University of Michigan Author's Addendum

Academic publishing involves a partnership between academic authors, institutions of higher learning, publishers, and, sometimes, granting agencies. Consistent with its commitment to academic freedom and to open and robust dissemination of knowledge, the University of Michigan supports the goal of having its faculty retain core intellectual property rights when their scholarly works are published. The terms of this addendum represent the minimum expected in the case of articles, book reviews, research reports, etc. being published in journals or book compilations.

This Addendum constitutes an integral part of this publishing agreement and is binding on both parties. Should there be conflicting terms or conditions between the body of this agreement and this addendum, this addendum shall be paramount. This publishing agreement, including the addendum, constitutes the final agreement between the AUTHOR (where the term "author" includes the plural) and PUBLISHER with respect to the publication of the Article and the allocation of rights provided by Copyright.

Addendum

1. *Teaching.* The Author shall retain the right to use, reproduce, distribute, perform, and display the Article in connection with the Author's own teaching, conference presentations, and lectures.

2. *Research.* The Author shall retain the right to make full use of the Article in future research and publications. The Author shall also have the right to republish the Article in whole or in part in any book the Author may write or edit after the Article has appeared. In such case, the Author will be expected to provide proper citation to the original publication.

3. *Repositories.* The Author shall retain the right to deposit the published version of the Article in an open-access digital repository maintained by the Author's employing institution, such as University of Michigan's "Deep Blue", by an academic consortium to which the employing institution belongs, such as the Committee on Institutional Cooperation (CIC), by a non-profit scholarly society, and/or by a governmental funding agency. At the Publisher's written request, open access to the Article may be delayed for a period not to exceed 12 months from the date of publication.

4. *Personal Website.* The Author shall retain the right to post the published version of the Article on the Author's personal website.

5. *Institutional Needs.* The Author shall retain the right to grant to the Author's employing institution limited permission to use the Article in connection with specific administrative activities such as accreditation, mandated reports to state or federal governments, or similar essential purposes.

6. *External Requirements.* The Author shall retain all rights necessary to comply with requirements and conditions of research grants or publishing subventions provided by government agencies or non-profit foundations.

7. *Moral Rights.* The Author shall have the right to be acknowledged as the creator/author of the Article in the original journal publication and in any subsequent republication. The Author (or any one of multiple authors speaking for him or herself) shall also have the right to refuse attribution if the article is later revised or modified in a manner unacceptable to the objecting party.

Addendum to Standard Publisher Copyright Assignment

It is important for an author to thoroughly consider the implications of the publishing agreement before signing it. Typically, the agreement will require that the author assign copyright in the work to the publisher, so that even the author's own use of the work may constitute infringement. In negotiating copyright assignment with a publisher, an author should carefully consider the range of possible future uses he or she may wish to reserve, such as making copies for teaching and research by both the author and others at the author's institution, and republishing the work as part of a larger work or on a web page.

Here is an example of a standard copyright assignment in a publication agreement:

"Author hereby transfers and assigns exclusively to Publisher all rights in the Work, including full copyright therein, including the right to reproduce and distribute it throughout the world in all forms, languages, and media now or hereafter known or developed."

Attached is a draft addendum with additional language reserving certain rights to the author.

If the author wishes to present an addendum to the publisher during the process of negotiation, the author should review the section of the publishing agreement that grants rights to the publisher and decide the best place to add language reserving certain uses. The author should customize the addendum accordingly. If other sections of the publishing agreement contain objectionable language the author may use the same addendum to address those as well.

If the author and the publisher agree as to the language in an addendum the author should have the publisher sign both documents first, and the author should be sure to retain signed copies.

While it is always worthwhile for authors to raise concerns over contractual language with their publisher prior to signing an agreement, it is worth noting that textbook publishers may be particularly unwilling to grant any greater rights to the author for academic use, since students constitute the main market targeted by the publisher, and the author's own institution might be expected to produce quite a high number of paying customers.

ADDENDUM TO PUBLISHING AGREEMENT

This Addendum is hereby incorporated by reference and made a part of the attached Publishing Agreement between _____ ("Publisher") and _____ ("Author").

The following is added to the end of Section ____:

"Publisher agrees to allow nonprofit educational and library duplication and distribution of the Work, including but not limited to reserves and coursepacks made by nonprofit or for-profit copyshops. Publisher shall include such permission on any copyright notice appearing on the Work, as follows:

'Copyright [date] [Publisher]. Permission is granted for nonprofit educational uses of this [article]. All other uses require permission from the publisher.'"

COMMITTEE ON INSTITUTIONAL COOPERATION

Statement on Publishing Agreements and Addendum to Publication Agreements for CIC Authors

<http://www.cic.net/Libraries/Library/authorsrights.sflb>

The Committee on Institutional Cooperation (CIC) STATEMENT ON PUBLISHING AGREEMENTS

The Committee on Institutional Cooperation (CIC)¹ is a consortium of 12 world-class American research universities, advancing their missions by sharing expertise, leveraging campus resources and collaborating on innovative programs. For 50 years, the CIC has created new opportunities for member universities to work together toward greater efficiency, effectiveness and impact. In 2006, the Provosts of the CIC member universities unanimously endorsed this statement and addendum to publication agreements. Since that time, faculty governance of 12 CIC campuses² have also endorsed the statement and addendum.

Publication is the lifeblood of a research university. It is incumbent upon faculty, campus administrators and librarians to ensure the free flow of scholarly information in fulfillment of our campus missions to advance the public good through research and education. Toward this end, our campuses are committed to supporting a sustainable publication process and a healthy publishing industry. The "information revolution" has greatly expanded the means for disseminating and utilizing scholarly discourse, but this opportunity for extending the reach and impact of our campuses is countered by social and economic conventions of some sectors of the publishing industry. Suitable publishing partners for academic enterprises should be encouraging the widest possible dissemination of the academy's work, and the management of copyright should be directed to encouraging scholarly output rather than unnecessarily fettering its access and use. Without some important changes in publishing practices, authors and readers will continue to be frustrated by barriers to the free flow of information that is an essential characteristic of great research universities.

Faculty authors should consider a number of factors when choosing and interacting with publishers for their works. The goal of publication should be to encourage widespread dissemination and impact; the means for accomplishing this will necessarily depend on the nature of the work in question, the author's circumstances, available suitable outlets, and expectations in the author's field of inquiry. In general, authors are encouraged to consider publishing strategies that will optimize short- and long-term access to their work, taking into account such factors as affordability, efficient means for distribution, a secure third-party archiving strategy, and flexible management of rights.

Protecting intellectual property rights is a particularly important consideration, as many authors unwittingly sign away all control over their creative output. Toward this end, the CIC encourages contract language that ensures that academic authors retain certain rights that facilitate archiving, instructional use, and sharing with colleagues to advance discourse and discovery. Accompanying this document is a model CIC publishing addendum that affirms the rights of authors to share their work in a variety of circumstances, including posting versions of the work in institutional or disciplinary repositories. While the particular circumstances and terms governing publication will vary on a case-by-case basis, the underlying principle of encouraging access to the creative output of our campuses should inhere in all of our efforts.

¹ The 12 CIC member universities are: University of Chicago; University of Illinois; Indiana University; University of Iowa; University of Michigan; Michigan State University; University of Minnesota; Northwestern University; The Ohio State University; The Pennsylvania State University; Purdue University; University of Wisconsin-Madison

² As of June 5, 2008, faculty governance from the following CIC universities have endorsed the statement and addendum: University of Illinois (both the Chicago and the Urbana-Champaign campuses); Indiana University; University of Iowa; University of Michigan; Michigan State University; University of Minnesota; Northwestern University; The Pennsylvania State University; The Ohio State University; Purdue University; and the University of Wisconsin-Madison.

Scholar's Copyright Addendum Engine

The Scholar's Copyright Addendum Engine will help you generate a PDF form that you can attach to a journal publisher's copyright agreement to ensure that you retain certain rights.

[\(get started\)](#)

Description

Each addendum gives you non-exclusive rights to create derivative works from your Article and to reproduce, distribute, publicly perform, and publicly display your article in connection with your teaching, conference presentations, lectures, other scholarly works, and professional activities. However, they differ with respect to how soon you can make the final published version available and whether you can authorize others to re-use your work in various ways. Below is a summary of the available options.

Science Commons / SPARC Addendum

Access - Reuse:

You retain sufficient rights to grant to the reading public a Creative Commons Attribution Non Commercial license or similar license that allows the public to re-use or re-post your article so long as you are given credit as the author and so long as the reader's use is non-commercial. (This is a joint offering from Science Commons and SPARC and represents a new version of the former SPARC Addendum.)

Other Options From Science Commons

Immediate Access:

You retain sufficient rights to post a copy of the published version of your article (usually in pdf form) online immediately to a site that does not charge for access to the article. (This is similar in many ways to the MIT Copyright Amendment below)

Delayed Access:

You also have the right immediately to post your final version of the article, as edited after peer review, to a site that does not charge for access to the article, but you must arrange not to make the published version of your article available to the public until six months after the date of publication.

Additional Options from MIT

MIT Copyright Amendment:

Developed at MIT, this amendment is a tool authors can use to retain rights when assigning copyright to a publisher. It will enable authors to continue using their publications in their academic work at MIT, to deposit them into the MIT Libraries' DSpace repository, and to deposit any NIH-funded manuscripts on the National Library of Medicine's PubMed Central database.
