraries, we help you publish and archive your work online so that it is available for others to use in the future.

Duke University Libraries can help you publish and archive via:

- [DukeSpace](#), an open-access, online repository
- [OJS](#), an open access journal publishing system
- other online platforms such as blogs and project websites

Through these systems you can publish and archive:

- peer-reviewed articles
- dissertations and theses
- data
- other digital works

In addition, we are available to guide you on issues regarding:

- publishing and managing a scholarly journal
- U.S. copyright law
- data management
- scholarly publishing
- building and managing digital collections

Get help at Duke

Copyright, intellectual property & scholarly communications technologies

The Office of Copyright and Scholarly Communications at Duke University Libraries provides guidance to faculty, staff and students on copyright and technology law, as well as on innovative technologies that support academic publishing and other methods of scholarly communication.

- Contact [Copyright and Scholarly Communications staff](#) for individual consultations or to arrange workshops and presentations on these topics
- Learn more about these issues on the [Scholarly Communications blog](#)

Open Access Publishing and Archiving

In 2010, the Duke University Academic Council adopted an [open access policy](#) to enable readers from around the world to access scholarly articles by Duke faculty for free. To make your works available for open access via the [DukeSpace](#) repository:

- Upload your works into the [Elements](#) system, an online platform provided by Duke University Libraries that helps Duke faculty document and manage their publications. Files uploaded here (which can include articles as well as supplementary data) are deposited in [DukeSpace](#).
- The works you upload into Elements also will appear in your [Scholars@Duke](#) profile, Google Scholar and other websites that draw from [DukeSpace](#) or [Scholars@Duke](#).

In addition, Duke faculty who want to publish works in an [open access journal](#) that charges publishing fees to authors may request financial support to help cover these fees if they meet [university criteria](#).

For questions about these or other issues related to open access scholarship, or to request assistance with making your work open access, contact [Open Access staff](#) or the [Office of Copyright and Scholarly Communications](#). We would be glad to assist you in making your work available in the appropriate open access venue.

MORE INFORMATION

Where can I publish & archive my work at Duke?

DukeSpace is an open-access, online repository for publishing and archiving scholarly works authored or curated by members of the Duke community, including the following types of materials:

- **Duke Scholarly Works:** Scholarly articles, technical reports and working papers and other research and writings by Duke researchers.
- **Electronic Theses and Dissertations:** All Duke graduate students must submit a thesis or dissertation to [DukeSpace](#). Learn more about [depositing your thesis or dissertation](#) for publication online.
- **Research Data:** Organize your data by following the [Data Management Guide](#) and consult with the library's [Data and GIS](#) group for information about depositing your data into [DukeSpace](#).

Additional Resources

- **Duke Law Scholarship Repository** provides open access to scholarly works by Duke Law faculty and affiliates, including faculty articles, working papers and student-edited law journals. See the [Author FAQ](#) for information on how to deposit your work.
- **Duke Libraries Open Journal Publishing** is platform for publishing open access online journals sponsored by members of the Duke community. See the [Open Journal Publishing](#) page for information about journals currently supported, and how to get started on publishing your own journal in this system.
- **Duke WordPress** is an online publishing system for class websites, e-portfolios, individual or group blogs, multimedia websites and project websites. See [Sites@Duke](#) for information on how to build your site.

Data management, publishing & archiving

Duke University Libraries' [Data and GIS Services](#) staff help Duke community members make effective use of data and geographic information systems for research and teaching. In addition, they consult with faculty, staff and students on topics such as:

- Data management planning, including completing the data management plan required for National Science Foundation proposals
- Depositing research data in DukeSpace for archiving and access
- Publishing and archiving data in relevant repositories

More information about the above topics can be found in our [Data Management Guide](#).

Electronic theses & dissertations

The Graduate School requires every student to make his or her thesis or dissertation available online, both through [UMI/ProQuest](#) and [DukeSpace](#). [Read about how to submit your thesis or dissertation](#).

Online journal publishing

Interested in starting your own journal? Duke University Libraries provides support for members of the Duke community who want to publish their scholarly journal online via the [Open Journal System](#).

Digitization & digital scholarship projects

Want to digitize primary sources or get other assistance with digital projects? The [Digital Scholarship Services](#) department provides training, consulting, and assistance with digital research projects.

Publishing Support

The Library offers support with publishing, author rights, and copyright consultation services for faculty and graduate students.

Traditional publishing models may require the signing over of author's rights to the publisher. Authors could lose the right to use their work in future research, share work freely with others, self-archive work, or post it to their personal website.

The Library can help authors with:

- Identifying and choosing a journal (or alternative publication format) in which to publish
- Understanding the differences (and advantages/disadvantages) between traditional publishing models and [open access](#), including self-archiving
- Understanding copyright from the perspective of an author and your rights as an author (including why you would want to retain those rights)
- Points that you should negotiate with publishers in order to protect your author rights
- Identifying and working with progressive publishers (those that allow authors to retain their copyright)

Services

Center staff and affiliates are available for consultations anywhere on campus, or by phone or email. The Center is housed in the second floor (2 East) of the University Library. Project teams can reserve the Center's [collaboration commons](#) for meetings and video conferencing. A [digital media lab](#) is available for digitization and production work. Some of our services include:

Understanding Copyright

What is the term of copyright in the United States, and what is the procedure for determining if something is in the public domain? Experts in the Center offer guidance in determining copyright status, understanding fair use, and determining when to seek permission to reuse a work.

Data Management Planning

Some federal funding agencies now require that grant proposals include a data management plan. Experts in the Center can assist investigators in developing research data management plans and strategies. For more, see our page on [data management plans](#).

Author Rights Consultation

Academic authors who do not retain their copyrights may not be able to post copies on their web sites or reuse their articles in other settings. Many publishing contracts ask authors to transfer their copyright, but it may be possible to negotiate this and other terms of the agreement.

Bibliometrics

What is an impact factor, and what does it say about the reach and value of published research? Understand the appropriate use of impact factors, h-index, citation analysis and other bibliometric tools.

Open Access & Self-Archiving

Open access provides access to research results without payment. Center experts can guide authors through options for open access publishing or making copies of research results openly available through public web pages and repositories.

NIH Public Access Policy

Investigators with NIH grants are required to comply with the NIH Public Access Policy and deposit final versions of their electronic, peer-reviewed manuscripts no later than 12 months after publication. This policy is in effect for all grants awarded after 2008. See the Feinberg School of Medicine's Gatter Health Sciences Library's [guide to the NIH policy](#) for more information and details about how to comply. Faculty and research administrators on the Evanston campus can contact [Steve Adams, Life Sciences Librarian](#), or [Cunera Buys, E-Science Librarian](#), for additional help and guidance. Feinberg faculty and research administrators can contact [Pam Shaw, Biosciences and Bioinformatics Librarian](#) at the Gatter Health Sciences Library.

Digital Publishing & Research Tools

Digital tools and platforms enable new kinds of scholarly research and publishing. Center experts are available for consultation and collaboration on digital publishing projects, and to help scholars find and use new digital research tools.

Informational Services

Center staff and affiliates stay as current as possible about issues, trends, and activities in scholarly communications and maintain a robust presence online—writing on issues, bookmarking articles, sharing our presentations, posting official guides, and, of course, tweeting. For more, check out our [Links](#).

Publishing and Curation Services (PCS)

PCS is a digital scholarship services department working collaboratively to advance and achieve the research, teaching, and learning goals of the Penn State community. Key service areas are data curation, publishing, and digital projects.

To promote scholarly communication issues, we advise and instruct on copyright, author rights, open access, and data management planning across the humanities, social sciences, and sciences. PCS is the service home of ScholarSphere, in partnership with Information Technology Services. We offer services for launching and hosting open access publications, including scholarly journals and student publications, in our role to help capture and disseminate the research record of Penn State. A hybrid department, PCS also works collaboratively on digital collection platform management and digital preservation strategy.

We collaborate on digital humanities (DH) projects (see the [Learning as Play](#) and [People's Contest](#) sites for examples), in particular with the College of Liberal Arts. Beginning in fall 2014, we will work in concert with humanities librarians to offer open studio/lab sessions on DH research methodologies and project design. Future areas of focus include support for humanities data curation and experimental R&D activities.

About the York Digital Journals program

York University Libraries provide an electronic journal hosting service for York-affiliated journals. This service is called **York Digital Journals (YDJ)**.

York University uses **Open Journal Systems (OJS)**, an open source software platform developed by the **Public Knowledge Project** which is now in use by over 12,000 journals worldwide. OJS differs from other web platforms as it is specially designed to manage articles through author submission, peer review, editing and publication. This online submission and tracking workflow simplifies the administrative aspects of the journal editorial process, allowing designated users to view the status of their article at any given time.

The YDJ team is happy to work with York community members to create new journals or migrate existing journals to an online environment. The libraries will provide training and troubleshooting help with the OJS software, as well as advice to ensure maximum exposure. Design help is also available to ensure a professional appearance.

Contact **Andrea Kosavic** for more information about York Digital Journals.

York Digital Journals resources

- How to get started with York Digital Journals**
This resource site explains the library's commitment to the hosting of York University's journal content. It will explain how to get started, and has an extensive Frequently Asked Questions section.
- Journal planning checklist**
This is a list of questions that will help you begin your journal planning: whether it be starting a new journal, or migrating an existing journal to the YDJ platform.
- Maximizing exposure of your scholarly journal**
This is a list of suggestions for maximizing the online exposure of your journal. Please note that some of these options are limited to journals that meet specified criteria. These criteria will be noted in this list where possible.
- Journal metrics**
Finding abstracting, indexing, and citation information online.
