Copyright Addendum Instructions

The addendum is intended as a convenient way to seek the kinds of rights most academic authors would value. Here is how you might use it:

1. Sign your publisher's copyright transfer or publication agreement when you submit your final manuscript for publication with the following statement written above your signature: "subject to attached amendment"
2. Attach this amendment with the information filled in and your signature at the bottom.
3. Send both to publisher and save a copy for your records.

The publisher may accept the amendment, reject it outright, or offer a different (more generous) version of the original agreement. You can at that point sign the original or modified version of the agreement, continue negotiations, or seek an alternative outlet for your article.

If at any point you would like to consult someone about options, or if you or your publisher have questions or concerns, contact: Michael Wright, Interim Associate University Librarian for Collections & Scholarly Communication, michael-wright@uiowa.edu, 319-335-5867.

University of Michigan Author's Addendum

Academic publishing involves a partnership between academic authors, institutions of higher learning, publishers, and, sometimes, granting agencies. Consistent with its commitment to academic freedom and to open and robust dissemination of knowledge, the University of Michigan supports the goal of having its faculty retain core intellectual property rights when their scholarly works are published. The terms of this addendum represent the minimum expected in the case of articles, book reviews, research reports, etc. being published in journals or book compilations.

This Addendum constitutes an integral part of this publishing agreement and is binding on both parties. Should there be conflicting terms or conditions between the body of this agreement and this addendum, this addendum shall be paramount. This publishing agreement, including the addendum, constitutes the final agreement between the AUTHOR (where the term "author" includes the plural) and PUBLISHER with respect to the publication of the Article and the allocation of rights provided by Copyright.

Addendum

1. *Teaching.* The Author shall retain the right to use, reproduce, distribute, perform, and display the Article in connection with the Author's own teaching, conference presentations, and lectures.
2. *Research.* The Author shall retain the right to make full use of the Article in future research and publications. The Author shall also have the right to republish the Article in whole or in part in any book the Author may write or edit after the Article has appeared. In such case, the Author will be expected to provide proper citation to the original publication.
3. *Repositories.* The Author shall retain the right to deposit the published version of the Article in an open-access digital repository maintained by the Author's employing institution, such as University of Michigan's "Deep Blue", by an academic consortium to which the employing institution belongs, such as the Committee on Institutional Cooperation (CIC), by a non-profit scholarly society, and/or by a governmental funding agency. At the Publisher's written request, open access to the Article may be delayed for a period not to exceed 12 months from the date of publication.
4. *Personal Website.* The Author shall retain the right to post the published version of the Article on the Author's personal website.
5. *Institutional Needs.* The Author shall retain the right to grant to the Author's employing institution limited permission to use the Article in connection with specific administrative activities such as accreditation, mandated reports to state or federal governments, or similar essential purposes.
6. *External Requirements.* The Author shall retain all rights necessary to comply with requirements and conditions of research grants or publishing subventions provided by government agencies or non-profit foundations.
7. *Moral Rights.* The Author shall have the right to be acknowledged as the creator/author of the Article in the original journal publication and in any subsequent republication. The Author (or any one of multiple authors speaking for him or herself) shall also have the right to refuse attribution if the article is later revised or modified in a manner unacceptable to the objecting party.
