University of Alberta Resources
- OER - Copyright Considerations: An Introduction
The first of two tutorials on OER and copyright created by the University of Alberta's Copyright and Licensing Office.
- OER - Copyright Considerations in Practice
The second of two tutorials on OER and copyright created by the University of Alberta's Copyright and Licensing Office.

OER are teaching, learning and research materials that are available in the public domain. These resources have an open license to allow for free use, adaption and redistribution. Still unsure about OER? Watch the video above to learn more!
Eligibility to Submit an Application

Each applicant must be the instructor of record. Course must be for enrolled students (i.e., not UCLA Extension courses) and can be at the undergraduate or graduate level.

Application Process and Deadlines

Applicants should fill out the form on the following pages and submit it as follows:

Mail print applications to:

UCLA Library Affordable Course Materials Initiative
11334 Charles E. Young Research Library
Mailcode 157511

Email electronic applications to: collections@library.ucla.edu

Applicants will receive confirmation notices when their application forms are received.

All applicants are required to attend a one-hour workshop at which Library staff members will introduce search strategies and possible sources for open-access or low-cost instructional resources. Following that workshop, each swardee will be assigned an individual librarian, who will work personally with him or her to assist with locating materials.

For Spring Quarter 2015: Applications are due by Friday, October 24.

Applications will be reviewed by a small committee of UCLA Library staff members involved in teaching and learning services and UCLA faculty honored for their teaching accomplishments.

Contact Information

For further information, contact:

Dawn Sevier
Director of UCLA Library Communications
Phone: 310.206.4109
Email: dsevier@library.ucla.edu
Open Educational Resources to support your course

by AMY KENYON on OCTOBER 20, 2010 · LEAVE A COMMENT · in BLOG, TEACHING STRATEGIES

We’ve blogged a couple of times recently about open educational resources (OER) and open course materials, with the intent of spurring interest on the part of Duke faculty in exploring the use of these types of materials in their courses, to supplement or replace textbooks. Now, during Open Access Week, seems a good time to remind faculty about the purpose and promise of OER, and encourage faculty to talk with CIT if they need help getting started.

OER are teaching and learning materials made freely available online, and can consist of textbooks, course readings, simulations, games, syllabi, quizzes, and basically any other material that can be used for education. Educause recently published one of their popular and practical “7 Things” guides about OER, outlining the growing importance of OER and open courses in higher education:

Educational resources developed in an open environment can be vetted and improved by a broad community of educators, resulting in materials that represent what the educational community sees as most valuable. By providing educators with new access to educational material, open resources have the potential to spur pedagogical innovation, introducing new alternatives for effective teaching. Moreover, learning resources that can be modified and reused promote collaboration and participation—two key elements of a Web 2.0 approach to teaching and learning. The resources required to develop high-quality learning materials and activities for a full complement of courses can be prohibitive for many institutions and instructors. By distributing the costs over a larger number of users, OER brings a greater range of tools within reach of more users. OER can also lower the costs for students to obtain educational content. OER...take(s) advantage of—and prompt(s)—developments in educational technology that facilitate new media, new formats, and new means of distribution. Giving faculty the ability to pick and choose the individual resources they want to use—and to modify those resources and “assemble” them in unique ways—promises greater diversity of learning environments.

What could OER mean for you? Some possibilities.....

- If you are dissatisfied with the textbooks available for your course, instead you could find materials relevant to your course learning objectives by searching any of the numerous repositories of OER that exist on the web (the Open Educational Resources Center for California links to several of these). You end up with materials customized for your course at no cost, and your students don’t pay for a textbook(s) you don’t feel is valuable.
- You may want to move some of the content coverage in your course outside of class time, in order to use class time more effectively for active and engaging learning activities to help your students synthesize and think critically about the materials. You could record lectures and post them online for students to view before class, but if instead you can locate high-quality OER on your course topics, you save yourself time and can devote that time to other tasks.
- If some of your students need some review of prior concepts in order to be successful in your
Open Educational Resources to support your course

https://cit.duke.edu/blog/2010/10/oer-for-courses

course, OER materials and assessments may allow you to provide learning materials for them without a lot of development time for you.

If you are interested in learning more about OER or strategizing about how to incorporate them into your course, contact CIT.

Amy Kenyon
Amy plans, implements and assesses faculty development programs for the improvement of teaching and learning, provides programs and resources designed to increase understanding of the teaching-learning process and manages personnel and other resources for the Center for Instructional Technology. Her interests are in course and program design, curriculum mapping, assessment, engaging teaching strategies for student learning, and e-textbooks, e-readers and open learning materials.

OER for Educators

Below are several resources that might be useful to the instructor who would like to know more about the open education movement and how to teach with open education resources.

**Contact North | Contact Nord**

**An Open Education Reader**

This is a collection of readings on open education with commentary created for a graduate course at Brigham Young University and edited by David Wiley. It includes chapters on intellectual property, free software, open source, open content, open textbooks, and research in open education.

**The Open Education Handbook**

This handbook is a deliverable of the LinkedOpen Project, and is a primer on the open education ecosystem, information about useful tools and software, references, a glossary of commonly used terms, case studies and examples, and answers to frequently asked questions.

**An Examination of the Lived Experience of Eleven Educators Who Have Implemented Open Textbooks in Their Teaching**

A masters thesis by Danielle Paradis out of Royal Roads University, Victoria, BC. Of particular interest is Chapter 4, Results. It includes quotes from teachers on how they found out about OER, their experience teaching with them, and motivations behind use.
The University Libraries are committed to supporting the digitally enhanced learning environment by providing innovative solutions to integrate library content and services into existing and future course environments. We currently offer a variety of services that can be customized to meet the needs of a particular class or an assignment. In addition, we are implementing several pilot projects focused on providing new and reformatted content that best meets the pedagogical needs of these emerging online course environments.

Contact us to consult about available eLearning services - learnlib@umn.edu.

**Unizin Engage Pilot**

The University Libraries along with partners in the Office of Information Technology, the Center for Educational Innovation, and the University Bookstores is providing access to the Unizin Engage platform in Spring 2016 and Fall 2016. Engage is a digital content platform that allows faculty to organize, deliver, and measure the uses of open and licensed content for a course. Engage student-course pricing is designed to provide significant savings due to the “All Student Acquire” model. Unizin publisher agreements provide aggressive discounts for students - often 50% off new textbook pricing.

Benefits include:
- Lower costs of publisher materials to students
- Access to publisher content on the first day of class
- All students have the same content, rather than an older version of text
- Direct integration with Moodle or Canvas, providing students with single sign on access to course material
- Additional tools for engagement with teachers and students - content based Q&A, content analytics on reading time, notes taken, and questions posed

Contact learnlib@umn.edu to discuss publisher availability, use of openly licensed or open textbook content in the Engage environment, or any questions you might have for us!

**Digital Coursepack**

Working with the University Libraries eLearning team to create your own digital coursepack containing library licensed materials, copyrighted materials, and freely available materials all in one place. The University Libraries’ digital coursepack project streamlines the course content creation process to make it easier for faculty and students to get the materials they need for success. Digital Course Packs also help save students money by utilizing materials already owned by the libraries.

**Content Discovery** We can help instructors find customized course content and materials already purchased through the University Libraries. The Libraries have access to thousands of full-text databases, journals, and e-books that can easily be integrated into your course environment. Utilizing library content saves students money. We can help you find it.
Content Acquisition
The University Libraries will investigate strategic purchases for new materials for direct course support. Work with the University Libraries eLearning and collections/liaison teams to identify content for purchase for your course. We are willing to explore a variety of format, copyright, and delivery issues to help make your experience as painless as possible.

Copyright/Intellectual property advising
Consult with Nancy Sims, Copyright Program Librarian, to learn more about copyright issues in the online course environment. The Copyright Information and Resources site as well as a variety of workshops are also available.

Course Content Creation/Digital Publishing
The Libraries currently offer a variety of services that support course content creation and publishing. We are also exploring more streamlined and integrated solutions for future course support.

Library Course Pages
We can customize a web page of library resources to support an assignment, course or program. Some faculty also add librarians as instructors in their course website (e.g. Moodle) to support student research. We can also give advice on readings, images, video and other media to enrich your online course website.

Find out more about instructional support services at the University Libraries.

Copyright Program Librarian
Alt-Textbook Project

In the Fall 2014 term, the NCSU Libraries awarded a first round of grants to faculty to adopt, adapt, or create free or low-cost alternatives to expensive textbooks. The first round is in progress and is expected to save NC State students more than $200,000 in the first year.

How to Apply

Complete the Call for Proposals form with information about your course and a brief narrative describing your proposed alternative to a commercial textbook. All current faculty members of NC State University teaching courses in Spring or Fall 2016 are eligible to apply. To learn more contact Will Cross, Director of the NCSU Libraries Copyright & Digital Scholarship Center.

Information Sessions

Information sessions will be held in partnership with the Office of Faculty Development on Monday, October 5th from 10:15-11:30am and in the Libraries at the following times:

Thursday 9/17/15 - Hunt Library
Conference Room 5703
1-2pm

Wednesday 10/7/15 - DH Hill Library
Assembly Room
1-2pm

Open Textbooks and NCSU Libraries

The NCSU Libraries is committed to fostering change in the current textbook publishing environment. The Libraries’ Copyright and Digital Scholarship Center is available to partner with faculty members on licensing resources, using digital repositories, and creating and publishing their own open educational resources. The Alt-Textbook Project will empower faculty to innovate pedagogically, enhance access for NC State students to high-quality, tailored educational materials, and reduce the financial burden of expensive
textbooks.

The Problem with Textbooks

- Runaway textbook costs on college campuses have become a major impediment to student success.
- Textbook costs have outpaced inflation by 300% over the last 30 years.
- Students spend an average of $1,200 per year on textbooks.
- 7 out of 10 students have forgone purchasing college textbooks because of cost, according to a recent PIRG survey on 13 college campuses.

Open Educational Resources: A Solution

Many alternatives to the current textbook publishing landscape have emerged in the last decade, allowing faculty to easily find and use current, high-quality free online Open Educational Resources for their courses. Projects such as Open Textbook Library and OpenStax College provide access to free, peer-reviewed textbooks covering a wide variety of subjects, while other initiatives such as OpenStax CNX and Merlot II provide repositories of peer-reviewed open educational materials that can be remixed and customized by faculty who wish to build their own textbook or course materials.

Projects at NCSU

The 2014-15 Alt-Textbook OERs are out and being used in courses this semester!

Projects from the first round span nine schools and departments, represent innovative strategies for pedagogical change such as Maria Gallardo-Williams’ nationally-recognized S.M.A.R.T. lab videos and Sabrina Robertson and Carlos Goller’s BIT OER project, and have collectively saved NCSU students more than $200,000 in 2015.

Alt-Textbook projects from the first round include:

- Dr. Andrew Cooper’s (Mathematics) MA225: Foundations of Advanced Mathematics
- Dr. Michael Evans’ (Curriculum, Instruction, and Counselor Education) ECI 515: Online Collaborations in Education
- Maria Gallardo-Williams’ (Chemistry) CH226: Organic Chemistry I Lab
- Juliana Kocsis’ (Foreign Languages) FLE 201: Oral Communication in English for International Students
- Janell Moretz’s (Parks, Recreation and Sport Management) PRT 238: Diversity and Inclusion in Parks, Recreation and Sport Management
Jennifer Landin’s (Biology) BIO105: *Biology in the Modern World*

Sabrina Robertson and Carlos Goller’s (Biotechnology) BIT 410/510: *Core Technologies in Molecular Biology*

Adria E. Shipp’s (Education) ECD 561: *Strategies for Clinical Assessment in Counseling*

Alyson Wilson’s (Statistics) ST/CSC 495: *Introduction to Data Science*

Open Content

About

Below you will find the largest, most popular repositories of open educational resources. At the left you will find links to subject-dedicated pages featuring textbooks, supplemental materials, and video lectures. Each resource is introduced by a short paragraph that lists what one can expect to find in that particular resource, its developers and their university affiliations in addition to the usage terms associated with the content. All of the content featured within these pages is free to use, but usage rights vary. Most content found within these pages is released under a Creative Commons license. Some content is in the public domain and fewer still are under full copyright but can be linked to or used free of charge. More information about Creative Commons licensing can be found at the OU Creative Commons LibGuide.

Use

This collection is intended to showcase the potential of open educational resources to curb high textbook prices. It is our hope that its users feel free to adopt these resources or leave constructive comments about the resources found on these pages. Comments from students and faculty alike will be thoughtfully considered and used to guide the future development of this collection. If you need additional content, or are not finding what you need in the provided links, please contact Stacy Zemke (zemke@ou.edu) for additional help with open resources.

General Open Educational Resource Repositories:

OER Commons

OER Commons was developed to serve educators in discovering, creating, and collaborating around the use, evaluation, and improvement of open educational resources. Not only can OER Commons help during the hunt for OERs, but it can also serve as a place to create resources. The OER Commons open author tool allows users to combine text, images, audio, and video files into their own customized resource as well as create brand new resources from scratch. Recommended by OU Libraries for the Business, Education, History, Life Sciences, Psychology, and Sociology subject areas. Read more about our reviews of OER Commons.
TEMPLE UNIVERSITY LIBRARIES
The Alternate Textbook Project at Temple Libraries

Open Educational Resources

This project seeks to evaluate the quality of open educational textbooks by soliciting reviews from Vanderbilt faculty members.

Open Textbooks Initiative at Vanderbilt University

The primary goal of this program is to increase awareness of open textbooks among Vanderbilt University faculty members. Open textbooks are a subcategory of open educational resources, which are resources licensed typically with a Creative Commons license for use without fee by faculty, students, and staff. The open textbook initiative seeks to alleviate the high and growing costs of textbooks to students by producing openly licensed alternatives. In addition, the open textbook initiative encourages faculty to remix textbooks by combining multiple sources, adding original chapters, and altering textbook content to fit particular needs.

Write a Review of an OER Textbook

We invite members of the Vanderbilt faculty to review the growing list of open educational textbooks. Please consult this site for a list of open education textbooks in your field.

To review a textbook, please use this survey instrument. Reviews will be posted to the Open Textbook Library for use by educators and students who visit the site.

Payment of $200 will be made for every review of an open educational textbook satisfactorily completed by members of the Vanderbilt University faculty. Please contact David Weinraub before starting to review textbooks.

Please note: Any review you contribute will be made publicly available and redistributed under a CC-BY license.
Open Textbooks Review Criteria:

1. Comprehensiveness - The text covers all areas and ideas of the subject appropriately and provides an effective index and/or glossary.

2. Content Accuracy - Content is accurate, error-free and unbiased.

3. Relevance/Legacy - Content is up-to-date, but not in a way that will quickly make the text obsolete within a short period of time. The text is written and/or arranged in such a way that necessary updates will be relatively easy and straightforward to implement.

4. Clarity - The text is written in lucid, accessible prose, and provides adequate context for any jargon/technical terminology used.

5. Consistency - The text is internally consistent in terms of terminology and framework.

6. Modularity - The text is designed to be easily and readily divisible into smaller reading sections that can be assigned at different points within the course (i.e., enormous blocks of text without subheadings should be avoided). The text should not be overly self-referential, and should be easily reorganized and realigned with various subunits of a course without presenting much disruption to the reader.

7. Organization/Structure/Flow - The topics in the text are presented in a logical, clear fashion.

8. Interface - The text is free of significant interface issues, including navigation problems, distortion of images/charts, and any other display features that may distract or confuse the reader.

9. Grammatical Errors - The text contains no grammatical errors.

10. Cultural Relevance - The text is not culturally insensitive or offensive in any way. It should make use of examples that are inclusive of a variety of races, ethnicities, and backgrounds.

The review rubric was developed for OpenStax and can be found at http://www.openstaxcollege.org. The definitions of the rubric categories used for OpenStax are available at http://www.ashe.org/open-stax-review-rubric.html, which is a derivative of the review rubric used for College Open Textbooks, available at http://www.collegeopentextbooks.com/.

The rubric was adapted from the American Library Association Choice Review Catalog Policy found at http://www.ala.org/programsstandards/workplacepolicies. This work is licensed under a Creative Commons Attribution 4.0 International License.
Open education week 2016
The University Libraries and campus partners will celebrate Open Education Week March 14-18, 2016, with events and workshops, and a keynote speech on March 17. Visit lib.vt.edu/oer or watch the OpenYT and OpenVA livestreams for event details and announcements.

Open education
Open educational resources (OER) are teaching, learning, and research resources that reside in the public domain or have been released under an intellectual property license that permits their free use and re-purposing by others. They include full courses, course materials, modules, textbooks, streaming videos, tests, software, and any other tools, materials, or techniques used to support access to knowledge. - Hewlett Foundation

OER initiative
The Libraries’ Open Educational Resources (OER) initiative aims to address the following question:

What can we do to improve student learning and faculty teaching materials to make them increasingly:

1. Affordable - ensuring that no student is excluded from access because of financial reasons
2. Accessible - available in multiple formats, compatible with multiple devices, as well as ADA compliant
3. Quality - peer-reviewed, current, verifiable by the intended audience
4. Flexible/Adaptable - supportive of various faculty teaching and student learning pedagogies, across disciplines, and teaching approaches
5. Engaging - encouraging efficacious and active student engagement with learning materials
6. Innovative - adopting, where relevant, and teaching technical literacies

The Open Education movement is built around the idea of Open. These represent the gold standard in openness:

1. Reuse - the right to make, own, and control copies of the content
2. Reissue - the right to use the content in a wide range of ways (e.g., in class, in study groups, or on a website)
3. Reuse - the right to adapt, modify, or alter the content itself (e.g., translate the content into another language)
4. Reissue - the right to revise the original or revised content with other open content to create something new (e.g., mashup)
5. Reuse - the right to share copies of the original content, your revisions, or your modifications with others (e.g., give a copy of the content to a friend)

All original content on this page is licensed under a Creative Commons Attribution 4.0 International License. 3rd-party content including, but not limited to images and linked items, are subject to their own license terms.

Spotlight on TED/TEDx Talks by UCI Faculty
UCI Open – formerly UCI OpenCourseWare – strives to bring UCI Irvine to the world by making course materials, lectures, conferences, and other academic content available for free online. We are now pleased to expand this mission with new collections, such as the TED/TEDx talks given by UCI faculty members and researchers in one convenient location on our website.

Why It’s Important: Receiving an invitation to give a TED talk is reserved for read more

Other Free and Public Resources at UCI

UCI offers nearly 50 massive open, online courses at Coursera in a variety of formats: on-demand (anytime) or cohort-based. UCI was an early adopter of MOOCs and a number of these offerings are based on open educational resources also available on this site.

ZotTalks

In the first of a series of ZotTalks, we feature a short video by Prof. Charis Kubrin and Ph.D. candidate Adam Danbar’s discussion of the use of rap lyrics as evidence in criminal trials. ZotTalks are educational talks focused on securing crowd-funding for low-cost, high impact research and publication projects. Future subjects will display the breadth of research and curricular interests at UCI.

Textbook Affordability at UMD

Open Educational Resources

Overview of Issues

The University of Maryland estimates students spend an average of $1,130 on books and supplies per year. Textbook prices have risen a whopping 18% since 1998, and these increasing prices have affected our students’ ability to learn. Forty-eight percent of students reported that textbook prices affected which/how many classes they took, and 65% of students said they’ve skipped a book. Of those students, 84% said they were concerned it would hurt their grades. The Student Government Association is working to ease the burden on students with textbook affordability initiatives.

Selecting Textbooks/Costs

Selecting textbooks and other resources for classes is a key responsibility of faculty, and picking the ones that match the instructor’s goals and help students learn is a challenging task. But price is rarely considered in this decision making process. The goal of this site is to help students and faculty alike understand the importance of and process for considering price as one factor in selecting textbooks. Reducing price, sometimes all the way to $0, can improve quality, equity and student learning, as supported by the research of Robinson, Fischer; Wiley, and Hilton (2014). So read on, and learn how to make this happen!

MOST Initiative

During the fall semester of 2013, the University System of Maryland Student Council (USMSC) piloted a program, the Maryland Open Source Textbook Initiative (MOST), to allow interested faculty members in high-enrollment, entry-level classes to use open-source textbooks. The program, published under a publicly-accessible copyright license, allows professors to customize textbook material from a pool of online resources, videos and graphics. Professors who taught large introductory courses at this university and other university system institutions learned about the features of open-source textbooks in group workshops. In the spring of 2014, the council analyzed the effectiveness of the program by examining student satisfaction, academic achievement and faculty willingness to use the resources. MOST was established to address the root of the textbook affordability problems, and explore affordable options. Members of the University System of Maryland and the USMSC are still evaluating the program, and exploring how to improve it for the upcoming years.

Last update: Feb 27, 2015

Open Educational Resources

Introduction
Open Educational Resources (OER) are courses and learning materials at all educational levels that are freely available online for use by educators and learners worldwide. These resources offer access for those not affiliated with formal educational programs plus opportunities for sharing and collaboration among educators. The sites on this page focus on OER materials and issues in higher education.

A slideshow presentation by Sunnie Küm, Michigan State University, introducing the key elements of OER can be found at http://www.slideshare.net/MSUglobal/Intro-to-oer. Another useful overview is available at https://wiki.creativemom.com/wiki/OER.

The special issue described under Journals below of The International Review of Research in Open and Distance Learning provides an overview of current issues surrounding OER.

How To
OER Handbook (WikiEducator).
Provides a guide to those just getting started in creating open educational resources: tutorials, examples, resources, a toolkit, and much more.

Back to top

Examples of Open Educational Resources

MIT OpenCourseWare, "OCW" (Massachusetts Institute of Technology).
In April 2001, MIT announced its decision to put the materials used in its campus courses openly online: syllabi, assignments, assessments, and other materials designed by the instructor. At present, several hundred courses from all of MIT's departments are online and in use by educators and learners around the world. MIT's visionary initiative was presented a model for other universities and educational institutions.
http://ocw.mit.edu/index.htm

OpenCourseWare at John Hopkins Bloomberg School of Public Health.
Courses and materials in all areas of public health are presented here, organized by topic. Links to the OCW Image Library containing hundreds of images from OCW courses.
http://ocw.jhsph.edu

Open.Michigan at the University of Michigan.
Offers educational modules, courses, and course materials in a variety of disciplines at the University of Michigan. Also provides opportunities for UM faculty to share their own content and connect with others in related areas.

MERLOT: Multimedia Educational Resources for Learning and Online Teaching.
(A California State University Program) A large site in place since 1997 offering peer reviewed online teaching and learning materials and discipline communities across the higher education curriculum.
https://www.merlot.org/merlot/index.htm

OpenLearn.
A collaborative digital library of open course resources from the Open University's Distance Learning Network, providing free resources for teaching and learning.
http://www.openlearn.org/index.html
The challenge? Linking affordability, access and excellence in teaching and learning at Ohio State.

Projects funded through the Affordable Learning Exchange will meet this challenge by replacing textbooks and other course materials with alternative, homegrown resources; by sharing publications made available through University Libraries; and by adopting and adapting existing Open Educational Resources (OER) from around the world. Learn more about OER from Creative Commons.

President Drake identified access, affordability and excellence as key elements of his 2020 Vision.

*Education transforms lives, but only if we can deliver on our promise of access to an excellent and affordable education.*

OER Collections

Open Education Resources (OERs) are teaching, learning, and research resources that reside in the public domain or have been released under an intellectual property license that permits their free use or re-purposing by others. We have many digital collections that are developed here at the University of Toronto.

Be sure to have a look at our Curriculum page as well for our Ontario Online learning modules

- Agnes Chamberlin Digital Collection
- The Amaranth: Bulletin of Greek Studies Historical Collection
- Anatomia 1522-1687: Anatomical Plates from the Thomas Fisher Rare Book Library
- The Barren Lands: J.B. Tyrrell’s Expeditions for the Geological Survey of Canada, 1892-1894

Courageous New Learning Models and Materials

Affordable Learning Georgia Preconference Symposium and Reception for the USG Teaching and Learning Conference
Tuesday, April 12, 1-5 and 5-9
University of Georgia Center for Continuing Education

Description: We Can Be Textbook Heroes: Courageous New Learning Models and Materials is a free half-day symposium on the day before the USG Teaching and Learning Conference, intended to inspire faculty, librarians, instructional designers, administrators, and teaching and learning staff through a showcase of workshops, bold projects, and success stories featuring Open Educational Resources (OER). Topics include success stories and new research plans from USG faculty, managing open copyright for faculty, campus OER transformation, and using OER in new learning models such as competency-based education (CBE).

An evening reception will feature a special presentation on competency-based education and OER by Mark Jenkins, Director of eLearning and Open Education for the Washington State Board for Community and Technical Colleges.

Agenda: Click here to view agenda.

Price: There is no cost to register and attend; however, cancellations of less than 48 hours and no-shows may result in a $35.00 charge to the registrant.

Location: University of Georgia Center for Continuing Education, Room K

KU Libraries sponsors Open Textbook Workshop for Faculty
https://openaccess.ku.edu/open-textbook-faculty-workshop

KU Libraries sponsors Open Textbook Workshop for Faculty

Wednesday, February 24, 2016

Sarah Cohen and David Ernst of the University of Minnesota’s Open Textbook Network (OTN) will be at KU Libraries to lead a workshop for faculty regarding open textbooks and open educational resources on Friday, April 29, from 1:30-3:30 p.m., room 450 in Watson Library.

In this two-hour session, faculty will learn the pedagogical benefits of open textbooks and discover open textbooks in their field. Faculty who attend and write a short review of an open textbook will receive a stipend of up to $500 (final amount distributed based on the number of faculty who complete reviews). These reviews will benefit other faculty considering open textbooks.

Faculty may apply for a slot at the workshop by Friday, April 15, at 5 p.m. Space is limited.

The Open Textbook Network (OTN) is a consortium of higher education institutions committed to improving access, affordability, and academic success by helping faculty overcome barriers to open textbook adoption; increasing institutional capacity to support adoption and use of open textbooks, and collaboratively developing new understandings of open textbook adoption and use. KU Libraries joined the OTN in Summer 2015.

David Ernst (dpetist) is director of the Center for Open Education and executive director of OTN. He created and manages the Open Textbook Library, a single source for faculty to find quality openly licensed textbooks.

Sarah Cohen (@theshehook) is a managing director of OTN. Formerly the associate university librarian at Cal Poly, San Luis Obispo, Cohen joined OTN to foster libraries’ strategic role in advancing access, discovery and engagement with open textbooks.

Please see KU Libraries’ OER guide for more information and resources. Additional information that provides some background reading about OER and Open Textbooks:

Sanocki, Ethan. Feb 2015. Open Textbooks: The Billion-Dollar Solution. The Student PIRGs: http://www.studentpirgs.org/reports/open-textbooks-billion-dollar-solution - This report reviews five university programs promoting the use of OER to replace traditional textbooks.

MU Libraries OER Week Events
March 7-11, 2016

OpenStax Presentation
Nicole Finkbeiner, OpenStax, Institutional Relations
Monday, March 7 @ 4pm
Ellis Library room 114-A

Students have requested that MU faculty utilize Open Educational Resources (see Resolution-1415-08). Come learn more about how OpenStax Textbooks can be used in your classroom at no cost to your students. OpenStax representative Nicole Finkbeiner will be able to answer all of your questions about how to adopt open source, peer-reviewed, high-quality textbooks.

OER Workshop
Grace Atkins, User Engagement Librarian, MU Libraries
Friday, March 11 @ 1pm
Ellis Library room 213 & live online

Are your students struggling with high textbook costs? Consider using free and openly licensed educational materials. Open Educational Resources are an accessible and equitable alternative to traditional instructional materials. Learn more about where and how you can find high-quality OERs to use in your courses. Part of our semester long "Fridays @ the Library" workshop series. Register online.

http://libraryguides.missouri.edu/ld.php?content_id=19734686
The agenda for Penn State’s first Open Educational Resources (OER) Summit, held at Foster Auditorium and online via MediaSite Live on March 23, includes opening remarks at 8:45 a.m. by Dean Barbara I. Dewey, dean of University Libraries and Scholarly Communications.

Additional information about the event, including a registration link for all participants, regardless of location, is available at http://tinyurl.com/OERsummit16.
Are you concerned about the impact of rising textbook costs on your students?

This workshop is designed to help USC faculty and graduate students discover and evaluate free and low cost materials for use in their instruction.

January 29, 1 - 2 PM,
March 10, 11 - 12 PM,
April 25, 2 - 3 PM,
TCL 4th, Classroom 412
“Free Textbooks and Resources, Access on Day One for You and Your Students,” webinar with Nicole Finkbeiner, Associate Director, Institutional Relations at OpenStax College, Rice University.

The University of South Carolina is partnering with Rice University’s free textbook initiative, OpenStax College, for a webinar on their free textbooks. Come see why USC faculty, as well as thousands of other faculty across the county are using the books. This session will cover how using free textbooks contribute to student success, the positive impact of Open Educational Resources on academic freedom, the OpenStax College development model, how you and your students access and use the free books, and more. They have free textbooks available in Physics, Sociology, Biology, Anatomy & Physiology, Statistics, Math, Economics, Chemistry, US History, and Psychology. They are developing additional books in Math, Sciences, and Government.

Presentations, Discussions, Guest Speakers, Exhibitions, and more — A Temple Libraries’ Blog

Open Education Week 2016: Access and Affordability in Learning

Posted on March 7, 2016 by rdashiell

The week of March 7th is Open Education Week, a global event coordinated by the Open Education Consortium to raise awareness around free and open sharing in education. This movement advocates for free and open access for learners and teachers to a variety of resources, including platforms, course and learning materials, and textbooks.

Temple University Libraries is joining the conversation around textbook access and affordability by hosting an Open Education Week event titled “Ditch the Textbook: Exploring Options for Textbook Affordability” on Wednesday, March 9 from 12:00 – 1:30 PM in the Paley Library Lecture Hall. The panel will feature students and faculty advocates (listed below) for open educational resources and will be moderated by Annie Johnson, Library Publishing and Scholarly Communications Specialist at Temple Libraries. The event will also provide information about Temple Libraries’ Alternate Textbook Project, which will soon be open to proposals.

Panelists for the Libraries’ March 9th event include:

Eitan Laurence is a Temple University student who is an advocate for Open Educational Resources (OER). He is currently a member of the Provost’s Task Force on Textbook Affordability.

Gerard Brown, Associate Professor, Tyler School of Art, is the Chair of the school’s Foundations Department. His senior Visual Studies seminar students are currently engaged in a project looking at the way textbooks affect learning.
Wesley Roehl is a Professor in the School of Tourism and Hospitality Management. He is a recent participant in Temple Libraries’ Alternate Textbook Project.

Kristine Weatherston is an Assistant Professor in the Department of Media Studies and Production. She is a two-time recipient of the Alternate Textbook Project award. Kristine utilizes web-based and open source textbooks, software, and videos in her scriptwriting, documentary production, and media courses.

We invite you to join us! Please contact Annie Johnson (annie.johnson@temple.edu) with questions.

Library Workshop
Exploring Innovative & Open Educational Resources: 
Three Current Projects

Join several Virginia Tech and Radford University faculty members as they discuss their current work of developing innovative or open educational resources for use in their teaching. Panel themes will be further explored in the after-panel hands-on workshop. Events begin with a pre-panel multimedia tour of innovative and open educational resources from Virginia Tech, Radford, and beyond.

9:30 am - 10:00 am  Refreshments and Multimedia tour
10:00 am - 11:00 am  Panel Discussion
11:00 am - 12:00 pm  Hands on Collaboration

Panelists:

Dr. Clifford A. Shaffer  Professor of Computer Science  Virginia Tech
Dr. Benjamin Jantzen  Assistant Professor of Philosophy  Virginia Tech
Dr. Bruce Mahin  Professor of Composition and Music Theory  Radford University

Friday, March 28  9:30 am - 12 noon  1st Floor Multipurpose Room
RSVP: Anita Walz arwalz@vt.edu by March 25th
Open Education Week 2016 at Virginia Tech is March 14-19. All events are free and open to the public (Public R3/VIP) and will be held at the Newman Library on Virginia Tech’s Blacksburg campus. Visitors may obtain parking passes and campus maps at the Virginia Tech Visitor Center (325 Price Fork Road, Blacksburg, VA).

Selected sessions may be available live via WebEx. Please contact Anita Waltz to request streaming details.

Keynote Presentation
Robert Beavers-Dorer - NOBA Senior Editor
Date & Time: Thursday, March 17, 12:30 – 1:45 p.m.
Location: Newman Library Multipurpose Room

Robert Beavers-Dorer, Ph.D. presents on the NOBA Project, which brings together 90+ expert-authored and openly licensed learning modules in the field of Psychology.

Join us in hearing about this faculty-initiated project, the underlying motivations, lessons learned, considerations for adoption, and research on NOBA materials. This session will be of interest to faculty, students and staff interested in innovative resources for education, those exploring alternative textbook and open educational resources.

Light refreshments to follow.

Open Education Week Schedule of Events

Tuesday 3/15

Location: Newman Library 207A

11:00 – 11:10 a.m.
Introduction to Open Education Week

11:10 – 12:15 p.m.
Research Presentation: Are textbooks too expensive for students? A first look at a survey of Virginia Tech students in national context.

Description: National surveys suggest that rising textbook costs have a negative impact on student learning. How are VT students responding to rising costs in their course selections, perception of academic performance, number of hours worked for pay, and methods of acquiring learning resources? How closely do textbook cost-related impacts at Virginia Tech match available national data?

This presentation gives a first look at a recent survey of 300+ Virginia Tech students (RIB 15-138) in national context, their reported methods of acquiring required learning resources, use of unassigned resources, and levels of concern regarding academic performance. The presenter, Anita Waltz will also discuss assumptions of the Open Education movement (the movement for open textbooks and Open Educational Resources) as part of the presentation.

VIRGINIA TECH LIBRARIES
Open Education Week 2016
http://www.lib.vt.edu/oer/oe-week/2016-oeweek.html

Thursday 3/17 9:30am-4pm

Location: Newman Library (1st floor) Multipurpose Room

9:30 a.m.
Opening Reception (light refreshments)

What we mean (and don't mean) when we say "Open Education"

Description: This session will introduce the concepts of open education and open educational resources within the overall context of openness. The term Open Education broadly means resources and practices which reduce barriers to learning.

Two of the most popular applications include: teaching openly or open pedagogy – the idea of letting the public into your classroom – and the use/adaptation/creation of open educational resources which allow for greater academic freedom and pedagogical flexibility.

By the end of this interactive session participants should be able to articulate explain several ways one can engage in open education, list benefits and potential drawbacks to open educational activities, and explain whether or not they might engage in open educational activities in the future.

Live Streaming: https://virginiatech.webex.com/meetliveatvt

LNI registration for faculty, staff, and students: VT LNI
General registration: http://goo.gl/forms/1CZ3DjKB5Z

11:00 - 11:30 a.m.
Open Education practitioners "Speed Networking"

11:30 - 12:30 p.m.
Lunch on your own (a list of walking-distance lunch options will be provided)

12:30 - 1:45 p.m.
Keynote Presentation: Expert authored, free, and reproducible educational resources: Meet the inventors of NOBA

Speaker: Dr. Robert Biswas-Diener is senior editor of NOBA, an open education resource providing free materials to students and instructors of psychology. Each year, NOBA saves students more than 1 million dollars in textbook fees. When not working on NOBA, Robert researches positive psychological topics and has more than 50 academic publications. He is author of The Courage Quotient and The Upside of Your Dark Side. He lives in Portland, Oregon.

Live Streaming: https://virginiatech.webex.com/meetliveatvt

LNI registration for faculty, staff, and students: VT LNI
General public registration: http://goo.gl/forms/1CZ3DjKB5Z

2:15 - 3:15 p.m.
Project Showcases

Description: 10-minute lightning round presentations on various Open Education projects

Live Streaming: https://virginiatech.webex.com/meetliveatvt

3:15 - 4:00 p.m.
Discussion & Wrap Up

Thursday 3/17 9:30 am - 3:00 pm

Location: Newman Library 2nd floor

SGA Open Education Awareness Campaign

Description: Join the Student Government Association to learn more about Open Educational Resources, how you can cut your textbook costs in half, and how you can make a difference. Food and prizes available!
Incentive Programs
Opportunity: Peer Reviews
Alberta faculty may be awarded $500.00 to review an OER that replaces an existing student paid resource.

Processed monthly until September 30, 2016

This opportunity has been re-opened with an expanded scope. Applications are no longer limited to the top 50 enrolled courses.
About EOEI

Moving into the second cohort, the Emory Open Education Initiative (EOEI) encourages faculty and instructors to create and use open educational resources (OERs) and library materials to support student learning in their courses by offering mini-grants of $1,000 each. The grants may be used to create or compile open educational resources (OERs), library materials, or faculty-generated content to be used in courses taught in lieu of a textbook. Grant recipients are required to participate in an OER Immersion Training. The goal is to find better and less costly ways for faculty to deliver the instructional content their students need to learn and to support assessment of whether learning objectives were met with the use of this content.

The mini-grants are open to all full-time faculty (both tenure and lecture track) and are available for both individual faculty members and faculty working as teams. Only one application per faculty member or team will be considered for each application period.

The mini-grants include support from multiple areas of LITS, including the Scholarly Communications Office, Emory Center for Digital Scholarship, and the Libraries. Support includes assistance from librarians, educational technologists and digital learning specialists to identify, remix and create open educational resources, utilize library materials, and to generate an OER evaluation rubric. In addition, assessment methods are the cornerstone of the initiative including the ability for students to be producers of OER content or other applications to support learning.

Six mini-grants have been awarded for fall 2014 classes and five for the 2015-2016 academic years. Please visit the above pages to review the see 2014 Immersion Training and 2015 Immersion training agendas as well as the faculty who are participating.
**About**

**Textbook Transformation Grants**

**Overview**

The State of Georgia’s FY 2015 and FY 2016 budgets include funding to support a new USG initiative, Affordable Learning Georgia (ALG), which focuses on reducing the costs of textbooks and the enhancement of GALILEO, Georgia’s Virtual Library and ALG’s parent initiative. A key strategy is to provide grant-supported opportunities for USG faculty, libraries, and institutions to transform their use of textbooks and other learning materials into lower cost options. The Affordable Learning Georgia Textbook Transformation Grants are intended to:

1. Pilot different approaches in USG courses for textbook transformation including adoption, adaptation, and creation of Open Educational Resources (OER) and/or identification and adoption of materials already available in GALILEO and USG libraries.
2. Provide support to faculty, libraries, and their institutions to implement these approaches.
3. Lower the cost of college for students and contribute to their retention, progression, and graduation.

Open Education Initiative

The high cost of commercial print textbooks is a major concern for both students and their parents. To address these concerns, the Provost's Office and the University Libraries launched the Open Education Initiative in the Spring of 2011. The Open Education Initiative is a faculty incentive program that encourages the use of existing low-cost or free information resources to support our students’ learning. Information Literacy will also be emphasized, creating opportunities for students to develop and practice the skills of critical thinking, reasoning, communication, and integration of knowledge and perspectives.

Now in its seventh cycle, the Open Education Initiative has generated a total savings of over $1.3 million for students in classes that utilize open educational resources and library materials. The Library partners with the Institute for Teaching Excellence and Faculty Development (ITEFD), Information Technology, and Provost’s Office to support our efforts. For more information please contact Jeremy Smith at jsmith at library.umass.edu.

Read the ARL Report on our program.

Presentations

Open Education Initiative Information Session, Spring 2016 [pdf]
Open Education Initiative Information Session, Spring 2016 [ppt]

Presentation for the Information session for the OEI grant applicants in the Spring of 2016. Includes an overview of OEI, copyright and Creative Commons, and the OEI grant parameters. Useful for those running a workshop or for people teaching with open education resources.

Presentation to UMass Faculty Senate, Spring 2014

This is a presentation made to the Faculty Senate Meeting at the University of Massachusetts Amherst regarding the Open Education Initiative. It includes an overview of the why and how of the OEI grant, some examples, and its successes/challenges. Useful for those talking to administrators about the open education movement.

Spring 2016 Open Education Initiative

</tbody>
</table>
Textbook and course materials costs are increasingly problematic for students. Nationally, the average undergraduate student spends over $1,200 a year on textbooks and other course materials. The University Libraries can help faculty and instructors find and use alternative, high-quality, low-cost materials in their courses, and ultimately help save students money.

The University of Minnesota Libraries invites faculty and instructors to apply for a competitive grant to work with library staff to implement affordable high quality content options into their courses as an alternative to high cost commercial textbooks and other expensive course materials.

How to Apply

All current faculty and instructors teaching courses at the University of Minnesota - Twin Cities are eligible to apply for a Partnership for Affordable Content grant. Please see the Call for Proposals for application instructions. Applications for the 2016 call for proposals are due by February 26, 2016.

Information Sessions

Interested faculty and instructors are highly encouraged to attend an upcoming information session to learn more about the Partnership for Affordable Content:

February 10, 2016, 10:00 – 11:00 AM, Walter Library Room 310 Register
February 11, 2016, 1:30-2:30 PM, Walter Library Room 310 Register
February 11, 2016, 3:30-4:30 PM, Magrath Library Room 2 Register

What are more affordable options?

Working with librarians, participating faculty and instructors will select and implement new high quality and cost effective content for their courses. These new materials can include:

- Freely available open textbooks
- Library licensed resources such as ejournals and ebooks
- Lawful determinations of fair use
- Open education resources
- Faculty created, openly licensed materials

Librarians will also help participating faculty and instructors deliver these new materials to students through various online tools such as library developed services and Moodle.

Application Selection Criteria

Proposals will be reviewed within the Libraries by eLearning Support initiative Librarians, subject liaison Librarians, and Libraries Administration. Grants will be awarded based on criteria such as potential student savings, innovativeness of course materials, the use of open textbooks or open education resources, and sustainability of the new course materials in subsequent semesters.

For more information, including application instructions and a complete list of selection criteria, please see the Call for Proposals.
Representative Documents: Incentive Programs

UNIVERSITY OF MINNESOTA
Partnership Showcase
https://www.lib.umn.edu/elearning/partnership/showcase

These faculty and instructors were awarded a 2015 Partnership for Affordable Content grant to move away from traditional textbooks to using low-cost and no-cost resources in their courses. Read on to find out more about their projects and learn how they successfully lowered the cost of education for their students during the Fall 2015 or Spring 2016 semester.

Irene Duranczyk
Department: CEHD: PSTL
Course: PSTL 1004 Statistics: Understanding and Applying Data
Project: Modified and enhanced an already existing open textbook, Collaborative Statistics: Using Spreadsheets
Total Savings: $6,120 (36 students x $170 textbook)

Joe Gaugler
Department: School of Nursing: Adult and Gerontological Health
Course: NURS 1910W: Illness in the U.S. - From Cell to Society
Project: Created a Digital Course Pack using library licensed materials, freely available course readings, and fair use claims at $0 cost to students.
Total Savings: $1,556 (19 students x $82 textbook)

Kathleen Hansen and Nora Paul
Department: CLA: Journalism and Mass Communication
Course: JOUR 3004: Introduction to Mass Communication
Project: Created a freely available, open textbook called Information Strategies for Communicators.
Total Savings: $6,160 (112 students x $55 textbook)
Nathaniel Helwig
Department: CLA: Department of Psychology and School of Statistics
Course: STAT 5601: Nonparametric Methods
Project: The Libraries purchased the course textbook as a multi-user ebook and created a Digital Course Pack using library licensed materials, freely available course readings at $0 cost to students.
Total Savings: $14,732 (58 students x $254 for 2 textbooks)

Sungok Hong
Department: CLA: Asian Languages and Literature
Course: HNLR 1005: Conversational Hindi-Urdu
Project: Faculty created course content plus use of freely available video content. Google Site was used to make all materials available to students.
Total Savings: $300 (10 students x $30 comparable language textbook - no text available)

Yuhei Inoue
Department: CEHD: School of Kinesiology
Course: SMGT 3601 - Ethics and Values in Sport
Project: Created a Digital Course Pack using library licensed materials, freely available course readings, and fair use claims at $0 cost to students.
Total Savings: $840 (24 students X $35 textbook)

Romas Kaslauskas
Department: CFANS: Biochemistry, Molecular Biology, and Biophysics
Course: BioC 4351/6351 Protein Engineering
Project: Created 30 openly licensed, interactive chemical figures using the CDF format from Wolfram.
Total Savings: Not available.
Alt-Textbook Initiative

A student cost-savings initiative from the University Libraries

Beginning fall semester 2015, University Libraries is launching a pilot program to encourage instructors to move away from costly textbooks.

The Libraries, investing up to $5,000 in incentives for instructors to redesign courses and reconstruct syllabi, will provide assistance from librarians, instructional designers, and academic technologists in identifying and integrating alternative content, which includes licensed library content and open educational resources. The financial incentives are meant to acknowledge the amount of time it will take instructors to identify new resources, adjust syllabi, and modify assignments. In an effort to maximize the Libraries’ investment and provide savings to the largest number of students, instructors working on courses affecting 100 or more students will receive $1,000, while instructors of classes of less than 100 students will receive $500.

Eligibility

Each applicant must be the instructor of record. Courses can be at the undergraduate or graduate level but must be for enrolled students.

Procedure

Applicants are asked to complete a one-page application form and attend a one-hour workshop at which Library staff members introduce search strategies and possible sources for open-access or low-cost instructional resources, and applicants can share ideas with one another and brainstorm.

The application process is currently closed. If you are interested in support for an alt-textbook project of your own, please contact Janet Hulm or Kelly Broughton.

Timeline

- October 22, 2015: Application process opens
- January 15, 2016: Application process closes
- February 2016: Alt-Textbook materials workshop
- March 18, 2016: Awards announced
- Fall Semester 2016: Projects implemented
Grants

ALX partners have developed several opportunities to fund faculty in exploring open and affordable classroom resources. Join us to reimagine teaching and learning materials like textbooks, lab manuals, assigned readings and more.

Funding opportunities are designed to fit the needs of varying course levels, class sizes and support needs. Proposals that include cross-departmental and cross-campus collaborations are especially encouraged to apply.

The next RFP opens in September. In the meantime, learn about our opportunities below, and get to know our current ALX cohort which includes projects from 9 departments, 3 colleges, and 3 campuses across the university.

UNIVERSITY LIBRARIES TEXTBOOK AFFORDABILITY GRANT

Award amount: $1,000 available as research funds

University Libraries, the Office of Distance Education and eLearning (ODEE), and Undergraduate Student Government (USG) have partnered to sponsor this opportunity for faculty to explore the adoption of low- or no-cost course materials for classes at Ohio State. Winners of the Textbook Affordability Grant receive consultation support from ODEE and University Libraries to create, find, and distribute materials.
Ideally projects funded through the Textbook Affordability grant will need limited hands-on support and be close to implementation (work may have already begun). Individuals and teams are encouraged to apply. Successful proposals will include:

- Adoption and/or adaptation of existing OERs
- Authoring of new digital course materials to openly license and share with students at Ohio State and beyond
- Replacing a conventional textbook with library resources (textbooks on reserve, journals, other with help from subject librarian and other experts)
- A combination of these approaches

ODEE AFFORDABLE LEARNING GRANTS

**Award amount:** Varies (see details below)

The Open Impact and Exploration grants are managed by the Office of Distance Education and eLearning, and are designed to support transformational projects that result in high impact, sustainable cost savings to students. Proposals that include multiple faculty partners and teams are encouraged. Successful proposals will include:

- Adoption and/or adaptation of existing OERs
- Authoring of new digital course materials to openly license and share with students at Ohio State and beyond
- University Libraries resources, in consultation with a subject librarian
- A combination of these approaches

**Exploration Grant**

**Award amount:** $7,500 (total), comprised of a $5,000 award from ODEE matched 2:1 ($2,500) by the grant recipient’s department.

*Exploration Grant* winners teach courses of any size. Grant winners benefit from a dedicated project manager and technical support throughout.

**Open Impact Grant**

**Award amount:** $12,000 (per project lead, up to 2), comprised of an $8,000 award from ODEE matched 2:1 ($4,000) by the grant recipient’s department.

*Open Impact Grant* winners teach high enrollment, GE courses that impact 300+ students per semester. Grant winners benefit from a dedicated project manager and technical support throughout.

ODEE BOOK LAUNCH PROGRAM

**Award amount:** $1,000 available as research funds
Book Launch is a program led by ODEE, designed to create a community of digital book authors at Ohio State using a cohort model. This program is committed to creating digital textbook resources using the iBooks Author app that can be made available to students at Ohio State at no cost, and to educational institutions across the country.

Two cohorts take place each calendar year, with up to 5 projects accepted into each. Each 5-month cohort cycle is timed to publish finished projects immediately prior to the start of a semester. Summer cohort participants begin in July and produce texts for use in the following Spring semester. Winter participants begin in January and create books ready for use the following Autumn semester.

Individuals and teams are encouraged to apply (we highly recommend teams of 2+). Successful proposals will include:

- Creation of original content and development using iBooks Author
- Use of media or interactive elements
- An emphasis on visual design

Book Launch participants also receive iBooks Author training, a dedicated project manager and technical support throughout.

Affordable Learning Exchange grants are supported financially through the Wide Open West (WOW!) Affinity Program.
The cost of higher education for students increased 42% from 2000 to 2010, and the average cost of materials is now at $1,200 per year.

A reported 78% of students have indicated that they have not purchased a required textbook because of the cost.

The University of Oklahoma Libraries is now taking applications for the Alternative Textbook Initiative. All University of Oklahoma full-time faculty are eligible to apply for one of ten project awards of up to $2,500 in funding and support.

The purpose of this initiative is to support faculty in the adoption of affordable textbook solutions to reduce the cost of textbooks and materials for students. Alternative Textbooks give faculty members the power to customize content specifically for their courses as well as provide less expensive textbooks for their students.

If you are interested in adopting an alternative textbook, or are just in learning more about open textbooks and other open educational resources, contact Stacy Zemke in the University Libraries – szemke@ou.edu.
Faculty Engagement Awards

The TLT Faculty Engagement Awards program offers grants and staff support to enable exploration of innovative applications of technology to improve teaching and learning. Calls for 2016 have closed. In the winter of 2017 we will announce our thematic area for the next round of Engagement Awards.

Apply Now!

Faculty Engagement Awards

Each year, several grants will be awarded around a specific theme, and faculty are encouraged to apply for these grants, which can cover technology, professional development or other resources that support the engagement. Each grant includes a multi-semester engagement with an instructional designer and technology support staff who will work with you to identify the most appropriate and effective applications of a particular technology in your class(es). TLT researchers will assess the impact of this technology and share what we have learned with the Penn State community.

Request for Proposals

Current Theme: Open Educational Resources (OER)

Access and affordability. Two themes from President Barron that directly deal with making a Penn State degree more attainable for many students. Some students are spending upwards of $1,200 a year on textbook! One avenue to help lower this number is through the creation and utilization of Open Educational Resources. We are eager to work with faculty on creating and/or utilizing OER materials as part of redesigning a class. Have an idea for open textbook that you want to write? Interested in replacing your current textbook with a series of open and free readings? We want to work with you to help make this happen!

Relevant Examples: OpenStax, Center for Open Education, BBookX, MERLOT

Proposal Deadline: Monday, April 11th

See also: TLT Faculty Fellows
A Library Initiative to Provide Access to Affordable Educational Resources

Background:

A significant factor in college affordability is the price of textbooks and supplies. According to a national survey conducted by SPARC, 95% of students worry that forgoing a textbook will impact their grade, 65% of students report not buying a textbook due to costs, and 48% report that the costs of textbooks determines the amount of classes they will take.

Open Educational Resources present a unique solution to the problems surrounding high textbook costs. Open Educational Resources are teaching and learning materials that have been published online under an open license granting everyone permission to freely and legally access, download and redistribute files, produce hard copies of the material, tailor the material, mix multiple OERs to create new works and keep and use copies of the material forever. Students and faculty would have an affordable option to support their learning and research.

According to case studies and research conducted by both the University of Minnesota and Rice University, faculty who have reviewed open educational resources have a 90% adoption rate of the materials. Faculty choosing to adopt these materials can save the students they teach hundreds of dollars.

Program

The University Libraries will budget $2000 to fund four $500 grants for faculty to commit to using an OER or library-licensed resource in place of a traditional textbook. This grant would be given to professors based on the following criteria:

• The professor must attend a library workshop on OER
• The professor must submit a syllabus showing their usage of an OER or library-licensed resource for a future course
• The professor must complete two follow up surveys within the year after the award is granted

Long Term Goals

We hope this program increases faculty awareness of open educational resources and leads to the increase of adoptions of these resources at our university to save our student body money, promote student success, and increase faculty openness of research, learning, and teaching resources.
EI SMALL GRANT PROGRAM

The deadline to submit proposals for the 2015-16 academic year has passed. Thank you to all those who applied and congratulations to all of the award recipients.

The EI Small Grant Program supports faculty and instructional staff in their efforts to experiment with new technologies and new ways of learning. This year, the program offered grants of up to $10,000 each and focused on enhancing active learning strategies and developing Open Educational Resources (OERs). With the support of the International Division, the program also sought proposals that would enhance global learning and students' global competencies.

Proposal Themes
(proposals must address at least one)

1. Active learning through blended course implementation
2. Internationalization at Home
3. Open Educational Resources (OERs)

General Proposal Requirements
All proposals should:
• Address how the project will transform student learning
• Align with departmental priorities and include a signature of endorsement from the department chair
• Clearly articulate how the project will be sustained once the funds have been expended

3. OER – Proposal Requirements & Form

Grants in this category will support faculty and instructional staff in their efforts to experiment, develop and/or incorporate Open Educational Resources (OERs) into their courses and degree programs.

OERs are “teaching, learning, and research resources that reside in the public domain or have been released under an intellectual property license that permits their free use and re-purposing by others.” (William and Flora Hewlett Foundation). These resources can include anything from images, videos and infographics to video and audio lectures, interactive games and simulations and open texts (e-books).

OERs are developed and/or utilized to enhance student learning outcomes, and reduce the cost of course-related materials for students (e.g., via ‘open texts’). At UW-Madison, OERs also have significant potential to help campus further embody and enact the Wisconsin idea through the sharing of our teaching resources across the state, the nation and the world.

Proposals in this category should specifically address at least one of the following:

- Developing OERs for courses and programs
- Designing renewable assignments (e.g., an online atlas; an integrated research project and related website; an open text on a key topic; a linked series of podcasts on a relevant theme) for and with students, such that the assignments generate OERs that can then be enhanced year after year by future students
- Identifying, vetting and storing pre-existing OERs for courses and programs

Questions should be directed to Mo Bischof, Associate Vice Provost, or Kris Olids, EL Senior Fellow and Professor, Department of Geography.
Adopted/Adapted/Created Resources
Open Chemistry

OpenChem is first and foremost to extend the benefit that we have seen since 2009 from open and free publication of individual chemistry courses to an entire curriculum. What MIT did ten years ago with its OpenCourseWare initiative was to plant the idea of making quality educational resources universally accessible. The MOOCs have lavishly extended this approach by providing instructional paths through individual courses at scale. What UCI hopes to do with this initiative is to present a coherent, full curriculum by a top faculty. Today, a learner can sit with us in our lecture halls and follow four years’ worth of chemistry core classes and electives. That is the key innovation: making a full undergraduate education’s worth of classes available for immediate incorporation in part or in full by institutions of higher education or by individual professors.

Preparation Courses

- Chem 1P: Preparation for Chemistry

Year One:

- Chem 1A: General Chemistry
- Chem 1B: General Chemistry
- Chem 1C: General Chemistry

Year Two:

- Chem 5: Scientific Computing Skills
- Chem 51A: Organic Chemistry
- Chem 51B: Organic Chemistry
- Chem 51C: Organic Chemistry

Years 3 and 4

- Chem 107: Inorganic Chemistry
- Chem 121: Advanced Organic Chemistry
- Chem 121b: Introduction to Chemical Biology
- Chem 131A: Quantum Principles
- Chem 131B: Molecular Structure and Elementary Statistical Mechanics
- Chem 131C: Thermodynamics and Chemical Dynamics

Graduate Courses

- Chem 201: Organic Reactions Mechanisms I
- Chem 202: Organic Reactions Mechanisms II
- Chem 203: Organic Spectroscopy
5. Okay, but, really, why is it free? Because in the openly licensed format (CC-BY-SA 3.0), attribution required, shared alike, UCI contributes to global chemistry education at no marginal cost to itself beyond the already completed filming. Our own students also benefit by being able to review presentations and because it is available on YouTube, we don’t have to worry about maintaining it on course pages behind password protection. By making it open, another institution or professor can use some or all of the video presentations without even having to contact us for permission. So we are fulfilling the mission of a land-grant, public university effectively and efficiently.

6. UCI is a member of Coursera. Why aren’t you offering these courses on one or another MOOC platforms? We think that Coursera is a great platform, but it may not be the optimal platform for transfer of educational resources by other universities or community colleges. By publishing the video lectures with an open, Creative Commons license, another institution may incorporate one, two or all of the video lectures as may fit their needs. Furthermore, they don’t have to ask permission. Permission is granted in advance through the license selection. Also, a learner can access these resources regardless of course dates.

7. Can I get a degree from UCI through OpenChem? Sorry, but the answer is no. While our goal is to promote learning the subject of Chemistry, we only award degrees to matriculated students at the University of California, Irvine.

8. Can I get university credit for studying Chemistry through OpenChem? It is possible that in the near future, these video lectures will be combined with labs and textbooks at other institutions, which may themselves award credit. We are in conversations with several companies and institutions that may want to use our course videos.

9. Will the video lectures be captioned? Yes, we are currently looking for partners to accomplish the captioning. A particular difficulty with Chemistry and other fields is that automatic translation only goes so far and the rest has to be reviewed by someone with a thorough knowledge of Chemistry to avoid mis-transcription of similar names or words. Once the video lectures are captioned, we will provide a text index and a text search.

10. Can we provide feedback? Yes, there is a page on our website for comments: http://ocw.uci.edu/contact.aspx.

11. Are there other subjects that will follow OpenChem? Isn’t Chemistry enough? Seriously, the answer is yes. We are constantly in discussions with UCI schools and departments and are aware of other opportunities from subjects in which one or more courses may already have been filmed. Already we have a growing collection of Math and Physics courses.
EMORY UNIVERSITY
EOEI Projects
https://scholarblogs.emory.edu/eoei/about/eoei-projects

Emory Open Education Initiative
A pilot program to promote Open Educational Resources (OERs)

EOEI Projects

Several projects have come to fruition from this initiative (others are still a work-in-progress and will be posted when they are ready).

- This is a student-generated OER project using Wikipedia from Professor Steven Kraftshier's theology graduate course.
- This is a video created by Karline Coleman, genetics professor, about a family and their journey with Cystic Fibrosis: Sam's Story – YouTube
- This is an app called PedialBP from Professor Hope Bussenius from the School of Nursing. The goal of the Take2Heart Program is for every child and adolescent to receive an accurate blood pressure reading each year, and in doing so, lower the cardiac risk of pediatric patients.
- This is a German grammar tutorial website, all videos are created by students within the German program.
Welcome to Biology 1510 for Summer 2016!

Select course readings from the menus above by Module:
- Molecules and Metabolism
- Genes and Genomes
- Evolution
- Ecology

Lecture materials can be downloaded from t-square

Instructions for the group video project will be available later in the term.

UNIVERSITY OF MINNESOTA
Open Textbooks
https://www.lib.umn.edu/publishing/works/textbooks

Business Communication for Success
Business Communication for Success provides a comprehensive, integrated approach to the study and application of written and oral business communication to serve both student and professor.

College Success
College Success has a student-friendly format arranged to help students develop the essential skills and provide the information they need to succeed in college.

Criminal Law
Let's face it, legal textbooks can be dry. This is unfortunate because law, especially criminal law, is an intrinsically compelling topic. Criminal Law employs a variety of instructional techniques that should engage from start to finish.

Exploring Business
Introduces students to business roles and concepts in an exciting way. This text will help you decide whether business is right for you and, if so, what areas of business you'd like to study further.

Financial Accounting
This book is intended for an undergraduate or MBA level Financial Accounting course. It covers the standard topics in a standard sequence, utilizing the Socratic method of asking and answering questions.

Human Resource Management
Teaches HRM strategies and theories that any manager - not just those in HR - needs to know about recruiting, selecting, training, and compensating people.

Information Strategies for Communicators
by Kathleen Hansen and Nora Paul
The definitive text for the information search and evaluation process as practiced by news and strategic communication message producers. Currently used at the University of Minnesota School of Journalism and Mass Communication, JOUR 300/400 Information for Mass Communication.

Information Systems: A Manager's Guide to Harnessing Technology is intended for use in undergraduate and/or graduate courses in Management Information Systems and Information Technology.
Principles of Social Psychology
Provides students with an introduction to the basic concepts and principles of social psychology from an interactionist perspective. The presentation of classic studies and theories are balanced with insights from cutting-edge, contemporary research. An emphasis on real world examples and applications is intended to guide students to critically analyze their situations and social interactions in order to put their knowledge to effective use.

Research Methods in Psychology
While Research Methods in Psychology is fairly traditional — making it easy for you to use with your existing courses — it also emphasizes a fundamental idea that is often lost on undergraduates: research methods are not a peripheral concern in our discipline; they are central.

Social Problems: Continuity and Change
A realistic but motivating look at the many issues that are facing our society today. As this book's subtitle, Continuity and Change, implies, social problems are persistent, but they have also improved in the past and can be improved in the present and future, provided that our nation has the wisdom and will to address them.

Sociology: Understanding and Changing the Social World
Makes sociology relevant for today's students by balancing traditional coverage with a fresh approach that historically takes them back to sociology's American roots in the use of sociological knowledge for social reform.

Understanding Media and Culture: An Introduction to Mass Communication
This text will support an engaging and interesting course experience for students that will not only show them the powerful social, political and economic forces that affect the future of media technology, but will challenge students to do their part in shaping that future.

Writing for Success
Writing for Success is a text that provides instruction in steps, builds writing, reading, and critical thinking, and combines comprehensive grammar review with an introduction to paragraph writing and composition.
About the Adaptive Map Tool:

The Adaptive Map tool aims to enhance learning by providing advance organizers, in the form of expert generated concept maps, to the user. This is realized through the concept map based navigation system that is central to the design of the Adaptive Map software. By providing an advance organizer (a high level, easy to understand, overview of the information) the tool subtly encourages the user to keep the big picture in mind, helping users connect new information to previously learned topics.

Because concept maps can become overwhelming when they become too large, the interactive navigation system is also designed to adapt the visuals to the user's current focus. This ensures that the user gets a relevant overview of the information they are currently examining, but that they not visually overwhelmed with irrelevant details.

The tool has been tested in the classroom and was shown to be more effective than a traditional paper textbook in two respects. First, as predicted with the design, the tool encourages users to spend more time attending to an overview of the information, helping students build a skeleton they can fit details into later. Second, the tool encouraged users to step back and review topics from previous sections that were relevant to the topics they were learning. This combination of behaviors in the users leads to greater measures of conceptual understanding, with little to no extra effort on the part of the learner.

Adaptive Map Developers:

Project Lead: Dr. Jacob Moore

Dr. Moore is an Assistant Professor of Mechanical Engineering at Penn State Mont Alto. His research interests include engineering education focused on digital textbook design, and additive manufacturing technologies. As the project lead, Dr. Moore oversees all development and evaluation activities and is currently the primary content developer.

Lead Software Developer: Shawn Shroyer

Shawn Shroyer is currently a senior in the Information Sciences and Technology program at Penn State Mont Alto. As the lead software developer, Shawn is the primary software developer for the Adaptive Map Project.

Past Contributors:

We would also like to acknowledge past software developers, Nathanael Bice, Lauren Gibboney, Joseph Luke, James McIntyre, John Nein, Tucker Noia, Michel Pascale, and Joshua Rush, as well as the content experts we have consulted with, Dr. Robert Scott Pierce and Christopher Venters.

Job Descriptions
Open Educational Resources (OER) Coordinator

Position Overview: Creates, promotes and utilizes open educational resources (OERs) and open access content in support of the University of Oklahoma's goal to develop open access textbooks; serves as primary liaison to teaching faculty in this role.

Position Responsibilities:
- Identify likely subjects for the development of OERs.
- Work collaboratively with diverse subject matter specialists to create OERs in a variety of disciplines.
- Promote the development and use of OERs for teaching and learning at OU.
- Promote the discovery and use of OU-created OERs to the educational community beyond OU.
- Identify, describe and index OERs.
- Research and resolve intellectual property rights of materials utilized in the development and creation of OERs.
- Work with appropriate library personnel to preserve OER content created by OU faculty in the University Libraries' institutional repository.
- Guide the development of peer review/evaluation processes for created OERs.
- Explore/experiment and develop tools and applications for OERs and open courseware.
- Define/develop educational objectives to meet learning outcomes.
- Develop diverse learner-centered online course content and activities to meet varying learning modalities.

Skills:
- Ability to consult and collaborate with diverse individuals and groups.
- Ability to effectively communicate orally and in writing.
- Ability to establish effective cooperative working relationships.
- Ability to make effective presentations and communicate ideas.
- Project management: Define goals, develop budgets and timelines, and coordinate existing staff and technology resources to achieve or exceed desired outcomes.
- Ability to assess and learn new technologies quickly.
- Ability to work creatively in a rapidly changing environment.
Jobs@ Template for Role Changes and New Positions

General Position Information

Why is this request being submitted? The Library is building infrastructure for scalable, sustainable platforms for open publishing of Library-hosted content under the umbrella of the Library’s Scholarly Repository Services unit.

Is this position to be posted? Yes

POSITION INFORMATION

Department (Applicant View): University of Virginia Library

Location (Applicant View): Charlottesville

Note for the Posting Summary field below:

For STAFF - market your position by describing the advantages of applying for this specific posting. Qualifications and employment conditions are presented separately.

Posting Summary: Academic Discipline-Specific Technology Professional (ADSTP) Specialists use knowledge of information technology, including programming, applications, databases, web design, and software to support activities such as teaching, research, curriculum design, and publishing within an academic discipline.

Required applicant documents:

- CV / Resume
- Cover Letter
- Contact information for 3 References - name, email, phone

Optional Documents:

Hiring Official Name: Ellen Ramsey

Hiring Official Phone Number: 434-243-7079

Hiring Official E-mail Address: Ecr2c@virginia.edu

How many positions will you need to fill with this posting? 1

Reason for Posting: The Library is building infrastructure for scalable, sustainable platforms for open publishing of Library-hosted content under the umbrella of the Library’s Scholarly Repository Services unit.

Area of Interest:

Posting for UVA Employees Only: Yes (this is true for the first five days that a position is posted)
The University of Virginia Library seeks applicants for the position of **Open Publishing Librarian**. The position will focus on advancing infrastructure for scalable, sustainable platforms for open access journal hosting, open educational resources, and emerging open modes of scholarship, under the umbrella of the Library’s Scholarly Repository Services unit.

The successful candidate will provide innovative, creative leadership for a newly-created position in the Library dedicated to advancing the University’s growing engagement with contemporary, open, and scholarly publishing issues.

The Open Publishing Librarian engages with University and Library communities to explore and establish best solutions for digital publication and preservation of scholarly work, leveraging evolving technologies for dissemination and discovery of UVA research and scholarship. Initial work will focus on investigating and assessing scalable, sustainable platforms for open access journal hosting and new modes of open scholarship under the umbrella of the Library’s Scholarly Repository Services unit. Work will evolve to include presentations about and direct patron support of selected platforms, as well as evaluating capacity and applications for new modes of open publishing within the Library’s purview. Close collaboration is expected with the Scholarly Repository Services team and the Digital Preservation Librarian to ensure alignment with repository and preservation standards and recommend changes and/or relevant new services. The ideal candidate will be a skilled presenter and advocate comfortable partnering with diverse groups of stakeholders to promote a comprehensive view of the Library’s scholarly repository and open publishing resources.

**EO/AA Statement for Your Organization:** The University of Virginia is an affirmative action/equal opportunity employer committed to diversity, equity, and inclusiveness.

What is the primary purpose of this position?

The Library is building infrastructure for scalable, sustainable platforms for open publishing of Library-hosted content under the umbrella of the Library’s Scholarly Repository Services unit.

The Open Publishing Librarian engages with University and Library communities to explore and establish best solutions for digital publication and preservation of scholarly work, leveraging evolving technologies for dissemination and discovery of UVA research and scholarship. Initial work will focus on investigating and assessing scalable, sustainable platforms for open access journal hosting and new modes of open scholarship under the umbrella of the Library’s Scholarly Repository Services unit. Work will evolve to include presentations about and direct patron support of selected platforms, as well as evaluating capacity and applications for new modes of open publishing within the Library’s purview.

Cite specific examples of decisions made with supervisory guidance AND specific examples of decisions made without supervisory guidance.

Without Supervisory Guidance:
- Direct patron support of selected platforms, including help ticket responses, training for student and faculty editors, technical support for publication deposits.
- Researches emerging trends in scholarly publishing, new business models, the marketplace, and new technologies to inform and guide the library’s digital publishing strategies.
- Engages with faculty to explore issues and solutions for digital publication and preservation of work eligible for Library open publishing initiatives.
- Writes and maintains documentation for selected platforms.

With Supervisory Guidance:
- Prepares recommendations based on research of new platforms and systems for support of open publishing initiatives. Supervisor will and stakeholders.
- Serves on project team(s) assembled to implement recommended platforms, contributing operational and policy input based on research and expertise.
- Supervisor provides high-level decision making and prioritizes projects, reviews and channels appropriate resource requests for recommended models to Library and University leadership.

Three years of Open Education position descriptions

JOB DESCRIPTION
YEAR 1: Open Education and Online Learning Environments Librarian
RANK: Instructor
The Open Education (OE) and Online Learning Environments Librarian will promote the findability, use, assessment, and creation of open educational resources with faculty, staff, and students. The position will specialize in maintaining current awareness of trends and issues in open education, developing an in-depth knowledge of open educational resources (OER) and their sources, and communicating these trends, issues, and knowledge to the campus community. Liaise with OER initiatives and communities of practice (e.g. MERLOT, OER Commons, MITE, Creative Commons, ALS). The Libraries’ OE program is in its pilot phase. The position will assess needs in regards to OE approaches and explore what the program can become.

Among the chief activities of the position will be:
35%: Survey the online learning environment at this institution and beyond. Identify service models used by other libraries in support of online and distance learning. Liaise with the educational technology unit.
25%: Explore and disseminate information regarding Open Educational Resources (OER) (to include digital textbooks and multimedia) to the Library community and interested Faculty at this institution. Identify current practices of this institution’s faculty. Survey ARL peer institutions, particularly focusing on 1) Ways that librarians are providing support and services in this space; 2) Ways that instructors are currently using open educational resources; and 3) Uncover any advocacy for OER by ARL members and their impact on teaching/learning. Identify opportunities for the Libraries to lead or partner in initiatives regarding OERs at this institution.
15%: Develop set of guidelines and checklist for faculty regarding using licensing content for educational use (in classroom and online).
25%: Other education and liaison responsibilities.

YEAR 2: Assessment, Open Education, and Online Learning Environments Librarian
RANK: Instructor
DEPARTMENTS (3): Assessment and Branch Operations, Learning Environments, Scholarly Communication
The chief activities of the position will be:
60%: Assessment
15%: Online/distance learning partnerships and exploration
15%: Continue to identify opportunities and potential directions for the Libraries’ OER program to lead or partner in initiatives regarding OER at this institution. Engage, disseminate
information, and develop champions among Library faculty/staff, interested non-library faculty, and students at this institution regarding Online Educational Resources (OER) (to include digital textbooks and multimedia). Copyright, open licensing, and Creative Commons in conjunction with other members of the Scholarly Communications Team’s broad conversation with faculty regarding Open Publishing. Continue to liaise with initiatives outside of this institution’s working with open educational resources. Participate in the Information Policy & Rights Working Group with regard to U.S. Copyright Law.

10% - Library liaison to this institution’s Economics and Mathematics departments.

**YEAR 3:**

**TITLE:** Open Education, Copyright, and Scholarly Communication Librarian

**RANK:** Assistant Professor

**DEPARTMENT:** Scholarly Communication

60% Supports the University Libraries’ research and scholarly communication initiatives, including:

- Contributing to the development of University Libraries’ research and informatics programs and engages in research and scholarly communication initiatives and service activities.
- Providing leadership and expertise for University Libraries and the research and informatics division in areas related to open educational resources (OER), copyright, and open licensing.
  - Explores and disseminates information regarding OER to the library community and interested faculty at this institution.
  - Identifies opportunities and potential directions for campus OER initiatives.
- Engages, disseminates information, and develops champions among Library faculty/staff, interested non-library faculty, and students regarding OER, copyright, open licensing, and Creative Commons in conjunction with open e-publishing initiatives. Liaises with groups outside of the university working with open educational resources.

30% Serves as the library liaison to the assigned departments of economics, mathematics, and legal studies.

8% Upholds a breadth of professional responsibilities and initiatives by . . .

2% Performs other duties as assigned
