What is RSS?
 RSS (Really Simple Syndication) is an XML based format for sharing and distributing Web content, such as news headlines. Using an RSS reader, you can view data feeds from various news sources, such as CNN.com, including headlines, summaries, links to full stories.

How do I access RSS?
 RSS/News Aggregators (also called Readers) will download and display RSS feeds for you. A number of free and commercial News Aggregators are available for download. In fact, you may have one now and not even know it! Some email clients and internet news readers support RSS directly and there are add-ons or extensions for many internet browsers.

How To View KSL RSS Feeds
 RSS feeds are viewed using an RSS aggregator. See notes below the list of feeds for more information about what an RSS aggregator is, and where you can get one.

Many aggregators are separate, "stand-alone" programs; other services will let you add RSS feeds to a Web page.

RSS/News Aggregators:
 An impressive description and listing of [news aggregators](#) is available from [Wikipedia](#). The [Wikipedia news aggregator list](#) includes both free and commercial programs and online services for all computing platforms.

Subscribe to KSL RSS Feeds
 KSL offers an extensive list of information feeds. These feeds are categorized and listed here along with these general instructions. Both the **Title** and the **XML** icon for each feed listed below are linked to the feed source.

1.
 - PC Users: **RIGHT CLICK** the Title or icon that corresponds to the topic that interests you
 - Mac Users: **CONTROL CLICK** the Title or icon that corresponds to the topic that interest you
2. Copy the URL/shortcut to your clipboard
3. Paste the URL into your RSS reader. (See above for more information on RSS programs.)
