

ARL STATISTICS® ANALYTICS

The screenshot shows the ARL Statistics Analytics website. At the top, there is a navigation bar with links for ABOUT, ANALYTICS, NEWS, PUBLICATIONS, and EVENTS. A purple box on the left contains the text 'Survey Management Center'. Below this, a sidebar menu lists 'Home', 'About', 'News', 'Publications', and 'Events', with 'Management Center' highlighted in yellow. The main content area is titled 'Analytics' and includes a sub-navigation bar with links for 'About', 'Institutional Data', 'Ranked Lists', 'Summary Stats', 'Graphs', 'Download Data', 'Investment Index', and 'Help'. The main text describes the current ARL statistics and lists several features: reviewing library data, generating rankings, creating graphs, generating summary statistics, downloading data in spreadsheet format, and reviewing the ARL index. A 'History' section provides background on the data collection since 1961-62, mentioning James Gerould and the Gerould statistics. A link is provided for a revised edition of the Gerould Statistics, and another link points to a machine-readable version of the ARL Statistics.

ARL now offers interactive access to over 100 years' worth of ARL Statistics® data through the **ARL Statistics® Analytics** interface (formerly called ARL Statistics® Interactive Analytics). Subscribers also have access to the ARL Statistics Publications database and the mailings archive, which contains instructions, definitions, and supportive documentation for the annual survey data collection. Libraries that are not ARL members, for-profit and not-for-profit entities, and individual researchers may subscribe to password access to this Excel-based data set. The annual subscription fee is \$500 for non-profit organizations and \$750 for all others. Customers may contact <stats@arl.org> for subscription information or place an order through their subscription agent.

Subscribers may download Excel files containing the entire data set or any combination of survey years and variables. They may also create graphs and ranked lists of the data through the interactive interface.

Note: PDFs of the *ARL Statistics*, *ARL Academic Health Sciences Library Statistics*, and *ARL Academic Law Library Statistics* publications are not included in this service.

We would like to thank the University of Virginia for supporting the ARL Statistics Interactive edition from 1995 to 2010. Special thanks to Texas A&M University and the University of Texas for enabling ARL to support data curation activities like the ARL Statistics® Analytics through their support and development of LibQUAL+® Analytics.
