UNIVERSITY OF CALIFORNIA, IRVINE
UCI Open
http://ocw.uci.edu
University of California, Irvine
Since 1965, the University of California, Irvine has combined the strengths of a major research university with the beauty of an incomparable Southern California location. UCI's unyielding commitment to rigorous academics, cutting-edge research, and leadership and character development makes the campus a driving force for innovation and discovery that serves our local, national and global communities in many ways.

AFFORDABLE LEARNING GEORGIA
About
http://affordablelearninggeorgia.org
Flipping the Classroom with Open Educational Resources (OERs)

This cohort integrates open educational resources (such as MOOCs, online simulations, and other open/free course content, or materials freshly created and openly licensed as an OER) for use in current on-campus courses as a tool to help rethink or flip the classroom experience.

Cohort Facilitators
Janet Russell, Yong Lee, Beth Marhanka

Cohort Members
Anne Rosenwald, Biology | Spring 2014
“Using Drone Resources to Enhance Learning in Biochemistry”

Jon Blincato, Oncology | Spring 2014
“Student Analysis of Biotechnology Videos”

Jennifer Swift, Chemistry | Spring 2014
“Using Drone Modules in Molecular Gastronomy”

Lamar Rainsch, McDonough School of Business | Spring 2014
“Encouraging Critical Listening and Thinking in New Graduate Students”

Monica Arruda de Almeida, Center for Latin American Studies | Spring 2014
“Illicit Global Economy”

Ezriel Frayn, McCourt School of Public Policy | Spring 2014
“Intelligence & Public Policy”

Shareen Joshi, Global Human Development | Spring 2014

Watch a short video (1:57) about Shareen Joshi’s ITEL project and her experience with the cohort.
OER Resources

Links to videos that take you through creating OER and to copyright and Creative Commons licensing guidance, and attribution builders.

Getting Started and Copyright for OER

OER Libguides provide a platform for curated collections of OER and other educational materials that are free to UH students. Any UH faculty who would like to use this platform to collect OER for a class is welcome. Just email oer@hawaii.edu for an account.

OER Libguides (in the search box enter OER)

Open Courses provide a structure (syllabus), a timeline, and lecture content. Often they require
the students to purchase the accompanying texts.

Open Courses

Sources for textbooks were selected with Creative Commons CC By licensing, allowing you to download, reuse, revise, and redistribute the content.

Sources for Textbooks

Learning Objects sources include wikis, lesson plans, short videos, software, and other tools. Each source offers different search capabilities and conditions of use vary.

Learning Object Sources

Open Access journals enable your students to access peer reviewed literature without licensing barriers.

Open Access to Journal Article Sources

Museums and libraries provide digitized primary sources and historical context to your OER.

Digital Museum and Library Sources

Open access video sources provide university content and learning support for your students.

Textbook Affordability at UMD

Open Educational Resources

Overview of Issues

The University of Maryland estimates students spend an average of $1,130 on books and supplies per year. Textbook prices have risen a whopping 186% since 1998, and these increasing prices have affected students' ability to learn. Forty-eight percent of students reported that textbook prices affected whether they took, and 65% of students said they've skipped a book. Of those students, 84% said they were concerned it would hurt their grades. The Student Government Association is working to ease the burden on students with textbook affordability initiatives.

Selecting Textbooks/Costs

Selecting textbooks and other resources for classes is a key responsibility of faculty, and picking the ones that match the instructor's goals and help students learn is a challenging task. But price is rarely considered in this decision-making process. The goal of this website is to help students and faculty alike understand the importance of and process for considering price as one factor in selecting textbooks. Reducing price, sometimes all the way to $0, can improve quality, equity, and student learning, as supported by the research of Robinson, Fischer, Wiley, and Hilton (2014). So read on, and learn how to make this happen.

MOST Initiative

During the fall semester of 2013, the University System of Maryland Student Council (USMSC) piloted a program, the Maryland Open Source Textbook Initiative (MOST), to allow interested faculty members in high-enrollment, entry-level classes to use open-source textbooks. The program, published under a publicly accessible copyright license, allows professors to customize textbook material from a pool of online resources, videos, and graphics. Professors who taught large introductory courses at this university and other university system institutions learned about the features of open-source textbooks in guided workshops. In the spring of 2014, the council analyzed the effectiveness of the program by examining student satisfaction, academic achievement, and faculty willingness to use the resources. MOST was established to address the root of the textbook affordability problems, and explore affordable options. Members of the University System of Maryland and the USMSC are still evaluating the program, and exploring how to improve it for the upcoming years.

Examples of Open Educational Resources

MIT OpenCourseWare, "OCW" (Massachusetts Institute of Technology).
In April 2001, MIT announced its decision to put the materials used in its campus courses online: syllabi, assignments, assessments, and other materials designed by the instructor. At present, several hundred courses from all of MIT's departments are online and in use by educators and learners around the world. MIT's visionary initiative presented a model for other universities and educational institutions.

OpenLearn.
A large project at the University of London supporting high-quality online learning resources for Open University courses and study partners worldwide. Study partner academic units a
The challenge? Linking affordability, access and excellence in teaching and learning at Ohio State.

Projects funded through the Affordable Learning Exchange will meet this challenge by replacing textbooks and other course materials with alternative, homegrown resources; by sharing publications made available through University Libraries; and by adopting and adapting existing Open Educational Resources (OER) from around the world. Learn more about OER from Creative Commons.

President Drake identified access, affordability and excellence as key elements of his 2020 Vision.

*Education transforms lives, but only if we can deliver on our promise of access to an excellent and affordable education.*
If you’re interested in making education affordable for your students you’re in the right place. Get started by learning about ALX. Dig deeper into the resources that are available to you. Take a look at our current cohort to get inspired. Whether your idea is big, small, ready to go, or needing guidance, there’s an opportunity for you to get involved.

OER Collections

Open Education Resources (OERs) are teaching, learning, and research resources that reside in the public domain or have been released under an intellectual property license that permits their free use or re-purposing by others. We have many digital collections that are developed here at the University of Toronto.

Be sure to have a look at our Curriculum page as well for our Ontario Online learning modules
