RESEARCH LIBRARY TRENDS

ARL Statistics 2006–2007 is the latest in a series of annual publications that describe collections, staffing, expenditures, and service activities for the 123 members of the Association of Research Libraries (ARL). Of these, 113 are university libraries; the remaining 10 are public, governmental, and nonprofit research libraries. ARL member libraries are the largest research libraries in North America, representing 16 Canadian and 107 US research institutions. The academic libraries, which comprise about 92% of the membership, include 14 Canadian and 99 US libraries.

Statistics have been collected and published annually for the members of the Association of Research Libraries since 1961–1962, and the data are available through an interactive Web interface. Prior to 1961–1962, annual statistics for university libraries were collected by James Gerould, first at the University of Minnesota and later at Princeton University.¹ These data, covering the years 1907–1908 through 1961–1962, are now called the Gerould statistics.² The whole data series from 1908, which is available on the ARL FTP server,³ represents the oldest and most comprehensive continuing library statistical series in North America.

ARL libraries are a relatively small subset of libraries in North America, but they do account for a large portion of academic library resources in terms of assets, budgets, and the number of users they serve. The total library expenditures of all 123 member libraries in 2006–2007 was more than \$3.9 billion; from that, roughly \$2.9 billion was spent by the 113 university libraries and more than \$866 million by the nonuniversity libraries. The pie charts below show how the two types of libraries divide these expenditures differently.

CHANGE IN COUNTING SERIALS

This year the definition of counting serials in the ARL Statistics was changed — from serials subscriptions we changed to counting serial titles. As a result the trend line of publishing serial cost per subscription is being discontinued and eventually a new one will emerge as we collect annual data on serial titles. This change though simple at first glance is very important as it makes the concept of serials more meaningful in the electronic environment.

What prompted this change? In earlier years the instructions for reporting serials were that libraries report the “total number of subscriptions, not titles, but electronic serials acquired as part of an aggregated package (such as MUSE or Academic’s IDEAL) were to be counted by title.” Directors and other staff have expressed concern that the serials count was problematic since many libraries engage in multiple consortia arrangements and the serials count was inflated by duplicate titles held in multiple packages. The Statistics and Assessment Committee determined that a new way of counting serials focusing on titles would provide better descriptive data reflecting the true scope of the content provided by research libraries. A pilot at various ARL libraries demonstrated the feasibility of the new method.

In the electronic environment once you own or lease a title, it is often accessible by all users so a more authentic descriptive statistic for the scope of the content is titles rather than subscriptions. A unique title count favors broader coverage. Any duplication of those titles through packages, aggregations, bundles, etc., becomes more a management issue. The new definition asks that titles be reported as electronic if available both in print and electronic formats and they be reported as purchased if available both through purchased and non-purchased arrangements. So, if a title appears in both print and electronic form and a library has acquired it through several different providers, it would be counted as one title. Training events were delivered last fall to ensure that there is a well-grounded, shared understanding of the new definitions.

The outcome has been successful as we have more libraries reporting serials titles than they ever managed to report serial subscriptions indicating that the new definition is moving us into the right direction of having data that are both collectable and useful. However, we had to delete all earlier trend lines that were based on serial subscriptions. A variety of resources have been developed for libraries to consult as they implemented the change and they are available through <http://www.arl.org/stats/annualsurveys/arlstats/07statmail.shtml>.

Table 1 presents data about select public service activities such as circulation (initial and total), reference transactions, library instruction (group presentations and participants in these presentations), and interlibrary borrowing and lending.

As seen in table 1, the median of group presentations dropped slightly during 2006–2007. However, the number of participants increased with a median of 14,417 for the typical research library. Perhaps what is of most interest is that by 2007 there were double the participants compared to 1991 (see Graph 1).

Operating expenditures, including many automation expenditures, have doubled since 1986, but during the last five years have remained at relatively stable levels of investment. The total salary expenditures median has increased only slightly over the past four years. Monograph expenditures continue to increase. The annual consumer price index (CPI), included in Graph 4, provides a comparative reference for the increases in library expenditures.

Over the 22-year period since 1986, ARL libraries are acquiring 30% fewer monographs per student. Libraries reported fewer staff per student in 2006 as compared to 1986: in 2007, there was a median number of 11.4 total staff per 1,000 students, compared to the 1986 figure of 16 per 1,000.

TABLE 6

ELECTRONIC RESOURCES EXPENDITURES IN ARL UNIVERSITY LIBRARIES, 2006–2007

	Sum	Number Reporting
Expenditures for Computer Files (one-time/monographic purchase)	\$59,808,658	107
Expenditures for Electronic Serials	\$476,225,086	111
Expenditures for Bibliographic Utilities, Networks, etc. (Library)	\$26,771,671	101
Expenditures for Bibliographic Utilities, Networks, etc. (External)	\$18,931,797	84
Expenditures for Hardware and Software	75,169,750	109
Expenditures for Document Delivery/Interlibrary Loan	12,849,607	109

Table 6 contains data on several items which previously had been collected only in the *ARL Supplementary Statistics*. These data are especially useful because they reflect monies spent on all electronic serials, while the *ARL Statistics* categories of “serials purchased” and “serials expenditures” include only those journals that provide full-text electronic versions to their subscribers. The Expenditures for Electronic Serials time series may be viewed as an alternative to the Serials Purchased series, both figures reflecting in their own way the influence the electronic serial is gaining in the modern research library.

Not only have electronic materials expenditures grown sharply in the past decade, they have grown at a rate far exceeding that of library materials expenditures overall. As shown in Graph 6, in every year of the last decade electronic materials expenditures have grown sharply, anywhere between two and ten times faster than materials expenditures have.

The average ARL university library now spends just under 47% of its materials budget on electronic materials (Tables 7A and 7B) and 50 ARL libraries report that they spent more than 50% of their materials budget on electronic materials (see Rank Order Table 20).

ARL STATISTICS INTERACTIVE EDITION

The *ARL Statistics* are available through an interactive edition on the Web, supplementing previously available data from 1992–1993. Maintained and supported by the Geospatial and Statistical Data Center at the University of Virginia, this site offers researchers access to *ARL Statistics* with documentation.⁴

The site offers maps and graphics depicting current library trends. For the particularly adventurous, the site links to an interactive graphics and statistics page, allowing users to manipulate their data queries. One may choose univariate, bivariate, or multivariate statistics in addition to a vast array of selections with which to customize a query. The interactive pages also include options for regional aggregates, customized samples of observations, simple rank order tabulations of data, and the ability to create ratios of any two variables. These and other capabilities are located at <http://fisher.lib.virginia.edu/arl/>.

The ARL Statistics datafiles since 1908 can be retrieved in spreadsheet format from <http://www.arl.org/stats/annualsurveys/arlstats/mrstat.shtml>.

The ARL Statistics and Measurement Program Web site is located at <http://www.arl.org/stats/>.

ANALYSIS OF SELECTED VARIABLES OF UNIVERSITY LIBRARIES, 2006–2007

The percentages and ratios below are select indicators that describe the condition of ARL university libraries. The high and low figures indicate the range, while the mean and median indicate the central tendency of the distributions for ARL university libraries. Note that a distribution is normal when the mean and the median figures are identical. If the mean is larger than the median then the distribution is positively skewed, and if the opposite is true the distribution is negatively skewed.

ARL STATISTICS QUESTIONNAIRE, 2006–2007

INSTRUCTIONS FOR COMPLETING THE QUESTIONNAIRE

General Instructions

Definitions of statistical categories can be found in NISO Z39.7-2004, *Information Services and Use: Metrics & Statistics for Libraries and Information Providers--Data Dictionary* (<http://www.niso.org/emetrics/current/index.html>). ARL has been modifying the interpretation of the standard definitions to address questions posed by the library staff at various member institutions that complete the survey and with feedback from the ARL Statistics and Assessment Committee (<http://www.arl.org/stats/program/meeting.html>).

Please do not use decimals. All figures should be rounded to the nearest whole number.

Please respond to every question. If an exact figure cannot be provided, use NA/UA to indicate that the figure is either unavailable or not applicable. If the appropriate answer is zero or none, use 0.

Although the form allows for data to be entered from both main and branch campuses, an effort should be made to report figures for the main campus only. (The U.S. National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS) defines a **branch institution** as “a campus or site of an educational institution that is not temporary, is located in a community beyond a reasonable commuting distance from its parent institution, and offers organized programs of study, not just courses.”) If figures for libraries located at branch campuses are reported, please specify which branch libraries are included and which ones are excluded in the notes below.

A **branch library** is defined as an auxiliary library service outlet with quarters separate from the central library of an institution, which has a basic collection of books and other materials, a regular staffing level, and an established schedule. A branch library is administered either by the central library or (as in the case of some law and medical libraries) through the administrative structure of other units within the university. Departmental study/reading rooms are not included.

The questionnaire assumes a fiscal year ending **June 30, 2007**. If your fiscal year is different, please indicate this in the notes below by adjusting the reporting period.

Footnotes. Explanatory footnotes will be included with the published statistics. Provide any notes you may have in the footnotes area at the end of the survey. Reporting libraries are urged to record there any information that would clarify the figures submitted in that line, e.g., the inclusion and exclusion of branch campus libraries. Please make an effort to word your footnotes in a manner consistent with notes appearing in the published report, so that the ARL Office can interpret your footnotes correctly.

Specific Instructions

Question 1. Volumes in Library. Use the ANSI/NISO Z39.7-2004 definition for **volume** as follows:

*a single physical unit of any printed, typewritten, handwritten, mimeographed, or processed work, distinguished from other units by a separate binding, encasement, portfolio, or other clear distinction, which has been **cataloged, classified, and made ready for use**, and which is typically the unit used to charge circulation transactions. Either a serial volume is bound, or it comprises the serial issues that would be bound together if the library bound all serials.*

Include duplicates and bound volumes of periodicals. For purposes of this questionnaire, unclassified bound serials arranged in alphabetical order are considered classified. Exclude microforms, maps, nonprint materials, and uncataloged items. If any of these items cannot be excluded, please provide an explanatory footnote

Include government document volumes that are accessible through the library's catalogs regardless of whether they are separately shelved. "Classified" includes documents arranged by Superintendent of Documents, CODOC, or similar numbers. "Cataloged" includes documents for which records are provided by the library or downloaded from other sources into the library's card or online catalogs. Documents should, to the extent possible, be counted as they would if they were in bound volumes (e.g., 12 issues of an annual serial would be one or two volumes). Title and piece counts should not be considered the same as volume counts. If a volume count has not been kept, it may be estimated through sampling a representative group of title records and determining the corresponding number of volumes, then extrapolating to the rest of the collection. As an alternative, an estimate may be made using the following formulae:

52 documents pieces per foot
10 "traditional" volumes per foot
5.2 documents pieces per volume

Include e-book units, as long as these e-books are owned or leased and have been cataloged by your library. Include electronic books purchased through vendors such as NetLibrary® or Books 24x7, and e-books that come as part of aggregate services. Include individual titles of e-book sets that are treated as individual reference sources. Include locally digitized electronic books and electronic theses and dissertations. Provide a footnote explaining how many e-books you are reporting, preferably by specifying the products and the number of titles in a note.

Include volumes purchased collectively where the cost is shared at the time of purchase.

If either formulas or sampling are used for deriving your count, please indicate in a footnote.

Question 1b. Volumes Added. Include only volumes cataloged, classified, and made ready for use. Include government documents if they have been included in the count of volumes on line 1a. Do not include as part of Volumes Added Gross any government documents or other collections (such as large gift collections or e-book packages) that were added to the collection as the result of a one time download or addition to the OPAC. Include these items in Volumes Held of the previous year (Line 1a) and provide a footnote explaining the revision of Line 1a.

Question 2. Monographic Volumes Purchased. Report number of volumes purchased; do not include volumes received or cataloged. Include all volumes for which an expenditure was made during 2006-07, including volumes paid for in advance but not received during the fiscal year. Include monographs in series and continuations. Include e-books that fit the NetLibrary® model, i.e., electronic manifestations of physical entities and/or units; provide a footnote explaining how many e-books you are reporting, preferably by specifying the products and the number of titles. If only number of titles purchased can be reported, please report the data and provide an explanatory footnote.

Question 3: Basis of Volume Count. A physical count is a piece count; a bibliographic count is a catalog record count.

Questions 4-5. Serials. Use the following definition for a serial:

a publication in any medium issued in successive parts bearing numerical or chronological designations and intended to be continued indefinitely. This definition includes periodicals, newspapers, and annuals (reports, yearbooks, etc.); the journals, memoirs, proceedings, transactions, etc. of societies; and numbered monographic series.

Report the total number of unique serial titles, NOT SUBSCRIPTIONS, that you currently acquire. Do not include duplicate counts of serial titles. To the extent possible, report all government document serials even if housed in a separate documents collection. Verify the inclusion or exclusion of document serials in Question 5. Exclude unnumbered monographic and publishers' series. Electronic serials acquired as part of a bundle or an aggregated package should be counted by title, even if they are not cataloged, as long as they are made accessible by the library.

Question 4a. Serial titles currently purchased. In the case of consortial agreements, count under 'serial titles currently purchased' those titles for which the library pays any amount from its budgeted expenditures. Include all titles that are part of bundles or aggregated packages, even if your library makes a partial payment for access to those titles. If a purchased title includes electronic access to the title, count that title ONLY ONCE (DEDUPED) as electronic only. If a database includes full-text and abstracted titles, the number of full-text titles can be counted.

Question 4b. Serial titles: Not Purchased. If serial titles have been purchased through a consortium whose budget is centrally funded and independent from the library's budget, these serials should be reported under 'serial titles currently received but not purchased.'

Report other titles that your library receives and does not pay for directly under 'serial titles received but not purchased.'

Record those serial titles received without purchase for whatever reason. If within a purchased or aggregated package it cannot be determined that some titles are not purchased, report all titles as purchased.

If separate counts of nonpurchased and purchased serial titles are not available, report only the total number of serial titles currently purchased and received on line 4, and report U/A for lines 4a and 4b.

Question 6. Microforms. Report the total number of physical units: reels of microfilm, microcards, and microprint and microfiche sheets. Include all government documents in microform; provide a footnote if documents are excluded.

Question 7. Government documents. Report the total number of physical units (pieces) of government documents in paper format that have not been counted elsewhere. Include local, state, national, and international documents; include documents purchased from a commercial source if shelved with separate documents collections and not counted above. Include serials and monographs. To estimate pieces from a measurement of linear feet, use the formula $1 \text{ foot} = 52 \text{ pieces}$ and indicate in a footnote that the count is based on this estimate. Exclude microforms and nonprint formats such as maps or CD-ROMs. Adjust line 1a, i.e., last year's Volumes Held, and provide a footnote if you are adding records to the OPAC for government documents previously held but not counted as part of Volumes Held (line 1a).

Question 8. Computer files. Include the number of pieces of computer-readable disks, tapes, CD-ROMs, and similar machine-readable files comprising data or programs that are locally held as part of the library's collections available to library clients. Examples are U.S. Census data tapes, sample research software, locally-mounted databases, and reference tools on CD-ROM, tape or disk. Exclude bibliographic records used to manage the collection (i.e., the library's own catalog in machine-readable form), library system software, and microcomputer software used only by the library staff.

Question 9. Manuscripts and archives. Include both manuscripts and archives measured in linear feet.

Question 10. Cartographic materials. Include the numbers of pieces of two- and three-dimensional maps and globes. Include satellite and aerial photographs and images.

Question 11. Graphic materials. Include the number of pieces of prints, pictures, photographs, postcards, slides, transparencies, film strips, and the like.

Question 12. Audio materials. Include the number of pieces of audiocassettes, phonodiscs, audio compact discs, reel-to-reel tapes, and other sound recordings.

Question 13. Film and video materials. Include the number of pieces of motion pictures, videocassettes, video laser discs, and similar visual materials.

Questions 14-20. Expenditures. Report all expenditures of funds that come to the library from the regular institutional budget, and from sources such as research grants, special projects, gifts and endowments, and fees for service. (For question 17, include non-library funds; see instruction Q17.) Do not report encumbrances of funds that have not yet been expended. **Canadian libraries should report expenditures in Canadian dollars.** (For your information, if interested in determining figures in U.S. dollars, divide Canadian dollar amounts by 1.1323, the average monthly noon exchange rate published in the Bank of Canada *Review* for the period July 2006-June 2007.) **Please round figures to the nearest dollar.**

Question 15a. Monographs. Report expenditures for volumes purchased counted on line 2.

Question 15b. Serial titles. Report expenditures for serial titles counted on line 4a. Exclude unnumbered monographic and publishers' series, and encumbrances.

Question 15c. Other library materials. Include expenditures for all materials not reported in Questions 15a and 15b, e.g., backfiles of serials, charts and maps, audiovisual materials, manuscripts, etc. If expenditures for these materials are included in lines 15a and/or 15b and cannot be disaggregated, please report U/A and provide a footnote. Do not include encumbrances.

Question 15d. Miscellaneous expenditures. Include any other **materials funds expenditures** not included in questions 15a-c, e.g., expenditures for bibliographic utilities, literature searching, security devices, memberships for the purposes of publications, etc. Please list categories, with amounts, in a footnote. **Note:** If your library does not use materials funds for non-materials expenditures—i.e., if those expenditures are included in "Other Operating Expenditures"—**report 0, not U/A**, on line 15d.

Question 16. Contract Binding. Include only contract expenditures for binding done outside the library. If all binding is done in-house, state this fact and give in-house expenditures in a footnote; do not include personnel expenditures. (This figure should also be reported in the 2006-07 ARL Preservation Survey, question 7b.)

Questions 17. Salaries and wages. Exclude fringe benefits. If professional and support staff salaries cannot be separated, enter U/A, on lines 17a and 17b and enter total staff on line 17.

Question 17c. Salaries and wages: Student Assistants. Report 100% of student wages regardless of budgetary source of funds. Include federal and local funds for work study students.

Question 19. Other operating expenditures. Exclude expenditures for buildings, maintenance, and fringe benefits.

Questions 21–25. Electronic expenditures. These items are intended to indicate what portion of your institution's total library expenditures are dedicated to electronic resources and services. Please use the Footnotes to indicate any

electronic materials expenditures you believe not to be covered by these questions. *Many expenditures recorded in these questions should have been included in Question 20, total library expenditures.*

Question 21. One-time electronic resource purchases. Report expenditures that are not current serials (i.e. are non-subscription, one-time, or monographic in nature) for software and machine-readable materials considered part of the collections. Examples include periodical backfiles, literature collections, one-time costs for JSTOR membership, etc. Expenditures reported here may be derived from any of the following categories: Monographs (Q15a), Other Library Materials (Q15c), Miscellaneous (Q15d), or Other Operating Expenditures (Q19).

Question 22. Ongoing electronic resource purchases. Report subscription expenditures (or those which are expected to be ongoing commitments) for serial publications whose primary format is electronic and for online searches of remote databases such as OCLC FirstSearch, DIALOG, Lexis-Nexis, etc. Examples include paid subscriptions for electronic journals and indexes/abstracts available via the Internet, CD-ROM serials, and annual access fees for resources purchased on a “one-time” basis, such as literature collections, JSTOR membership, etc. Not all items whose expenditures are counted here will be included in Serial titles currently received (Question 4) or Serials Expenditures (Question 15b).

Q23. Bibliographic Utilities, Networks, and Consortia. Because it is increasingly common for ARL Libraries to enter into consortial arrangements to purchase access to electronic resources, both “Library” and “External” expenditure blanks and instructions are provided. Please use a footnote to describe expenditures that you believe are not covered by the question, or situations that do not seem to fit the instructions.

Q23a. From internal library sources. Report expenditures paid by the Library for services provided by national, regional, and local bibliographic utilities, networks, and consortia, such as OCLC and RLG, unless for user database access and subscriptions, which should be reported in Questions 21 or 22. Include only expenditures that are part of Other Operating Expenditures (Q19).

Q23b. From external sources. If your library receives access to computer files, electronic serials or search services through one or more centrally-funded system or consortial arrangements for which it does not pay fully and/or directly (for example, funding is provided by the state on behalf of all members), enter the amount paid by external bodies on its behalf. If the specific dollar amount is not known, but the total student FTE for the consortium and amount spent for the academic members are known, divide the overall amount spent by your institution’s share of the total student FTE.

Q24. Computer hardware and software. Report expenditures from the library budget for computer hardware and software used to support library operations, whether purchased or leased, mainframe or microcomputer, and whether for staff or public use. Include expenditures for: maintenance; equipment used to run information service products when those expenditures can be separated from the price of the product; telecommunications infrastructure costs, such as wiring, hubs, routers, etc. Include only expenditures that are part of Other Operating Expenditures (Q19).

Q25. Document Delivery/Interlibrary Loan. Report expenditures for document delivery and interlibrary loan services (both borrowing and lending). Include fees paid for photocopies, costs of telefacsimile transmission, royalties and access fees paid to provide document delivery or interlibrary loan. Include fees paid to bibliographic utilities if the portion paid for interlibrary loan can be separately counted. Include only expenditures that are part of Miscellaneous Materials Expenditures (Q15d) or Other Operating Expenditures (Q19), and only for those ILL/DD programs with data recorded in Questions 34-35.

Questions 26. Personnel. Report the number of FTE (full-time equivalent) staff in filled positions, or positions that are only temporarily vacant. ARL defines temporarily vacant positions as positions that were vacated during the fiscal year for which ARL data were submitted, for which there is a firm intent to refill, and for which there are expenditures for

salaries reported on line 17.

Include cost recovery positions and staff hired for special projects and grants, but provide an explanatory footnote indicating the number of such staff. If such staff cannot be included, provide a footnote. To compute full-time equivalents of part-time employees and student assistants, take the total number of hours per week (or year) worked by part-time employees in each category and divide it by the number of hours considered by the reporting library to be a full-time work week (or year). **Round figures to the nearest whole numbers.**

Question 26a. Professional Staff. Since the criteria for determining professional status vary among libraries, there is no attempt to define the term “professional.” Each library should report those staff members it considers professional, including, when appropriate, staff who are not librarians in the strict sense of the term, for example computer experts, systems analysts, or budget officers.

Question 26b. Support Staff. Report the total FTE (see instruction 26) of staff not included in 26a.

Question 26c. Student Assistants. Report the total FTE (see instruction Q26) of student assistants employed on an hourly basis whose wages are paid from funds under library control or from a budget other than the library’s, including federal work-study programs. Exclude maintenance and custodial staff.

Question 27. Number of staffed library service points. Count the number of staffed public service points in the main library and in all branch libraries reported in this inventory, including reference desks, information desks, circulation, current periodicals, reserve rooms, reprographic services (if staffed as a public facility), etc. Report the number of designated locations, not the number of staff.

Question 28. Number of weekly public service hours. Report an unduplicated count of the total public service hours per typical full-service week (i.e., no holidays or other special accommodations) across both main library and branches using the following method (corresponds to IPEDS): If a library is open from 9:00 a.m. to 5:00 p.m. Monday through Friday, it should report 40 hours per week. If several of its branches are also open during these hours, the figure remains 40 hours per week. Should Branch A also be open one evening from 7:00 p.m. to 9:00 p.m., the total hours during which users can find service somewhere within the system becomes 42 hours per week. If Branch B is open the same hours on the same evening, the count is still 42, but if Branch B is open two hours on another evening, or remains open two hours later, the total is then 44 hours per week. **Exclude 24-hour unstaffed reserve or similar reading rooms.** The maximum total is 168 (i.e., a staffed reading room open 7 days per week, 24 hours per day).

Questions 29–30. Instruction. Sampling based on a typical week may be used to extrapolate TO A FULL YEAR for Questions 29 and 30. Please indicate if responses are based on sampling.

Question 29. Presentations to Groups. Report the total number of sessions during the year of presentations made as part of formal bibliographic instruction programs and through other planned class presentations, orientation sessions, and tours. If the library sponsors multi-session or credit courses that meet several times over the course of a semester, each session should be counted. Presentations to groups may be for either bibliographic instruction, cultural, recreational, or educational purposes. Presentations both on and off the premises should be included as long as they are sponsored by the library. Do not include meetings sponsored by other groups using library meeting rooms. Do not include training for library staff; the purpose of this question is to capture information about the services the library provides for its clientele. Please indicate if the figure is based on sampling.

Question 30. Participants in Group Presentations. Report the total number of participants in the presentations reported on line 29. For multi-session classes with a constant enrollment, count each person only once. Personal, one-to-one

instruction in the use of sources should be counted as reference transactions on line 31. Please indicate if the figure is based on sampling. Use a footnote to describe any special situations.

Question 31. Reference Transactions. Report the total number of reference transactions. A **reference transaction** is

an information contact that involves the knowledge, use, recommendations, interpretation, or instruction in the use of one or more information sources by a member of the library staff. The term includes information and referral service. Information sources include (a) printed and nonprinted material; (b) machine-readable databases (including computer-assisted instruction); (c) the library's own catalogs and other holdings records; (d) other libraries and institutions through communication or referral; and (e) persons both inside and outside the library. When a staff member uses information gained from previous use of information sources to answer a question, the transaction is reported as a reference transaction even if the source is not consulted again.

If a contact includes both reference and directional services, it should be reported as one reference transaction. Include virtual reference transactions (e.g., e-mail, WWW form, chat). Duration should not be an element in determining whether a transaction is a reference transaction. Sampling based on a typical week may be used to extrapolate TO A FULL YEAR for Question 31. Please indicate if the figure is based on sampling.

EXCLUDE SIMPLE DIRECTIONAL QUESTIONS. A directional transaction is an information contact that facilitates the logistical use of the library and that does not involve the knowledge, use, recommendations, interpretation, or instruction in the use of any information sources other than those that describe the library, such as schedules, floor plans, and handbooks.

Questions 32-33. Circulation. For Question 32, count the number of initial circulations during the fiscal year from the general collection for use usually (although not always) outside the library. Do not count renewals. Include circulations to and from remote storage facilities for library users (i.e., do not include transactions reflecting transfers or stages of technical processing). Count the total number of items lent, not the number of borrowers.

For Question 33, report total circulation for the fiscal year including initial transactions reported on line 32 and renewal transactions. Exclude reserve circulations; these are no longer reported.

Questions 34–35. Interlibrary Loans. Report the number of requests for material (both returnables and non-returnables) provided to other libraries on line 34 and the number of filled requests received from other libraries or providers on line 35. On both lines, include originals, photocopies, and materials sent by telefacsimile or other forms of electronic transmission. Include patron-initiated transactions. Exclude requests for materials locally owned and available on the shelves or electronically. Do not include transactions between libraries covered by this questionnaire.

Questions 36. Ph.D. Degrees. Report the number awarded during the 2006-07 fiscal year. Please note that only the number of Ph.D. degrees are to be counted. Statistics on all other advanced degrees (e.g., D.Ed., D.P.A., M.D., J.D.) should not be reported in this survey. If you are unable to provide a figure for Ph.D.s only, please add a footnote.

Question 37. Ph.D. Fields. For the purposes of this report, Ph.D. fields are defined as the specific discipline specialties enumerated in the U.S. Department of Education's Integrated Postsecondary Education Data System (IPEDS) "Completions" Survey. Although the IPEDS form requests figures for all doctoral degrees, only fields in which Ph.D.s are awarded should be reported on the ARL questionnaire. Any exceptions should be footnoted.

Question 38. Instructional Faculty. Instructional faculty are defined by the U.S. Dept. of Education as

members of the instruction/research staff who are employed full-time as defined by the institution, including faculty with released time for research and faculty on sabbatical leave.

Full-time counts generally exclude faculty who are employed to teach fewer than two semesters, three quarters, two trimesters, or two four-month sessions; replacements for faculty on sabbatical leave or leave without pay; faculty for preclinical and clinical medicine; faculty who are donating their services; faculty who are members of military organizations and paid on a different pay scale from civilian employees; academic officers, whose primary duties are administrative; and graduate students who assist in the instruction of courses. Please be sure the number reported, and the basis for counting, are consistent with those for 2005-06 (unless in previous years faculty were counted who should have been excluded according to the above definition). Please footnote any discrepancies.

Questions 39–42. Enrollment. U.S. libraries should use the Fall 2006 enrollment figures reported to the Department of Education on the Integrated Postsecondary Education Data System survey. Please check these figures against the enrollment figures reported to ARL last year to ensure consistency and accuracy. **Note:** In the past, the number of part-time students reported was FTE; the number now reported to IPEDS is a head count of part-time students. Canadian libraries should note that the category “graduate students” as reported here includes all post-baccalaureate students.

FOOTNOTES

Please consult the data entry Web interface (www.arlstatistics.org) for a copy of last year’s footnotes. These can be found under “Historical Data” by clicking a survey’s arrow icon under the “View Summary” column and then selecting the “Footnotes” tab. Explanatory footnotes will be included with the published statistics. Reporting libraries are urged to record in the footnote section any information that would clarify the figures submitted, e.g., the inclusion and exclusion of branch campus libraries (see the “General Instructions” for definition of branch campus libraries). Please make an effort to word your footnotes in a manner consistent with notes appearing in the published report, so that the ARL Office can interpret your footnotes correctly.

On the web form, you will be able to add footnotes to individual questions, as well as footnotes that apply to your entire institution. Please provide any information which would clarify the figures submitted, e.g., the inclusion of branch campus libraries or any special projects which might cause radical increases or decreases. Please use the footnotes in the *ARL Statistics 2005–2006* for comparison if necessary. Please consult the data entry Web interface (www.arlstatistics.org) for a copy of last year’s footnotes. These can be found under “Historical Data” by clicking a

survey's arrow icon under the "View Summary" column and then selecting the "Footnotes" tab. Please make an effort to word your footnotes in a manner consistent with notes appearing in the published report, so that the ARL Office can interpret your footnotes correctly.

AUBURN	
	All figures are as of 09/30/2007.
	Includes the Library of Architecture, Design and Construction, and the Cary Veterinary Medical Library.
4	While this data appears to show a significant increase for Auburn, our 2005 06 data was inadvertently under reported for serial titles. The data for the current year is similar to data reported for 2004 05 and for previous years. The greatest discrepancy is for 4b (serials titles received but not purchased). Auburn reported 18,563 for this category in 2004-2005, but only 8,622 in 2005-2006. Approximately 46% of the serials had ISSNs.
12	Increase this year is due to the addition of over 104,000 titles in the Naxos Music Library.
22	Increase in electronic purchases reflects the number of journals moved from paper subscriptions to online only subscriptions.
28	The main library has been operating on a 24 x 5 schedule during this year, which accounts for the increased hours.
BOSTON

BRIGHAM YOUNG	
	All figures are as of 12/31/2006.
4	This figure does not include non ISSN print titles that could not be easily resolved as to whether they fit the serial titles definition description in the instructions. The serials totals reported here were estimated from counts determined at the end of 2007 and will be reported in the next ARL Statistics Survey.
4ai	Electronic serials figures taken primarily from de-duped list with or without ISSN from SFX.

	UBCO Campus: figures are included for a full 12 month period for the first time (note: 2005 06 figures were included for a partial year of operation only). Some unusual changes in the figures reflect the growth in resources and staffing at this rapidly growing campus.
1b	Fewer additions due to fewer e-books in the catalogue than 2006.

QUESTION NUMBER	FOOTNOTE
4-4a	New methodology: serials title count.
4aii	We probably undercounted print/microforms.
4bii	New methodology applied as much as possible: unique serial titles.
8	Decrease in CD-ROMs DVD-ROMs.
15a	Increase in expenditure allocation for monographs; full year of UBCO collections budget. Increase in value of Canadian Dollar; expenditures increase does not match volume increase because volumes/e-books are not yet in catalogue.
15-25	Expenditures as reported in Canadian dollars: (15a) \$3,650,502; (15b) \$12,061,971; (15c) \$817,186; (15d) \$418,256; (15) \$16,947,915; (16) \$201,672; (17a) \$8,531,577; (17b) \$7,199,592; (17c) \$773,588; (17) \$16,504,757; (19) \$3,556,528; (20) \$37,210,872; (21) \$132,366; (22) \$7,824,961; (23a) \$380,284; (23b) \$0; (24) \$295,812; (25) \$166,901.
17a	Increase due to significant signing bonus for all staff; full year of UBCO staffing.
17b	Percentage decrease does not match percentage decrease in FTE because of significant increase in salary for all staff (signing bonus plus percentage increase).
17c	Decrease due to fewer student assistants employed and Learning Commons being under construction (IKBLC).
20	Increase due to full year of operations at UBCO and salary increases for all staff, including signing bonus (over \$2,500 per employee).
23a	Increase in catalogue support due to shelf ready program with 3 main vendors (\$291,300).
24	Includes Serials Solutions, Nesstar, Ex Libris, Endeavor, hardware.
26a	UBCO: full year of operations.
26b	Decrease due to continuation of shift in staff numbers from CUPE employee group to management/professional employee group.
BROWN

2	Figure includes 17,098 e-books.
15c	Beginning with 2006-07, better data available to differentiate expenditures for other materials (previously included in monograph expenditures by default).
29	2006 07 change in campus wide orientation program reduced the number of Library tours, etc.
CALIFORNIA, BERKELEY	
1a	Volumes held June 30, 2006 revised to 10,537,586. The substantial one time increase to this line largely reflects the first time inclusion in our ARL count of cataloged electronic books owned or leased by UC Berkeley. The bulk of this number reflects 360,572 e-book volumes purchased collectively with University of California partner libraries (Acta Sanctorum, Literature Online, Oxford Scholarship Online, Early English books Online, Eighteenth Century Collections Online, Safari Tech Books, Schillers Werke). Additionally, the Berkeley campus has independently acquired 73,857 e-book volumes (netLibrary selections, World Bank E Library, Humanities/History E Books Project, Oxford Scholarship Online Special Subjects, Congressional Hearings Retrospective A).
3	We used a combination of both physical and bibliographic counts to respond to this question. The source of our information for supplying volume counts has historically been a physical count created by aggregating annual incremental reports by library unit managers. However, this year e-books were added to the question, and we used a bibliographic count for these. Counts for e-books acquired through collective purchase are generated by our system wide cataloging division. Counts for e-books acquired through independent campus level purchase are derived from our local inventory managed by the Electronic Resources Librarian through an Electronic Resource Finder or ERF.
4ai-4bii	This represents a dramatic drop in the equivalent question for 2005 06 based on the new definition that counts only 'titles' and requires de duplication efforts. Our method for generating a total number for serials relies upon a review of our OPAC. We were able to de-duplicate holdings for multiple print titles, and holdings in which we had both an open holding statement for electronic and print. We are unable to distinguish paid for and free active titles with our current method of generating the data so we entered the totals in 4a and 4b and left 4b entries U/A.

1a	Volumes held June 30, 2006 revised to 3,756,967. This number includes 115,871 ECCO e books that were batch loaded in 2006 07.
4	The large increase in serial count is due to the new ARL instructions/method for counting serials and better access to more accurate numbers through Serials Solutions.
4bi	Of this number, 12,658 are government-published serials, which are a mix of electronic and print, but we have no easy way of separating out the counts.
7	Decrease due to the Government Publications Department retro cataloging some of these items, which are now being counted in with the volume count.
11	Number rose dramatically due to the Archives Department acquiring a large collection of photos/negatives/slides during the 2006-07 fiscal year
15d	Miscellaneous Expenditures: electronic archiving \$8,158., preservation (not incl. binding) \$2,607.09; GPO shelflist service \$4,759.55; III services \$106,280; interlibrary loan \$21,043.42, MARC record batches \$15,600; memberships \$144,146 (Alliance 88,566; CRL pd 07/08; GWLA 8,100+3,200; ARL 21,580 + SPARC 5,200; ICPRS 15,000; Heritage gateway 2,500); BCR \$206,456; OPAC enhancements \$19,350; projects \$98,596.06; storage (Boulder) \$18,360, RLIN \$999.53; Prospector \$4,500; shelf ready processing \$1,385.90.

27	Lower count reflects recent consolidation of service points. This count will be reduced even further for 2007-08.
31	Reference transactions are bit lower due to closure and move of business library during construction.
COLORADO STATE	
1a	Volumes held June 30, 2006 revised to 2,003,690. Volumes held previously were adjusted due to a change in inventory reporting methodology.

2	Of this figure, 5,917 are new e book purchases in 2006-07. UConn pays some amount for annual licensing and/or maintenance for a total of 333,664 e books. The overall reduction in the number of monographs purchased from 2005-06 reflects an intentional reduction in purchasing print resources, in favor of electronic.
4-4a	This number is lower than in 2005-06 because of de-duplication.
4b	This number is significantly higher than in 2005-06 because of an affirmative effort to include open access materials in our catalog and holdings.
6	111,617 microforms were withdrawn in 2006-07.

9	Figure is in cubic feet.

QUESTION NUMBER	FOOTNOTE
13	Video/DVD count includes an increase of 5,835 due to a more precise online count.
15	Increase in serial expenditures and decrease in "other" expenditures reflects in part the fact that more special format serial expenditures were included in serials expenditures. Expenditures for integrating resources were included in monographic expenditures.

17a	For libraries other than Law, includes expenditures for librarians and archivists only. For Law, includes expenditures for librarians and "exempt" staff.

Because this methodology is new, some inaccuracies or errors exist; the data quality will improve as the system and method mature.
32	Includes ILL and some staff transactions.
40,42	Employee degree only.

|------|--|
| 1 | Includes 182,049 e books; collections were named in 2005-06; this is for entire system, cannot split out BioMedical. |
| 1bii | Includes a net increase of 3,321 digital monographs. This figure is much lower than 2005-06 because all digital monographs were added to this number starting in 2005-06, so 2005-06 was an unusually high number. |
| 2 | This is an approximation; payment lines are used as proxy for volumes for mono series/MPIs. |
| 4 | Serials count has dropped in part because of new methodology with 2006-07; 2,631 duplicates were identified by means of ISSN. |
| 4ai | Includes 15,690 brief records in Serials Solutions that were deleted and (mostly) reloaded after July 1 multiple times; have no way to include in de-duping process, or to determine which might apply to BioMedical. It was difficult to change counting methodology long after end of fiscal year. Includes ceased titles. See also footnote under BioMedical 4.a.i. |
| 23a | We continue to opt out of this question, feeling it is too poorly defined to provide a meaningful basis of comparison between libraries. |
| 42 | Part time enrollment in the graduate and professional schools fluctuates due to variations in applications and available slots in the programs. |

| 1a | Volumes held June 30, 2006 revised to 5,785,496. The change from 5,665,241 to 5,785,496 is the result of a one time download of e-book MARC records into the catalog of 120,255 monographic titles. |
| 1b | Increase due to the Divinity School library withdrawing more books from its collection in 2006-07 and the Law Library reducing its collection to prepare for reduced shelving space in a renovated library. |

	Excludes libraries at University of Michigan Dearborn and University of Michigan Flint.
4	This total includes 15,401 uncatalogued electronic serial items, which have not been de duplicated amongst themselves or against the remaining 56,387 catalogued titles. This latter number breaks down as 28,969 serials which are available electronically and 27,418, which are available in print only. Given the manner in which we record our data, we cannot give these as subcategories of purchased and not purchased, while still de duplicating on ISSN. The average percentage of catalogued titles without ISSNs, across the libraries for which we report the data, is roughly 35%.
8	This figure includes 1,000,000 files of titles digitized from our collections in the Michigan Digitization Project.
MICHIGAN STATE	
	Includes: Biomedical & Physical Sciences Library; Business Library; Engineering Library; Gull Lake Library; International Center Library; Mathematics Library; Planning & Design Library; Veterinary Medical Center Library.
4	The total de duplicated count for MSU (including Main, Government Documents, and Law) is 72,815 titles. This figure is derived from a de duplicated count provided by Serials Solutions (from 107,971 total serial holdings, print and electronic). Only titles that are unique to a single database can be assigned to paid or unpaid; titles which are not unique to a single database are reflected in the de duplicated total of 72,815, but are not included in the sub categories as it is not possible to assign these titles to paid or unpaid at this time. The de duplicated count of titles present in more than one database is therefore only reflected as part of the aggregate total of 72,815.
31a	Based, in part, on sampling.

1a	Volumes held June 30, 2006 revised to 3,397,175.
4	This data, 2006-07, based on an extensive hand count of all serials currently received, and by the categories requested by ARL, as performed by our Acquisitions Dept during the month of January 2008.
15b	Of this \$6,302,220, \$2,230,000 is from the University-wide systems office for the four campus system. MU has over 50% of the students, but we use all of these journals.

NATIONAL LIBRARY OF MEDICINE	
	All figures are as of 09/30/2007.

32	These are internal circulations only.

	Excluded: Gallup Campus Branch Library, Los Alamos Campus Branch Library, Taos Campus Branch Library, Valencia Campus Branch Library.
NEW YORK	
	All figures are as of 08/31/2007.
1a	Volumes held June 30, 2006 revised to 4,881,106. The actual 2005 06 e books total is 432,000, but the reported number of 769,000 is overstated by 337,000. The actual number of e books in 2006 07 is 503,764.
1bi	Volumes added during 2006 07 decreased because 2005 06 figures were above average due to: #1 the processing of a large front log of materials in preparation for the systems migration and #2 the additional cataloging related to the RISM collection.
1bii	Part of regular ebb and flow of withdrawal of materials as items are sent to the offsite facility. The increase of withdrawals is not seen as out of the ordinary.
4	There was a net increase in the Division of Libraries' serials received due to the new counting method by title. Serials received for NYU overall decreased because of de-duping process across the Branch Libraries.
4a	The new counting methodology by serial titles instead of subscriptions increased the number of serials purchased. Purchased print titles decreased due to de-duping of print titles for which the Libraries had electronic access. The overall effect was a net increase of serials purchased for the Division of Libraries.
10	Cartographic materials were brought in with a newly acquired collection. Current cartographic materials remain small so any change in the total count will appear as a large percent change.
16	2006 07 figures are the normal contract binding expenses within a given year. 2005 06 numbers are understated because a portion of the expenses were pre paid in the previous year.
28	There is no actual decrease in total weekly public service hours reported. 2005 06 total hours were misreported as 379 instead of 119 because the summary sheet aggregated the hours from the different branch Libraries. Bobst has 119 weekly public service hours per week. Medical/Dental has 93 weekly public service hours per week. Law has 91 weekly public service hours per week.
36	There was a minor decrease of PhDs awarded in all programs.

Also: Law Library added 231 e books not previously counted; Health Sciences Library added 86 e books, plus 5,661 volumes to reflect more accurate counts obtained through new ILS.

QUESTION NUMBER	FOOTNOTE
1bi	Law Library added Making of Modern Law, containing 22,007 e books.
4	Journal titles de duped using ISSN as unique identifier. Titles without ISSNs were excluded entirely in order to eliminate items of a non serial nature. This has likely excluded some serial records lacking an ISSN, resulting in a possible undercount.
11	Significant increase in graphic items due to donation of major photographic collection (approx. 534,842 items) in 2006 07.
15d	Miscellaneous library material expenditures include payments for CRL memberships.
17a	Increase in professional salary expenditures due to more filled positions in 2006-07 and availability of funding for raises.

NOTRE DAME	
	Includes Hesburgh (Main) Library, Kresge (Law) Library, and the University Archives.
2	The number of e-books included in the total is 2,585.
4	The method for counting serials has been changed from the prior year according to instructions provided by ARL. The libraries were already reporting a count that was de duplicated by format type, although not by branches. The change in instructions resulted in an increase in serials titles currently received primarily due to counting individual titles provided by aggregators.
9	This figure represents our entire holdings. It consists primarily of archival records and manuscripts, but it also includes substantial quantities of printed, microfilm, artifact, audio, visual, film, graphic, and digital materials as well. Our controls over our records are based primarily on the creator of the records and only secondarily on the types of materials (University Archives).
15a	Several large collections were purchased in 2006 07. The value of e books has not been separately determined.
15b	Expenditures for electronic materials of a recurring nature have been reclassified from other library materials expenditures to serials expenditures for 2006 07.
15c	Expenditures for electronic materials of a recurring nature have been reclassified to serials expenditures in 2006 07.
15d	Miscellaneous materials expenditures consist primarily of memberships for the purpose of obtaining/ accessing publications and literature searching.
22	Reporting dual format materials as primary format electronic rather than print has resulted in an increase in expenditures for electronic materials. In prior years, the Libraries have reported dual format materials with a primary format of print.
26c	Includes students employed from other institutions in the summer.
OHIO	
	Includes: Athens (main), Chillicothe, Eastern, Lancaster, Southern, and Zanesville libraries, and the College of Osteopathic Medicine Learning Resource Center.

About 91% of our U.S. Government Documents electronic serials and 16% of our other electronic serials lack ISSNs. About 21% of our print serials (excluding government documents) lack ISSNs.
4a	Increase due to more thorough counts of electronic serials using new instructions; for example, full text e serials found in aggregator databases were included in this survey, but not in the 2005 06 survey.
4b	Increase due to more thorough counting of electronic serials using new instructions.
4bi	78% are U.S. government documents.
4bii	34% are U.S. government documents.
8	Decrease due to weeding project.
15d	Technical services \$94,796; memberships \$24,112; IngentaConnect Intouch alerting service \$982; document delivery \$89.
19	Decrease reflects impact of university budget cut for 2006-07; \$100,000 in funding shifted from this category to salaries and wages to cover minimum wage increase for student workers; \$94,796 technical services costs (OCLC etc.) shifted from this category to library materials expenditures beginning with 2006-07; \$465,000 fund balance earmarked for equipment and furniture purchases carried forward to 2007-08.

---	------------

19	The decrease from 2005-06 is comprised of two major components. First, an error was discovered in the accumulation of Other Operating Expenditures for 2005-06. The corrected total for 2005-06 is \$2,405,755. Secondly, the university, in response to unanticipated cuts in state funding implemented a budget reduction and cost containment program that froze spending for all but critical needs for the last quarter of 2006-07. Over \$500,000 of routine library expenditures were deferred as a result.
